Psychology Of Personality An Epistemological Inquiry:

The Psychology of Personality James T. Lamiell, 1987 No area of the world has been viewed by Americans with greater moral disapproval and yet less attention than southern Africa writes Anthony Lake in the introduction to *The Tar Baby Option* Feeling that there is much to be learned from an examination of the American response to the Rhodesian problem he offers a detailed account of America's Southern Rhodesia policy since the Smith government's unilateral declaration of independence from Great Britain in 1965 The book provides information essential to an understanding of the American approach to the current crisis in the region The author's use of previously undisclosed materials and interviews with U S foreign policymakers gives the reader an inside look not only at the Rhodesian question but also at the politics of American foreign policy

Situation Cognition and Coherence in Personality Barbara Krahé, 2010-08-26 This 1990 volume was written to re-examine the long standing controversy about consistency in personality from a social psychological perspective Barbara Krahé reconsiders the concept of consistency in terms of the systematic coherence of situation cognition and behaviour across situations In the first part of the volume she undertakes an examination of social psychological models of situation cognition for their ability to clarify the principles underlying the perception of situational similarities She then advances an individual centred methodology in which nomothetic hypotheses about cross situational coherence are tested on the basis of idiographic measurement of situation cognition and behaviour In the second part of the volume a series of empirical studies is reported which apply the individual centred framework to the analysis of cross situational coherence in the domain of anxiety provoking situations These studies are distinctive in that they extend over several months and use free response data

Rethinking Methods in Psychology Jonathan A Smith, Rom Harre, Luk Van Langenhove, 1995-09-07 The recent widespread rejection of conventional theory and method has led to the evolution of different ways of gathering and analyzing data This accessible textbook introduces key research methods that challenge

psychology's traditional preoccupation with scientific experiments The book provides a well structured guide to methods containing a range of qualitative approaches for example semi structured interviews grounded theory discourse analysis alongside a reworking of quantitative methods to suit contemporary psychological research A number of chapters are also explicitly concerned with research as a dynamic interactive process The internationally respected contributors steer the reader through the main stage

Dialogues at the Edge of American Psychological Discourse Heather Macdonald, David Goodman, Brian Becker, 2017-09-15 This book explores the discipline of psychology through in depth dialogues with scholars who have lived at the turbulent edges of mainstream psychology in the USA and who have challenged the most cherished theoretical frameworks It includes researchers whose work has been widely esteemed in recent decades but has ultimately not been taken up to reconstitute the theoretical direction of the field This volume chronicles perspectives from select scholars on the current states of their respective areas of the field their understanding of how their work has been metabolized and their concerns about the conceptual frames that currently set the theoretical boundaries of the discipline These authors demand a reinterpretation of thresholds to allow for a less monological emphasis in the adoption of particular frameworks and to demonstrate historical social economic and political consequences of their chosen frameworks The contents of the volume will assist theoreticians and clinicians in their understanding of how particular kinds of knowledge are determined accepted and produced in the field at large

Psychology's Misuse of Statistics and Persistent Dismissal of its Critics James T. Lamiell, 2019-03-27 This book is a strenuous critique of the misinterpretation of statistical knowledge of populations in mainstream psychology exploring the implications of assuming that those statistics constitute scientific knowledge of individuals It investigates the essential nature and historical roots of this interpretive practice and documents the lack of change in mainstream thinking despite previous critiques of the practice The author contends that prevailing interpretive traditions result in bad science in that invalid claims are made to knowledge of individuals He also discusses the socio ethical problems resulting from this misinterpretation of statistics where psychological practitioners unjustifiably endorse interventions in the lives of individuals Lamiell urges psychologists to abandon the aggregate statistical methods which he argues have transformed the field into psycho demography and to embrace instead alternative research methods that are logically suited to gaining scientific knowledge about the psychological functioning of individuals This book concludes by highlighting some of the currently available methodological alternatives as well as discussing some enduring conceptual impediments to the serious consideration of those alternatives

Annals of Theoretical Psychology Daniel N. Robinson, Leendert P. Mos, 2013-11-11 Early in 1986 I invited Professor Robinson to collaborate on a volume of the Annals devoted to the theme of the person in psychology He accepted my invitation later that year suggesting instead that the volume be devoted to the theme of explanation in psychology I gladly compromised for as I knew from his extensive writings on the history and philosophy of psychology the concept of

explanation is firmly rooted in philosophical anthropology The contributions by Rom Harre James Lamiell Joseph Margolis and George Miller were available in June 1988 and the commentaries and replies to commentaries early in 1989 Fortunately foundational papers wear well as the content of the present volume so aptly testifies Beginning with Volume 6 the Annals will be entirely edited and prepared using the computer facilities at our Center Thanks to the dedicated effort of my colleague Professor William Baker this is the first volume produced from camera ready copy His personal support and technical expertise made the transition to desk top publishing somewhat less than formidable Mrs Valerie Welch our Center secretary entered the text and managed my personal correspondence Casey Boodt proofread the entire manuscript and the University of Alberta continues to support my involvement with this series Dan Robinson s commitment to scholarship also extends to the more mundane task of editing Every volume with a co editor is a challenge he made this one a delight *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1987 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *Dynamic Process Methodology in the Social and Developmental Sciences* Jaan Valsiner, Peter C. M. Molenaar, Maria C.D.P. Lyra, Nandita Chaudhary, 2009-07-09 All psychological processes like biological and social ones are dynamic Phenomena of nature society and the human psyche are context bound constantly changing and variable This feature of reality is often not recognized in the social sciences where we operate with averaged data and with homogeneous stereotypes and consider our consistency to be the cornerstone of rational being Yet we are all inconsistent in our actions within a day or from one day to the next and much of such inconsistency is of positive value for our survival and development Our inconsistent behaviors and thoughts may appear chaotic yet there is generality within this highly variable dynamic The task of scientific methodologies qualitative and quantitative is to find out what that generality is It is the aim of this handbook to bring into one framework various directions of construction of methodology of the dynamic processes that exist in the social sciences at the beginning of the 21st century This handbook is set up to bring together pertinent methodological scholarship from all over the world and equally from the quantitative and qualitative orientations to methodology In addition to consolidating the pertinent knowledge base for the purposes of its further growth this book serves the major educational role of bringing practitioners students researchers and professionals interested in applications the state of the art know how about how to think about extracting evidence from single cases and about the formal mathematical statistical tools to use for these purposes Narrative Development Michael Bamberg, 2012-11-12 Growing out of an International Society of the Study of Behavioral Development sponsored symposium this book discusses the basic assumptions that led the contributors to conduct research in the field of narrative development This collection gathers their research reflections and varying approaches to narrative and its development It illustrates each type of approach and highlights their respective motives The book presents some of the basic motivating assumptions of each approach and provides insight into what holds each set of assumptions together potentially transforming them into actions

This book will serve as an excellent text for courses emphasizing multiple approaches to the study of narrative. The editor has organized this volume in accordance with the six main points of the symposium: Specification of the Domain, how narratives are defined in terms of textual structures, knowledge thereof, interactive moves, sociocultural conventions, and the like; The Individual's Involvement in the Developmental Process, the relationship between some internal or external forces and the organism's own active participation in the developmental process; The Course of Development, if it is continuous or discontinuous, whether it proceeds in an additive fashion or whether regressive phases occur, and what changes at different points in the developmental process signify; The Goal of Development, the implicit notion of a telos, a target or end point that needs to occur in the developmental process; Mechanisms of Development, the forces and/or conditions that both instigate the developmental process and keep it moving toward its telos; Methodology, where and how to look in the establishment of a developmental framework. This book is an indispensable text in the fields of narrative and/or discourse, linguistics, language studies, psychology, and education in general.

People and Societies Luk van Langenhove, 2010-04-05 Rom Harr has pushed the boundaries of our thinking about people and societies and has challenged the orthodox philosophy of science and social psychology. His countless books and articles have inspired generations of scholars in philosophy, psychology, linguistics, cognitive science, and social theory. The diversity of his work makes that some see him as a leading figure in the critical realist school of philosophy of science, other as a key player in developing a social constructionist approach to psychology. The present volume brings together a careful selection of his key writings and presents them in a framework that stresses the evolution of his thinking as well as the place of his thinking in ongoing debates in different disciplines. The overall theme is the study of people and their ways of life. This is the first book that gives readers a systematic introduction in the conceptual universe of this towering figure.

Dialogical Self Theory Hubert Hermans, Agnieszka Hermans-Konopka, 2010-04-22 In a boundary crossing and globalizing world, the personal and social positions in self and identity become increasingly dense, heterogeneous, and even conflicting. In this handbook, scholars of different disciplines, nations, and cultures, East and West, bring together their views and applications of dialogical self theory in such a way that deeper commonalities are brought to the surface. As a bridging theory, dialogical self theory reveals unexpected links between a broad variety of phenomena, such as self and identity problems in education and psychotherapy, multicultural identities, child rearing practices, adult development, consumer behaviour, the use of the internet, and the value of silence. Researchers and practitioners present different methods of investigation, both qualitative and quantitative, and also highlight applications of dialogical self theory.

Handbook of Personality Development Dan P. McAdams, Rebecca L. Shiner, Jennifer L. Tackett, 2021-04-02 Bringing together prominent scholars, this authoritative volume considers the development of personality at multiple levels, from the neuroscience of dispositional traits to the cultural shaping of life stories. Illustrated with case studies and concrete examples, the Handbook integrates areas of research that have often remained disparate. It offers a lifespan perspective on the many

factors that influence each individual's psychological makeup and examines the interface of personality development with health psychopathology relationships and the family Contributors provide broad based up to date reviews of theories empirical findings methodological innovations and emerging trends See also the authored volume *The Art and Science of Personality Development* by Dan P McAdams *Problematic Research Practices and Inertia in Scientific Psychology* James Lamiell, Kathleen Slaney, 2020-11-04 This volume explores the abiding intellectual inertia in scientific psychology in relation to the discipline's engagement with problematic beliefs and assumptions underlying mainstream research practices despite repeated critical analyses which reveal the weaknesses and in some cases complete inappropriateness of these methods Such paradigmatic inertia is especially troublesome for a scholarly discipline claiming status as a science The book offers penetrating analyses of many albeit not all of the most important areas where mainstream practices require either compelling justifications for their continuation or adjustments possibly including abandonment toward more apposite alternatives Specific areas of concern addressed in this book include the systemic misinterpretation of statistical knowledge the prevalence of a conception of measurement at odds with yet purporting to mimic the natural sciences the continuing widespread reliance on null hypothesis testing and the continuing resistance within psychology to the explicit incorporation of qualitative methods into its methodological toolbox Broader level chapters examine mainstream psychology's systemic disregard for critical analysis of its tenets and the epistemic and ethical problems this has created This is a vital and engaging resource for researchers across psychology and those in the wider behavioural and social sciences who have an interest in or who use psychological research methods **Working with Underachieving Students in Higher Education** Maria Francesca Freda, José González-Monteagudo, Giovanna Esposito, 2016-06-10 *Working with Underachieving Students in Higher Education Fostering Inclusion through Narration and Reflexivity* presents an international and interdisciplinary approach to the study of the relationships between narrative devices and reflexivity in higher education Stemming from a collaborative European research project called INSTALL Innovative Solutions to Acquire Learning to Learn it focuses on an innovative model aimed at promoting personal resources and reflective competencies in non traditional disadvantaged and underachieving students The book is divided into three parts with the first providing an exploration of the key theoretical issues that formed the basis of the theoretical and methodological approaches in the INSTALL Project The second part presents an innovative narrative methodology and discusses the most significant phases of the training process and of the main products The third and last part provides a broad discussion of higher education policies and of the need to encourage innovation and reforms to improve the academic inclusion of underachieving students Chapters in the collection examine interventions in Italy Romania Ireland and Spain using a broad transnational intercultural and comparative approach to consider narrative tools using four channels metaphoric iconographic writing and the body This book provides theoretical insights and practical methodologies which can be used to enhance quality teaching and innovation as well as to help adapt

to diversity in higher education It will therefore be of key interest to academics researchers and postgraduate students in the fields of higher education sociology of education education policy and politics cultural and developmental psychology and narrative research as well as to those studying counselling mentoring and coaching **Primer in Critical Personalism**

James T. Lamiell,2024-02-01 This insightful book offers contemporary psychologists and other social theorists an understanding of the comprehensive system of thought developed by the German scholar William Stern 1871 1938 known as critical personalism Expanding the author s ongoing efforts in this area the book considers firstly how critical personalism could ground a needed revival of psychological science a need created by the field s gradual transformation through its widespread adoption of aggregate statistical methods of investigation into a discipline better characterized as psycho demography Consistent with Stern s own view of the potential of critical personalism vis a vis socio ethical concerns the book then explores how the framework could facilitate a transcendence of thinking about racial and other social relationships beyond currently prevailing narratives about personkinds into narratives that are actually about persons This part of the book includes a chapter discussing Stern s own historical efforts in this direction serving to highlight the non individualistic nature of critically personalistic thinking Throughout Lamiell constructs a clear case for the merits and applicability of critical personalism in modern psychology and social thought **Primer in Critical Personalism** will interest established psychological scientists and advanced students in the field as well as those who are concerned about our contemporary socio cultural ethos and the prospects for its improvement including philosophers sociologists educators journalists clerics and thoughtful laypersons alike Portraits of Pioneers in Psychology Gregory A. Kimble,C. Alan Boneau,Michael

Wertheimer,2012-08-21 A major aim of the books in this series is to promote psychology s appreciation of the neglected giants in its history The chapters document the significance of these early contributions many of them made more than a century ago Most of the chapters are revisions of invited addresses delivered at psychological conventions Several of the authors are students colleagues or offspring of their pioneers and all of them are intrigued by the life and work of the psychologists about whom they have written All of the portraits are informal on occasion even humorous Some are impersonations telling stories in what were or might have been the pioneer s own words This book provides source materials for teachers of undergraduate courses in psychology particularly the history of psychology who want to add a personal view in their lectures and offer interesting readings for their students Each of the five volumes in this series contains different profiles thereby bringing more than 100 of the pioneers in psychology more vividly to life **Interpreting Economic and**

Social Data Othmar W. Winkler,2009-08-12 **Interpreting Economic and Social Data** aims at rehabilitating the descriptive function of socio economic statistics bridging the gap between today s statistical theory on one hand and econometric and mathematical models of society on the other It does this by offering a deeper understanding of data and methods with surprising insights the result of the author s six decades of teaching consulting and involvement in statistical surveys The

author challenges many preconceptions about aggregation time series index numbers frequency distributions regression analysis and probability nudging statistical theory in a different direction Interpreting Economic and Social Data also links statistics with other quantitative fields like accounting and geography This book is aimed at students and professors in business economics demographic and social science courses and in general at users of socio economic data requiring only an acquaintance with elementary statistical theory

The Singular Self Professor Rom Harré, 1997-12-12 Harré draws on psychology philosophy anthropology and linguistics to develop an intellectually rigorous and integrative understanding of selfhood as a *unitas multiplex* a diversity in unity The breadth of Harré's scholarship and the rigor which he evaluates various conceptual positions are awe inspiring Harré's keen insights and erudite arguments about selfhood help to clear a space for an intellectually rigorous psychology of persons Although many readers will find this a very challenging book Harré bills his text as *An Introduction to the Psychology of Personhood* He is laying out some of the basic concepts that must be invoked if one is to develop a credible science of persons In conclusion Harré's brilliant exegesis of the grammar underlying self talk provides a philosophical clearing within which a sophisticated and generative science of persons may be allowed to take place Contemporary Psychology This landmark work draws on material from psychology philosophy anthropology and linguistics to develop a hierarchical and structured concept of personhood Rom Harré shows that despite the centrality of our social and cultural identities the self must ultimately be understood as autonomous distinct and continuous as a shifting but unified pattern of multiplicities and singularities This masterly analysis offers an opportunity to develop a truly scientific account of personhood By charting a path across the psychological landscape that acknowledges both the symbolic and the physiological aspects of our being from language to biology Harré maps the terrain of what it is to be a person in the context of discursive psychology
