Functional Laws of Psychodynamics E. Szekely, 2012-12-06 This monograph describes the background, conduct, and outcome of part of a long-term project of research into the fundamental processes of psychodynamics. It was first theorized and then shown empirically that such research can lead to the formulation of certain general laws and lawful patterns in psychodynamics. Stated at higher levels of conceptualization, these formulations enable us to explain systematically the diverse configurations, effects, and intricacies of dynamic systems in psychological functioning. At the same time, the research reported here was intended to contribute to ongoing efforts to secure a proper base for the study and management of intrapsychic or inner functional factors in health and illness. This research project has called for concerted inquiry into psychodynamics along a number of dimensions: theoretical, empirical, methodological, clinical, analytic, qualitative, quantitative, and statistical. The clinical programs required intensive investigations such as in-depth psychodiagnostic examination or psychotherapeutic treatment of individual patients as well as of nonpatient volunteers. The former were drawn from a large number of patients seen in various settings over several years, whereas the latter were selected from a group of university student volunteers.

Encyclopedia of Adolescence B. Bradford Brown, Mitchell J. Prinstein, 2011-06-06 The period of adolescence involves growth, adaptation, and dramatic reorganization in almost every aspect of social and psychological development. The *Encyclopedia of Adolescence* Three Volume Set offers an exhaustive and comprehensive review of current theory and research findings pertaining to this critical decade of life. Leading scientists offer accessible and easily readable reviews of biological, social, educational, occupational, and cultural factors that shape adolescent development. Issues in normative development, individual differences, and psychopathology/maladjustment are reviewed. Over 130 chapters are included, each covering a specific aspect or issue of adolescence. The chapters trace differences in the course of adolescence in different nations and among youth with different backgrounds. The encyclopedia brings together cross-disciplinary contributors including academic researchers, biologists, psychiatrists, sociologists, anthropologists, and public policy experts and will include authors from around the world. Each article features an in-depth analysis of current information on the topic along with a glossary, suggested readings for further information, and cross-references to related encyclopedia articles. The volumes offer an unprecedented resource for all audiences, providing a more comprehensive understanding of general topics compared to other reference works on the subject. Available both in print and online via SciVerse ScienceDirect. Winner of the 2011 PROSE Award for Multivolume Reference in Humanities and named a 2012 Outstanding Academic Title by the American Library Association's Choice publication. Brings together cross-disciplinary contributors including developmental psychologists, educational psychologists, clinical psychologists, biologists, psychiatrists, sociologists, anthropologists, and public policy experts. Published both in print and via Elsevier's ScienceDirect™ online platform.

The Neurobiology of

Criminal Behavior Anthony Walsh,Jonathan D. Bolen,2016-03-03 The main feature of this work is that it explores criminal behavior from all aspects of Tinbergen s Four Questions Rather than focusing on a single theoretical point of view this book examines the neurobiology of crime from a biosocial perspective It suggests that it is necessary to understand some genetics and neuroscience in order to appreciate and apply relevant concepts to criminological issues Presenting up to date information on the circuitry of the brain the authors explore and examine a variety of characteristics traits and behavioral syndromes related to criminal behavior such as ADHD intelligence gender the age crime curve schizophrenia psychopathy violence and substance abuse This book brings together the sociological tradition with the latest knowledge the neurosciences have to offer and conveys biological information in an accessible and understanding way It will be of interest to scholars in the field and to professional criminologists
