

its main duties amongst sub-committees, but the establishment of a strong committee to concentrate on recruitment and training will be a welcome move. Progress towards a national Probation Council, with much greater participation by the service and those closely connected with its work is slow, but the change is a move in the right direction.

Publicity

THE PROBATION and After-Care Department of the Home Office is to be congratulated on the publication of the new edition of *The Probation Service in England and Wales*. This fourth edition of a pamphlet which has hitherto been dull and unimaginative now has a bright orange cover and its contents have been attractively revised and well set out by the printer. In twenty-four pages a brief history leads to a summary of the uses and purposes of probation, after-care and other duties of the service, followed by concluding sections on organisation, recruitment and training. The pamphlet is sufficiently up-to-date to embrace the most recent developments in after-care and the establishment of the new Home Office department for probation and after-care. The whole (published by H.M. Stationery Office) costs two shillings and makes a good investment for those who want a brief understanding of the probation service or who are interested in joining it.

Casework

THIS MUCH ABUSED word occupies a lot of space in this issue. It is the subject of a new book by Mr. Mark Monger which is reviewed on another page; one aspect of it is discussed by Dr. Melitta Schmideberg, another by Mr. Geoffrey Parkinson, and Mr. Farrimond wonders whether we could get rid of the word altogether.

In our next issue we hope to devote particular attention to group work.

PSYCHOTHERAPY OF OFFENDERS: its rationale and implications for general psychotherapy

Dr. Melitta Schmideberg, London

[This Paper was read before the Third International Conference
for Psychotherapy, London, August 1964]

SINCE John Howard and even before, it has been liberal English tradition to fight brutality and injustice, and ease the lot of the prisoner. Today, however, there is little crime due to starvation and little large scale brutality or injustice in England. These very improvements make it harder for the would-be-reformer, so that some have to resort to attacking punishment *per se*. Retribution is decried as archaic and "sadistic". But punishment is meant to hurt and any punishment fitting crime is bound to be retributive — and what else is justice? The word "justice" has good semantic associations, "retribution" bad ones.

Exploring High-risk Offender Treatment and the Role of Music Therapy Louise Sicard, 2021-07-05. Exploring High-risk Offender Treatment and the Role of Music Therapy explores the treatment delivered to high-risk offenders with complex needs, focusing on sex and violent offenders. The book advocates for the further use of less traditional and creative therapies, in particular music therapy. The higher the risk, the greater the needs. Offenders with complex needs have a range of factors impacting their abilities and well-being, including mental health and learning disorders. Importantly, high-risk offenders commonly present with complex needs and therefore require treatment that is highly responsive. Guiding this book is the existing literature and qualitative research conducted by the author that sought to gain the perspectives and experiences of practitioners in the field. This included 38 interviews with those that deliver treatment to high-risk offenders and music therapy. This book examines the components of high-risk offender treatment, highlighting the effective elements and the limitations found within the literature and from the perspective of interviewed practitioners. Offering insight into less traditional therapies, the book presents literature surrounding mindfulness, psychodrama, and art therapy for high-risk offenders. It is argued that there has been a recent shift towards a creative corrections approach where less traditional therapies are gaining recognition within offender treatment as they offer unique and supportive benefits to traditional treatment. This book focuses on examining the role of music therapy for high-risk offenders, mainly through a critical discussion on the relevant literature and qualitative practitioner data. Advocating the further implementation of creative corrections approaches, this book will be of great interest to academics and researchers within the fields of offender treatment and penology, as well as forensic psychologists and those studying or practicing music therapy.

Correctional Counseling David Lester, Michael Braswell, 1987. **Correctional Counseling & Rehabilitation** Patricia Van Voorhis, 2000. New Frontiers in Offender Treatment Elizabeth L. Jeglic, Cynthia Calkins, 2018-11-16. This book reviews how new and promising evidence-based interventions are being used with those involved in the criminal justice system. While there has been an increased emphasis on evidence-based practice within forensic treatment, there remains a disjoint between what we know works and adapting these interventions to those involved in the criminal justice system. This book seeks to bridge that gap by providing an overview of what we know works and how that information has been translated into offender treatment. In addition, it highlights avenues where additional research is needed. This book is comprised of three parts. In the first part, current models of correctional treatment, including the Risk Needs Responsivity Model, The Good Lives Model, and Cognitive Behavioral Models, are presented. In the second part, the chapters address clinical issues such as the therapeutic alliance, clinician factors, and diversity-related issues that impact

treatment outcome In the third and final part of the book adaptations of innovative and cutting edge evidence based treatments such as Dialectical Behavior Therapy Trauma Informed Care Mindfulness Motivational Interviewing Assertive Community Treatment Multisystemic Treatment New frontiers in Intimate Partner Violence treatment and the current research on the treatment of those with psychopathy are presented Research supporting these treatment approaches targeting areas such as self management psychological well being treatment engagement and retention and their relationship to recidivism will be reviewed while their adaptation for use with forensic populations is discussed The book concludes with the editors summary of the findings and a discussion of the future of evidence based interventions within the field of forensic psychology
