Bird,2018-03-30 This book draws on experiences in developing countries to bridge the gap between the conventional textbook treatment of fiscal decentralization and the actual practice of subnational government finance The extensive literature about the theory and practice is surveyed and longstanding problems and new questions are addressed It focuses on the key choices that must be made in decentralizing on how economic and political factors shape the choices that countries make and on how by paying more attention to the need for a more comprehensive approach and the critical connections between different components of decentralization reform everyone involved might get more for their money

The Politics of Economic Reform in South Korea Tat Yan Kong,2013-10-11 One of the most comprehensive texts on the political economy of Korea available Up to date goes up to 1999 **Korea's Political Economy** Lee-Jay Cho,2019-03-07 Over the past three decades South Korea has moved along a path of strong economic growth and political democratization attracting worldwide attention and providing valuable lessons for other developing economies Yet Korea still must grapple with many intractable problems fueled by its rapid industrialization and uneven growth including unbalanced distribution of wealth concentrated economic power and adversarial relationships between management and labor Within the context of these sweeping changes this volume explores options for economic and social institutional reform in Korea Drawing on models of economic development from Japan the United States and Europe a distinguished group of Asian and Western scholars relates the experiences of previously industrialized economies to each facet of Koreas economic system including national management taxation and banking land ownership and use trade and industrial strategy and relations among business ownership management and labor In so doing the contributors provide valuable insights and fresh proposals for a viable model of social and economic modernization Throughout the volume the contributors emphasize the importance of Koreas cultural heritage not only in explaining the nations recent growth but also as a key element of its continued success

By providing an overview of the evolution and interaction of Korean economic political and sociocultural institutions the contributors make clear how these structures mediate the movement between cultural values and economic progress

Korean Political and Economic Development Jongryn Mo, Barry Weingast, 2020-10-26 How do poor nations become rich industrialized and democratic And what role does democracy play in this transition To address these questions Jongryn Mo and Barry R Weingast study South Korea's remarkable transformation since 1960 The authors concentrate on three critical turning points Park Chung Hee's creation of the development state beginning in the early 1960s democratization in 1987 and the genesis of and reaction to the 1997 economic crisis At each turning point Korea took a significant step toward creating an open access social order The dynamics of this transition hinge on the inclusion of a wide array of citizens rather than just a narrow elite in economic and political activities and organizations The political economy systems that followed each of the first two turning points lacked balance in the degree of political and economic openness and did not last The Korean experience therefore suggests that a society lacking balance cannot sustain development Korean Political and Economic Development offers a new view of how Korea was able to maintain a pro development state with sustained growth by resolving repeated crises in favor of rebalancing and greater political and economic openness *The Political Economy of Fiscal Policy* Miguel Urrutia, Shin'ichi Ichimura, Setsuko Yukawa, 1989 The book represents an attempt to test the applicability of this hypothesis through a comparative study of the fiscal policy and decision making process of six countries that taken together represent a broad range of political and bureaucratic systems *The Changing Role of the Korean State* Hong Yung Lee, Sunil Kim, 2016-10-20 How and why has the Korean state changed its way of handling the society and its markets over the past two decades The Changing Role of the Korean State finds that the explosion of contentious civil society after democratization coeval with the outbreak of the financial crisis following rapid economic growth are closely associated with the decline of developmentalism Despite these profound changes however the Korean state has not totally relinquished its control over the society and the market Rather although its methods have been altered it remains to be highly interventionist and regulatory in nature The state continues to use its influence to restructure the socio economic system and rationally manage spatial arrangements The book amply demonstrates the residual legacy of the developmental state in Korea and it is unlikely that Korea will ever accept the western liberalist concept of a state which limits its function to that of a referee for the spontaneous operation of the civil society and the market The contributors of this edited volume delineate the shifting role of the Korean state from the developmental state which led economic development by guiding investment in strategic industries through various means to a slightly subtler role as a regulator supervising the operation of the market in the changing economic environment Individual chapters presented here address this changing but nonetheless vital role that the state plays in managing the variety of modern socio economic life in South Korea Hong Yung Lee is Professor Emeritus of Political Science at University of California Berkeley Sunil Kim is Assistant Professor of International Studies at Kyung Hee

University **Anarchist Modernity** Sho Konishi, 2020-05-11 Mid nineteenth century Russian radicals who witnessed the Meiji Restoration saw it as the most sweeping revolution in recent history and the impetus for future global progress Acting outside imperial encounters they initiated underground transnational networks with Japan Prominent intellectuals and cultural figures from Peter Kropotkin and Lev Tolstoy to Saigo Takamori and Tokutomi Roka pursued these unofficial relationships through correspondence travel and networking despite diplomatic and military conflicts between their respective nations Tracing these non state networks *Anarchist Modernity* uncovers a major current in Japanese intellectual and cultural life between 1860 and 1930 that might be described as cooperatist anarchist modernity a commitment to realizing a modern society through mutual aid and voluntary activity without the intervention of state governance These efforts later crystallized into such movements as the Nonwar Movement Esperantism and the popularization of the natural sciences Examining cooperatist anarchism as an intellectual foundation of modern Japan Sho Konishi offers a new approach to Japanese history that fundamentally challenges the logic of Western modernity It looks beyond this foundational construct of modern history writing to understand people practices and cultural expressions that have been forgotten or dismissed as products of anti modern nativist counter urges against the West *Public Spheres, Private Lives in Modern Japan, 1600-1950* Gail Bernstein, Andrew Gordon, Kate Wildman Nakai, 2020-03-17 The eleven chapters in this volume explore the process of carving out in discourse and in practice the boundaries delineating the state the civil sphere and the family in Japan from 1600 to 1950 One of the central themes in the volume is the demarcation of relations between the central political authorities and local communities The early modern period in Japan is marked by a growing sense of a unified national society with a long common history that existed in a coherent space The growth of this national community inevitably raised questions about relationships between the imperial government and local groups and interests at the prefectural and village levels Moves to demarcate divisions between central and local rule in the course of constructing a modern nation contributed to a public discourse that drew on longstanding assumptions about political legitimacy authority and responsibility as well as on Western political ideas *A Sense of Place* David Spafford, 2020-05-11 *A Sense of Place* examines the vast Kant region as a locus of cultural identity and an object of familial attachment during the political and military turmoil of the late fifteenth and early sixteenth centuries in Japan Through analysis of memoirs letters chronicles poetry travelogues lawsuits land registers and archeological reports David Spafford explores the relationships of the eastern elites to the space they inhabited he considers the region both as a whole in its literary representations and political and administrative dimensions and as an aggregation of discrete locales where struggles over land rights played out alongside debates about the meaning of ties between families and their holdings Spafford also provides the first historical account in English of medieval castle building and the castellan revolution of the late fifteenth century which militarized the countryside and radically transformed the exercise of authority over territory Simultaneously the book reinforces a sense of the eastern

elite s anxieties and priorities detailing how in their relation to land and place local elites displayed a preference for past precedent and inherited wisdom Even amidst the changes wrought by war this inclination although quite at odds with their conventional reputation for ruthless pragmatism and forward thinking prevailed

Neo-Confucianism in History Peter K. Bol, 2020-03-17 Where does Neo Confucianism a movement that from the twelfth to the seventeenth centuries profoundly influenced the way people understood the world and responded to it fit into our story of China s history This interpretive at times polemical inquiry into the Neo Confucian engagement with the literati as the social and political elite local society and the imperial state during the Song Yuan and Ming dynasties is also a reflection on the role of the middle period in China s history The book argues that as Neo Confucians put their philosophy of learning into practice in local society they justified a new social ideal in which society at the local level was led by the literati with state recognition and support The later imperial order in which the state accepted local elite leadership as necessary to its own existence survived even after Neo Confucianism lost its hold on the center of intellectual culture in the seventeenth century but continued as the foundation of local education It is the contention of this book that Neo Confucianism made that order possible

Experimental Arts in Postwar Japan Miryam Sas, 2020-03-17 In the years of rapid economic growth following the protest movements of the 1960s artists and intellectuals in Japan searched for a means of direct impact on the whirlwind of historical and cultural transformations of their time Yet while the artists often called for such direct encounter their works complicate this ideal with practices of interruption self reflexive mimesis and temporal discontinuity In an era known for idealism and activism some of the most cherished ideals intimacy between subjects authenticity a sense of home are limitlessly desired yet always just out of reach In this book Miryam Sas explores the theoretical and cultural implications of experimental arts in a range of media Casting light on important moments in the arts from the 1960s to the early 1980s this study focuses first on underground post shingeki theater and then on related works of experimental film and video buto dance and photography Emphasizing the complex and sophisticated theoretical grounding of these artists through their works practices and writings this book also locates Japanese experimental arts in an extensive sustained dialogue with key issues of contemporary critical theory

A Time of Crisis Kerry Douglas Smith, 2001 This study of Japan s transformation by the economic crises of the 1930s focuses on efforts to overcome the effects of the Great Depression in rural areas particularly the activities of local activists and Tokyo policymakers Smith sheds light on how average Japanese responded to problems of modernization and how they re created the countryside

Shredding the Tapestry of Meaning John Solt, 2020-03-23 Kitasono Katue was a leading avant garde literary figure first in Japan and then throughout the world from the 1920s to the 1970s In his long career Kitasono was instrumental in creating Japanese language work influenced by futurism dadaism and surrealism before World War II and in contributing a Japanese voice to the international avant garde movement after the war This critical biography of Kitasono examines the life poetry and poetics of this controversial and flamboyant figure including his wartime

support of the Japanese state Using Kitasono as a window on Japanese literature in the twentieth century John Solt analyzes the relationship of Japanese writers to foreign literary movements and the influence of Japanese writers on world literature

Government by Mourning Atsuko Hirai, 2020-03-17 From the early seventeenth to the mid nineteenth century the Tokugawa shogunate enacted and enforced myriad laws and ordinances to control nearly every aspect of Japanese life including observance of a person's death In particular the shoguns Tsunayoshi and Yoshimune issued strict decrees on mourning and abstention that dictated compliance throughout the land and survived the political upheaval of the Meiji Restoration to persist well into the twentieth century Atsuko Hirai reveals the pivotal relationship between these shogunal edicts and the legitimacy of Tokugawa rule By highlighting the role of narimono chojirei injunctions against playing musical instruments within their broader context she shows how this class of legislation played an important integrative part in Japanese society not only through its comprehensive implementation especially for national mourning of major political figures but also by its codification of the religious beliefs and customs that the Japanese people had cherished for innumerable generations *Fishing Wars and Environmental Change in Late Imperial and Modern China* Micah S.

Muscolino, 2020-03-17 Among the environmental challenges facing us is alleviating the damage to marine ecosystems caused by pollution and overfishing Coming to grips with contemporary problems this book argues depends on understanding how people have historically generated perceived and responded to environmental change This work explores interactions between society and environment in China's most important marine fishery the Zhoushan Archipelago off the coast of Zhejiang and Jiangsu from its nineteenth century expansion to the exhaustion of the most important fish species in the 1970s This history of Zhoushan's fisheries illuminates long term environmental processes and analyzes the intersections of local regional and transnational ecological trends and the array of private and state interests that shaped struggles for the control of these common pool natural resources What institutions did private and state actors use to regulate the use of the fishery How did relationships between social organizations and the state change over time What types of problems could these arrangements solve and which not What does the fate of these institutions tell us about environmental change in late imperial and modern China Answering these questions will give us a better understanding of the relationship between past ecological changes and present environmental challenges **Detective Fiction and the Rise of the Japanese Novel, 1880-1930**

Satoru Saito, 2020-03-17 In *Detective Fiction and the Rise of the Japanese Novel* Satoru Saito sheds light on the deep structural and conceptual similarities between detective fiction and the novel in prewar Japan Arguing that the interactions between the two genres were not marginal occurrences but instead critical moments of literary engagement Saito demonstrates how detective fiction provided Japanese authors with the necessary frameworks through which to examine and critique the nature and implications of Japan's literary formations and its modernizing society Through a series of close readings of literary texts by canonical writers of Japanese literature and detective fiction including Tsubouchi Shoyo Natsume

Soseki Shimazaki Toson Sato Haruo Kuroiwa Ruiko and Edogawa Ranpo Saito explores how the detective story functioned to mediate the tenuous relationships between literature and society as well as between subject and authority that made literary texts significant as political acts By foregrounding the often implicit and contradictory strategies of literary texts choice of narrative forms symbolic mappings and intertextual evocations among others this study examines in detail the intricate interactions between detective fiction and the novel that shaped the development of modern Japanese literature

Two-Timing Modernity Keith J. Vincent, 2020-05-11 Until the late nineteenth century Japan could boast of an elaborate cultural tradition surrounding the love and desire that men felt for other men By the first years of the twentieth century however as heterosexuality became associated with an enlightened modernity love between men was increasingly branded as feudal or immature The resulting rupture in what has been called the male homosocial continuum constitutes one of the most significant markers of Japan's entrance into modernity And yet just as early Japanese modernity often seemed haunted by remnants of the premodern past the nation's newly heteronormative culture was unable and perhaps unwilling to expunge completely the recent memory of a male homosocial past now read as perverse *Two Timing Modernity* integrates queer feminist and narratological approaches to show how key works by Japanese male authors Mori gai Natsume S seki Hamao Shir and Mishima Yukio encompassed both a straight future and a queer past by employing new narrative techniques to stage tensions between two forms of temporality the forward looking time of modernization and normative development and the perverse time of nostalgia recursion and repetition

Hiraizumi Mimi Hall Yiengpruksawan, 2020-03-31 In the twelfth century along the borders of the Japanese state in northern Honshu three generations of local rulers built a capital city at Hiraizumi that became a major military and commercial center Known as the Hiraizumi Fujiwara these rulers created a city filled with art in an attempt to use the power of art and architecture to claim a religious and political mandate In the first book length study of Hiraizumi in English the author studies the rise of the Hiraizumi Fujiwara and analyzes their remarkable construction program She traces the strategies by which the Hiraizumi Fujiwara attempted to legitimate their rule and grounds the splendor of Hiraizumi in the desires political and personal of the men and women who sponsored and displayed that art

A Continuous Revolution Barbara Mittler, 2020-03-17 Cultural Revolution Culture often denigrated as nothing but propaganda was liked not only in its heyday but continues to be enjoyed today *A Continuous Revolution* sets out to explain its legacy By considering Cultural Revolution propaganda art music stage works prints and posters comics and literature from the point of view of its *longue dur e* Barbara Mittler suggests it was able to build on a tradition of earlier art works and this allowed for its sedimentation in cultural memory and its proliferation in contemporary China Taking the aesthetic experience of the Cultural Revolution 1966 1976 as her base Mittler juxtaposes close readings and analyses of cultural products from the period with impressions given in a series of personal interviews conducted in the early 2000s with Chinese from diverse class and generational backgrounds By including much testimony from these original voices Mittler illustrates the extremely

multifaceted and contradictory nature of the Cultural Revolution both in terms of artistic production and of its cultural experience
