Alpen,1997-10-22 This newly revised and updated edition of Radiation Biophysics provides an in depth description of the physics and chemistry of radiation and its effects on biological systems Coverage begins with fundamental concepts of the physics of radiation and radioactivity then progresses through the chemistry and biology of the interaction of radiation with living systems The Second Edition of this highly praised text includes major revisions which reflect the rapid advances in the field New material covers recent developments in the fields of carcinogenesis DNA repair molecular genetics and the molecular biology of oncogenes and tumor suppressor genes The book also includes extensive discussion of the practical impact of radiation on everyday life Covers the fundamentals of radiation physics in a manner that is understandable to students and professionals with a limited physics background Includes problem sets and exercises to aid both teachers and students Discusses radioactivity internally deposited radionuclides and dosimetry Analyzes the risks for occupational and non occupational workers exposed to radiation sources

Radiation Biophysics (ionizing Radiations) I U rii Borisovich

Kudri a shov,2008 The book is concerned with features analysis of radiation damage to living matter at different levels of its organisation beginning from the molecular level The general theory of the mechanisms of biological action of radiation based on four logically connected principles of radiation biology is presented for the first time The book contains abundant material on primary and secondary processes of the response of living systems to radiation the mechanisms of direct and indirect action of radiation through radiolysis of water and lipids a detailed consideration of the theory of targets DNA and biological membranes and the problems of high and low dose irradiation in the context of present day The systemic response of the cell

to irradiation oxidative stress endogenous background radioresistance damage and repair of biological membranes and DNA systemic protection against radiation is approximated Presentation of these important problems is preceded by an up to date evaluation of some aspects regarding dosimetry of ionising radiation *Technical Books & Monographs* United States. Troshin,2013-09-17 Modern Trends in Physiological Science Volume 26 Problem of Cell Permeability covers expounded sorptional theory of cell permeability The problem of cell permeability deals with the questions connected with the laws of the entrance of substances from the surrounding medium into cells and the excretion from the latter of the products of intracellular metabolism This book is composed of 12 chapters and begins with an overview of the chemical composition and structure of cell membrane as well as the membrane theory of cell permeability The next chapters treat the issues of cell's osmometric activity and the physico-chemical properties of protoplasm as a system of coacervates Considerable chapters are devoted to cell permeability for various substrates such as non electrolytes organic acids vital dyes and mineral substances The concluding chapters discuss the relationship between metabolism and cell permeability the bioelectric properties of cell and the protective action of non electrolytes against live matter damage caused by dilute saline media This book will be of value to cell biologists biochemists and research workers in cell permeability **Nuclear Science Abstracts** ,1975 **Selected Topics in DNA Repair** Clark Chen,2011-10-26 This book is intended for students and scientists working in the field of DNA repair focusing on a number of topics ranging from DNA damaging agents and mechanistic insights to methods in DNA repair and insights into therapeutic strategies These topics demonstrate how scientific ideas are developed tested dialogued and matured as it is meant to discuss key concepts in DNA repair The book should serve as a supplementary text in courses and seminars as well as a general reference for biologists with an interest in DNA repair World List of Serials in Agricultural Biotechnology Robert D. Warmbrodt,Diana Airozo,1993 **Biological Effects of Radiations** Daniel Grosch,2012-12-02 Biological Effects of Radiation Second Edition aims to present an organized survey of the various experiments wherein living materials have been exposed to ionizing and exciting types of radiations However this book focuses on the effects of radiation to lower organisms as these have received less attention It tells how small amount of energy can damage submicroscopic structure and ultimately alter the appearance and abilities of such organisms Divided into five parts this book starts off with two introductory chapters in the first part It explains the effects of radiation Then other parts of the book focus on the impact of

radiation from cellular to organ level How the lower organisms response is then discussed Lastly the book explains the interrelations between organisms in contaminated areas Same with the first edition emphasis is given on the consequences of mutations as a whole chapter is devoted to this topic Furthermore this book covers discoveries from experiments with cultured cells This book is a good text reference for students and professionals Also it can be of great help to scientists researchers and specialists involved in the biological response to radiation **Ionizing Radiations** Quartermaster Food and Container Institute for the Armed Forces (U.S.),1954 Cancer Chemotherapy Reports ,1974 **Ionizing Radiations; Their Production, Effects, and Utilization** Quartermaster Food and Container Institute for the Armed Forces (U.S.),1954
