Radical Education A Critique Of Freeschooling And Deschooling:

Radical Education Robin Barrow, 2011 This volume is a comprehensive critique of the radical tradition in educational theory It traces the development of the key ideas in radical literature from Rousseau to the present day Two opening chapters set Rousseau's educational views and arguments in their political perspective and subject them to an extended critical treatment Subsequent chapters provide detailed analyses and examination of the ideas of A S Neill Paul Goodman Ivan Illich and Everett Reimer Charles Weingartner and Neil Postman Each author is treated separately but certain common themes and ideas are extracted and considered without reference to any particular author Amongst others the concepts of nature learning hidden curriculum and the relativity of knowledge are examined at the same time broader arguments about the degree and nature of freedom that should be provided to children deschooling and assessment are pursued **Free Schools, Free People** Ron Miller, 2002-07-18 The first historical account of the free school movement of the 1960s

Social Theory and Education Raymond Allen Morrow, Carlos Alberto Torres, 1995-03-09 This book summarizes the body of knowledge about sociology of education and cultural studies as it informs educational research and critical pedagogy It synthesizes the most relevant work in social and cultural reproduction published in the last three decades in English French German Spanish and Portuguese The authors document and critique the theoretical discussion in developments in both advanced societies and peripheral ones and link macro sociological issues with social psychological ones The book introduces theories of the state to underscore a political sociology of education and highlights an agenda for theory building research and practice in sociology of education **Political Economy** Barry Clark, 2016-03-21 This nontechnical book provides a comprehensive and interdisciplinary survey of political economy that can easily be understood by any reader with an introductory level background in economics As 21st century political debate becomes polarized across ideological lines students and citizens need to understand the underlying values on which contending arguments are based The current political gridlock calls for a deeper appreciation of the competing perspectives in political economy Now revamped for a third edition Political Economy A Comparative Approach supplies a truly interdisciplinary examination of the development and evolution of political economy from the Enlightenment onward drawing material from the realms of political theory sociology philosophy and history as well as from economics to present detailed comparisons of competing perspectives on a variety of current issues The book begins with an introduction to political economy that provides readers with an overview of the historical development of the discipline followed by in depth analyses of four ideological perspectives in political economy Classical Liberalism Radicalism Conservatism and Modern Liberalism The author then applies each of the four ideological perspectives to a range of contemporary issues such as the role of government economic instability poverty labor relations discrimination education culture the environment and international trade Readers will gain insight into the methods and practice of political economics as well as better understand the history of political economic thought and the effects of

historical processes European industrialization for example on modern debates **Education in a Free Society** S. Alexander Rippa,1988 **Non-Formal Education** Alan Rogers,2007-03-06 The Comparative Education Research Centre CERC at the University of Hong Kong is proud and privileged to present this book in its series CERC Studies in Comparative Education Alan Rogers is a distinguished figure in the field of non formal education and brings to this volume more than three decades of experience The book is a masterly account which will be seen as a milestone in the literature It is based on the one hand on an exhaustive review of the literature and on the other hand on extensive practical experience in all parts of the world It is a truly comparative work which fits admirably into the series Much of the thrust of Rogers work is an analysis not only of the significance of non formal education but also of the reasons for changing fashions in the development community Confronting a major question at the outset Rogers ask why the terminology of non formal education which was so much in vogue in the 1970s and 1980s practically disappeared from the mainstream discourse in the 1990s and initial years of the present century Much of the book is therefore about paradigms in the domain of development studies and about the ways that fashions may gloss over substance **Trends in Education** ,1978 **Teaching for Commitment** Elmer John Thiessen,1993 Elmer Thiessen provides a comprehensive critical survey of the debate concerning indoctrination especially in the context of confessional religious education His central aim is to establish that indoctrination as a result of religious instruction is neither inevitable nor as probable as is often assumed by advocates of liberal education Thiessen recognizes that indoctrination can occur in Christian homes and schools He believes however that before the charge of indoctrination can be correctly evaluated we need to develop a more coherent concept of the term He provides a critical examination of the four criteria traditionally associated with indoctrination content method intention and consequences and of the institutional context of indoctrination **The Palgrave Handbook of Educational Thinkers** Brett A. Geier,2024-08-21 This handbook presents a durable comprehensive and up to date resource covering the seminal thinkers in education of past and present Each entry will capture the professional background of a legendary thinker and presents their key insights new thinking and major legacies to the field of education Carefully brought together to present a balance of gender and geographical contexts as well as areas of thought and work in the broad field of education this handbook provides a unique history and overview of figures who have shaped education and educational thinking throughout the world **Routledge Library Editions: Philosophy of Education** Various Authors,2022-07-30 This set of 21 volumes originally published between 1955 and 1997 amalgamates several topics on the philosophy of education with a particular focus on religious education curriculum studies and critical thinking This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject and will be of particular interest to students of philosophy education and those undertaking teaching qualifications The New World of Educational Thought Frank A.
