Radical Ecology in the Face of the Anthropocene Extinction John A. Smith, Anna Wilson, 2024-06-14 This book has two interlocking ambitions The first is to steer what we purposefully call the idioms of critical philosophy towards a more ecologically informed paradigm The second is to recognise that what has rightly come to be called The Anthropocene extinction is not and cannot be treated as simply a scientific fact but rather a socio political and ecological dispute of immense complexity We start with an exploration of the consequences of a critical tradition which under the name Enlightenment has placed humanity at its centre and chance as its most general and problematic characteristic We argue that this leads to a schizophrenic relationship between radical critique and science which can be avoided if we take the implications of biosemiotics seriously and develop a new ecologically informed social science We argue that in practice this means that for science to be practical in addressing the Anthropocene extinction we have to recognise that it operates in a historically emergent highly differentiated technopolitical ecology Science as it is currently commonly understood and used is not ecological enough This book will interest social scientists interested in not only describing and critiquing but also understanding and responding to the complex problems facing humanity scientists wanting to make sense of social phenomena those educating the next generation of social scientists and climate activists and policy makers

Hailwood, 2014-12-18 It is often claimed by environmental philosophers and green political theorists that liberalism the dominant tradition of western political philosophy is too focused on the interests of human individuals to give due weight to the environment for its own sake In *How to be a Green Liberal* Simon Hailwood challenges this view and argues that liberalism can embrace a genuinely green non instrumental view of nature The book s central claim is that nature s otherness its being constituted of independent entities and processes that do not reflect our purposes is a basis for value and can be incorporated within liberal political philosophy as a fundamental commitment alongside human freedom and equality Hailwood argues that the conceptual resources already exist within mainstream liberalism for a thoroughly non instrumental perspective Adopting a rigorous philosophical approach Hailwood tackles a wide range of themes across environmental ethics including holistic theories deep ecology eco feminism and eco anarchism as well as issues in value theory and political philosophy more generally In making the case for liberalism s green credentials *How to be a Green Liberal* is a formidable challenge to recent green political theory and will be required reading not only for students of political philosophy but for all those interested in the natural world and man s relationship to it
