*Radio Active* Kathleen M. Newman, 2004-05-17 Publisher Description      **Adman's Dilemma** Paul Rutherford, 2018-01-01 The Adman's Dilemma is a cultural biography that explores the rise and fall of the advertising man as a figure who became effectively a licensed deceiver in the process of governing the lives of American consumers Apparently this personage was caught up in a contradiction both compelled to deceive yet supposed to tell the truth It was this moral condition and its consequences that made the adman so interesting to critics novelists and eventually filmmakers The biography tracks his saga from its origins in the exaggerated doings of P T Barnum the emergence of a new profession in the 1920s the heyday of the adman's influence during the post WW2 era the later rebranding of the adman as artist until the apparent demise of the figure symbolized by the triumph of that consummate huckster Donald Trump In The Adman's Dilemma author Paul Rutherford explores how people inside and outside the advertising industry have understood the conflict between artifice and authenticity The book employs a range of fictional and nonfictional sources including memoirs novels movies TV shows websites and museum exhibits to suggest how the adman embodied some of the strange realities of modernity      **Sound in the Age of Mechanical Reproduction** David Suisman, Susan Strasser, 2011-10-11 During the twentieth century sound underwent a dramatic transformation as new technologies and social practices challenged conventional aural experience As a result sound functioned as a means to exert social cultural and political power in unprecedented and unexpected ways The fleeting nature of sound has long made it a difficult topic for historical study but innovative scholars have recently begun to analyze the sonic traces of the past using innovative approaches Sound in the Age of Mechanical Reproduction investigates sound as part of the social construction of historical experience and as an element of the sensory relationship people have to the world showing how hearing and listening can inform people's feelings ideas decisions and actions The essays in Sound in the Age of Mechanical Reproduction uncover the varying dimensions of sound in twentieth century history Together they connect a host of disparate concerns from issues of gender and technology to contests over intellectual property and government regulation Topics covered range from debates over listening practices and good citizenship in the 1930s to Tokyo Rose and Axis radio propaganda during World War II to CB radio culture on the freeways of Los Angeles in the 1970s These and other studies reveal the contingent nature of aural experience and demonstrate how a better grasp of the culture of sound can enhance our understanding of the past      **Profit Margins** Jeremy Groskopf, 2021-12-07 Between the advent of print advertising and the dawn of radio came cinema ads These ads aimed at a captive theater audience became a symbol of the developing binary between upper class film consumption and more consumerist media In Profit Margins Jeremy Groskopf examines how the ad industry jockeyed for direct advertisement space in American motion pictures In fact advertisers who recognized the import of film audiences fought exhibitors over what audiences expected in a theater outing Looking back at these debates in four case studies Groskopf reveals that advertising

became a marker of class distinctions in the cinema experience as the film industry pushed out advertisers in order to create a space free of ads By restricting advertising especially during the rise of high class palatial theaters the film industry continued its ongoing effort to ascend the cultural hierarchy of the arts An important read for film studies and the history of marketing Profit Margins exposes the fascinating truth surrounding the invention of cinema advertising techniques and the resulting rhetoric of class division

**The Listener's Voice** Elena Razlogova, 2012-10-15 During the Jazz Age and Great Depression radio broadcasters did not conjure their listening public with a throw of a switch the public had a hand in its own making The Listener's Voice describes how a diverse array of Americans boxing fans radio amateurs down and out laborers small town housewives black government clerks and Mexican farmers participated in the formation of American radio its genres and its operations Before the advent of sophisticated marketing research radio producers largely relied on listeners phone calls telegrams and letters to understand their audiences Mining this rich archive historian Elena Razlogova meticulously recreates the world of fans who undermined centralized broadcasting at each creative turn in radio history Radio outlaws from the earliest squatter stations and radio tube bootleggers to postwar payola hungry rhythm and blues DJs provided a crucial source of innovation for the medium Engineers bent patent regulations Network writers negotiated with devotees Program managers invited high school students to spin records Taken together these and other practices embodied a participatory ethic that listeners articulated when they confronted national corporate networks and the formulaic ratings system that developed Using radio as a lens to examine a moral economy that Americans have imagined for their nation The Listener's Voice demonstrates that tenets of cooperation and reciprocity embedded in today's free software open access and filesharing activities apply to earlier instances of cultural production in American history especially at times when new media have emerged

**We Boys Together** Jeffery P. Dennis, 2007. Teenage boys are wild about girls. When their hormones kick in at puberty, they can think of nothing else, and that's the way it has always been, right? Wrong. Before World War II, only sissies liked girls. Masculine, red-blooded American boys were supposed to ignore girls until they were 18 or 19. Instead, parents, teachers, psychiatrists, and especially the mass media encouraged them to form passionate, intense romantic bonds with each other. This book explores romantic relationships between teenage boys as they were portrayed before, during, and immediately after World War II. The author takes the reader through a rich landscape of media: sci-fi pulps, comics, adventure stories, tales of teen sleuths, boys' serial novels, wartime bestsellers, and movies populated by many types of male adolescents. Boys Next Door, Adventure Boys, Jungle Boys, and Lost Boys. In Hollywood movies, Boys Next Door like Jackie Cooper, Ronald Sinclair, and Jimmy Lydon were constantly falling in love, but not with girls. In serial novels, Jungle Boys like Bomba Sorak and Og Son of Fire swung through the trees to rescue teenage boys, not teenage girls. In comic strips and on the radio, Adventure Boys like Don Study, Jack Armstrong, and Tim Tyler formed lasting romantic partnerships with other boys or men. Lost Boys like Frankie Darro, Leo Gorcey, and Billy Halop starred in dozens of movies about pairs of poor urban teenagers sticking together with never a girl in sight.

**Public Interests** Allison Perlman, 2016-05-01. Winner of the 2017 Outstanding Book Award from the Popular Communication Division of the International Communication Association (ICA). Nearly as soon as television began to enter American homes in the late 1940s, social activists recognized that it was a powerful tool for shaping the nation's views. By targeting broadcast regulations and laws, both liberal and conservative activist groups have sought to influence what America sees on the small screen. Public Interests describes the impressive battles that these media activists fought and charts how they tried to change the face of American television. Allison Perlman looks behind the scenes to track the strategies employed by several key groups of media reformers: from civil rights organizations like the NAACP to conservative groups like the Parents Television Council. While some of these campaigns were designed to improve the representation of certain marginalized groups in television programming, as Perlman reveals, they all strove for more systemic reforms: from early efforts to create educational channels to more recent attempts to preserve a space for Spanish language broadcasting. Public Interests fills in a key piece of the history of American social reform movements, revealing pressure groups' deep investments in influencing both television programming and broadcasting policy. Vividly illustrating the resilience, flexibility, and diversity of media activist campaigns from the 1950s onward, the book offers valuable lessons that can be applied to current battles over the airwaves.

**The Synchronized Society** Randall Patnode, 2023-03-17. The Synchronized Society traces the history of the synchronous broadcast experience of the twentieth century and the transition to the asynchronous

media that dominate today Broadcasting grew out of the latent desire by nineteenth century industrialists political thinkers and social reformers to tame an unruly society by controlling how people used their time The idea manifested itself in the form of the broadcast schedule a managed flow of information and entertainment that required audiences to be in a particular place usually the home at a particular time and helped to create water cooler moments as audiences reflected on their shared media texts Audiences began disconnecting from the broadcast schedule at the end of the twentieth century but promoters of social media and television services still kept audiences under control replacing the schedule with surveillance of media use Author Randall Patnode offers compelling new insights into the intermingled roles of broadcasting and industrial post industrial work and how Americans spend their time

Critical Rhetorics of Race Kent A. Ono, 2011-07-11 According to many pundits and cultural commentators the U S is enjoying a post racial age thanks in part to Barack Obama s rise to the presidency This high gloss of optimism fails however to recognize that racism remains ever present and alive spread by channels of media and circulated even in colloquial speech in ways that can be difficult to analyze In this groundbreaking collection edited by Michael G Lacy and Kent A Ono scholars seek to examine this complicated and contradictory terrain while moving the field of communication in a more intellectually productive direction An outstanding group of contributors from a range of academic backgrounds challenges traditional definitions and applications of rhetoric From the troubling media representations of black looters after Hurricane Katrina and rhetoric in news coverage about the Columbine and Virginia Tech massacres to cinematic representations of race in Crash Blood Diamond and Quentin Tarantino s films these essays reveal complex intersections and constructions of racialized bodies and discourses critiquing race in innovative and exciting ways Critical Rhetorics of Race seeks not only to understand and navigate a world fraught with racism but to change it one word at a time
