V. Zheleznyakov,2013-09-03 International Series of Monographs in Natural Philosophy Volume 25 Radio Emission of the Sun and Planets presents the origin of the radio emission of the planets This book examines the outstanding triumphs achieved by radio astronomy of the solar system Comprised of 10 chapters this volume begins with an overview of the physical conditions in the upper layers of the Sun the Moon and the planets This text then examines the three characteristics of radio emission namely the frequency spectrum the polarization and the angular spectrum Other chapters consider the measurements of the intensity of the solar radio emission which indicate the existence of a lower limit This book discusses as well the complex phenomena of the sporadic solar radio emission The final chapter deals with the theory of the radio emission of Venus This monograph is a valuable resource for radio astronomers and astrophysicists who are interested in the state of investigations

in galactic radio astronomy The Exoplanet Handbook Michael Perryman, 2018-08-30 With the discovery of planets beyond our solar system 25 years ago exoplanet research has expanded dramatically with new state of the art ground based and space based missions dedicated to their discovery and characterisation With more than 3 500 exoplanets now known the complexity of the discovery techniques observations and physical characterisation have grown exponentially This Handbook ties all these avenues of research together across a broad range of exoplanet science Planet formation exoplanet interiors and atmospheres and habitability are discussed providing in depth coverage of our knowledge to date Comprehensively updated from the first edition it includes instrumental and observational developments in depth treatment of the new Kepler mission results and hot Jupiter atmospheric studies and major updates on models of exoplanet formation With extensive references to the research literature and appendices covering all individual exoplanet discoveries it is a valuable reference to this exciting field for both incoming and established researchers **Exoplanets: Compositions, Mineralogy, Evolution**

Natalie R. Hinkel, Keith D. Putirka, Siyi Xu, 2024-09-02 The focus for RiMG volume 90 is on rocky exoplanets because the search for truly Earth like planets is of special interest The goal is to motivate communication between the disciplines so as to make the best use possible of existing data and data yet to be collected by the James Webb and the Nancy Grace Roman Space Telescopes since the astronomy community is gathering data on stars and exoplanets at an accelerating rate Such data now include exoplanet size and mass i e density as well as their atmospheric compositions which are collectively telltale of mineralogy and evolution Much of what is published may still fall in the realm of educated speculation but our conjectures are metamorphosing into testable hypotheses There is now a remarkably large amount of astronomical data with even more on the way that geochemists and petrologists can make much use of But just as astronomers may benefit from geologic insights geologists need our colleagues in astronomy to help interpret their data and their underlying implications to better understand its astronomical context Our hopes for this volume will be fulfilled if readers initiate their own analyses of what at present may seem like novel or unusual data and if new collaborations between academic departments and subfields are forged **Encyclopedia of Radio 3-Volume Set** Christopher H. Sterling, 2004-03 Produced in association with the

Museum of Broadcast Communications in Chicago the Encyclopedia of Radio includes more than 600 entries covering major countries and regions of the world as well as specific programs and people networks and organizations regulation and policies audience research and radio s technology This encyclopedic work will be the first broadly conceived reference source on a medium that is now nearly eighty years old with essays that provide essential information on the subject as well as comment on the significance of the particular person organization or topic being examined
