Radioisotope Laboratory Techniques Ronald Arthur Faires, Bertram Hasloch Parks, 1958 Radioisotope Experiments in High School Biology Evelyn M. Hurlburt, 1966 **Methods of Animal Experimentation** William I. Gay, 2013-09-12 Methods of Animal Experimentation Volume II provides information on the most common methods for using animals as tools in the search for new biological knowledge The techniques described will facilitate the most efficient use of research animals and provide guidelines for their utmost comfort and welfare The text is arranged according to specific research methods rather than to organ system or disease category This approach gives the reader a broad view of the techniques involved in specific fields and describes the range of usefulness of these techniques. The chapters in the present volume deal with special techniques which have been demonstrated to be distinct useful methods for using laboratory animals as a basic biomedical research tool The descriptions of both fundamental and well developed techniques of animal experimentation in various research fields should be useful to graduate students and experienced scientists who must consider variations in research approaches The book is a source of information for the scientist administrator who is frequently confronted with different proposed approaches to biological research projects utilizing animals Radioisotopes and Nuclear Techniques in the Pharmaceutical and Allied Industries John Edward Christian, William F. Bousquet, 1960 Bentley's Textbook of Pharmaceutics - E-Book Sanjay Kumar Jain, Vandana Soni, 2011-08-23 This adaptation of Bentley's Textbook of Pharmaceutics follows the same goals as those of the previous edition albeit in a new look The content of the old edition has been updated and expanded and several new chapters viz Complexations Stability Testing as per ICH Guidelines Parenteral Formulations New Drug Delivery Systems and Pilot Plant Manufacturing have been included with an intention to make the book more informative for the modern pharmacists The book has six sections Section I deals with the physicochemical principles Two new chapters Complexations and ICH Guidelines for Stability Testing have been added to make it more informative Section II conveys the information regarding pharmaceutical unit operations and processes Section III describes the area of pharmaceutical practice Extensive recent updates have been included in many chapters of this section Two new chapters Parenteral Formulations and New Drug Delivery Systems have been added Section IV contains radioactivity principles and applications Section V deals with microbiology and animal products Section VI contains the formulation and packaging aspects of pharmaceuticals Pilot Plant Manufacturing concepts are added as a new chapter which may be beneficial to readers to understand the art of designing of a plant from the pilot plant model **Special Sources of Information on Isotopes** F. E. McKinney, 1968 Source Book of Educational Materials for Nuclear Medicine ,1981 **TID.** ,1967 **Nuclear and Radiochemistry** Karl Heinrich Lieser, 2008-09-26 This new edition of the best selling handbook gives a complete and concise description of the latest knowledge on nuclear and radiochemistry as well as their applications in the various fields of science It is based on over 40 years experience in teaching courses and research The

Southwood, 2013-06-29 The virtual impossibility of extracting the many different species from a habitat with equal efficiency by a single method e g Nef 1960 1 1 Population estimates Population estimates can be classified into a number of different types the most convenient classification is that adopted by Morris 1955 although he used the terms somewhat differently in a later paper 1960 1 1 1 Absolute and related estimates The animal numbers may be expressed as a density per unit area of the ground of the habitat Such estimates are given by nearest neighbour and related techniques Chapter 2 marking and recapture Chapter 3 by sampling a known fraction of the habitat Chapter 4 6 and by removal sampling and random walk techniques Chapter 7 Absolute population The number of animals per unit area e g hectare acre It is almost impossible to construct a budget or to study mortality factors without the conversion of population estimates to absolute figures for not only do insects often move from the plant to the soil at different developmental stages but the amount of plant material is itself always changing The importance of obtaining absolute General Catalogue of Printed Books British Museum. Graham, R.J. Hannam, N.C. Uren, 2012-12-06 Sixty years ago at the Waite Agricultural Research Institute G Samuel a plant pathologist and C S Piper a chemist published their conclusion that the cause of roadside take all a disease of oats was manganese deficiency This report together with the concurrent and independent studies of W M Carne in Western Australia were the first records of manganese deficiency in Australia and came only six years after McHargue's paper which is generally accepted as the final proof of the essentiality of this element. There must have been a few doubts for some people at the time however as the CAB publication. The Minor Elements of the Soil 1940 expressed the view that further evidence to this effect was provided by Samuel and Piper Their historic contributions are recognised by the International Symposium on Manganese in Soils and Plants as it meets on the site of their early labours to celebrate the 60th anniversary. This year Australians also acknowledge 200 years of European settlement in this country and so the Symposium is both a Bicentennial and a diamond jubilee event which recognises the impact of trace elements on agricultural development in Australia In a broader sense a symposium such as this celebrates as it reviews the efforts of all who over the ages have contributed to our knowledge of manganese in soils and plants

Man-Made and Natural Radioactivity in Environmental Pollution and Radiochronology Richard Tykva, Dieter Berg, 2004-01-31 The goal of this book is to examine the complex state of radioactivity in the environment and to understand the interplay of its two principal sources man made and natural The text examines human contributions to release of radionuclides with an eye to future reductions and assesses natural occurrences in an evaluation of baseline radioactivity
