Radiolarians in the Sedimentary Record P. De Wever, P. Dumitrica, J.P. Caulet, C. Nigrini, M. Caridroit, 2002-02-28

Radiolarians in the Sedimentary Record presents the current state of knowledge on fossil radiolarians. The author discusses the record as well as new integrated taxonomic systems at the family level. The book provides comprehensive coverage of the fossil record of these unicellular organisms. It also discusses their important role in the history of Radiolaria of Giant and Subgiant Fields in Asia.

Joyce R. Blueford, Benita Murchey, 1993-01-01 Sixteen papers in honor of Boris Borisovich Nazarof 1937-1989 *Upper Jurassic Tethyan and Southern Boreal Radiolarians from Western North America* Donna Meyerhoff

Hull, 1997 *Ophiolites in Earth History* Yildirim Dilek, Paul T. Robinson, 2003 The 32 papers in this volume examine the mode and nature of igneous metamorphic tectonic sedimentological and biological processes associated with the evolution of oceanic crust in different tectonic settings in Earth history as revealed in various ophiolites and ophiolite belts around the world and the geodynamic significance of these ophiolites in the evolution of different orogenic systems. Divided into six thematic sections, the book presents a wealth of new data and syntheses from mainly Phanerozoic ophiolites around the world.

*Himalayan Tectonics* P.J. Treloar, M.P. Searle, 2019-10-08 The Himalaya Karakoram Tibet mountain belt resulted from

Cenozoic collision of India and Asia and is frequently used as the type example of a continental collision orogenic belt. The last quarter of a century has seen the publication of a remarkably detailed dataset relevant to the evolution of this belt.

Detailed fieldwork backed up by state of the art structural analysis, geochemistry, mineral chemistry, igneous and metamorphic petrology, isotope chemistry, sedimentology and geophysics produced a wide ranging archive of data rich scientific papers. The rationale for this book is to provide a coherent overview of these datasets in addressing the evolution of the mountain ranges we see today. This volume comprises 21 specially invited review papers on the Himalaya Kohistan arc, Tibet, the Karakoram and Pamir ranges. These papers span the history of Himalayan research, chronology of the collision, stratigraphy, magmatic and metamorphic processes, structural geology and tectonics, seismicity, geophysics and the evolution of the Indian monsoon. This landmark set of papers should underpin the next 25 years of Himalayan research.

Micropalaeontology in Petroleum Exploration Robert Wynn Jones, 1996 There have been a

number of papers marking the association between micropalaeontology and petroleum exploration and a small number of books containing contributions to the subject. However, there have been no previous books that provide a comprehensive and thematic treatment. This book attempts to redress that imbalance. The first part deals with pure micropalaeontology. Microfossil

groups include calcareous siliceous phosphatic and organic walled microfossils and calcareous nanofossils The second part treats the principles and practice of applied micropalaentology and sequence stratigraphy Case histories of applications in a range of geographic geologic amd stratigraphic settings are given The final chapter deals with applications outside petroleum exploration and contains sections on environmental monitoring coal mining mineral exploration and exploitation and engineering The book is extensively illustrated and referenced and is an invaluable reseource for both academic and commercial palaeontologists
