Radiological Safety Aspects of the Operation of Neutron Generators Richard F. Boggs,1976 Radiological Safety Aspects of the Operation of Neutron Generators Richard F. Boggs,1976 **Radiological Safety Aspects of the Operation of Proton Accelerators** Ralph H. Thomas,Graham R. Stevenson,International Atomic Energy Agency,1988 This report serves as a guide for the planning and implementation of radiation protection programmes for all types of positive ion accelerators The basic types of accelerators are briefly described followed by a detailed description of several installations covering the energy range from 10 MeV to 500 GeV Special emphasis is given to the production of ionizing radiation and its transmission through shielding computer techniques for shield design radiation measurement and interpretation and the radiological impact of accelerators on the environment Extensive references are given so the book can serve as a source to the published literature *Soil Water Assessment by the Neutron Method* CSIRO (Australia),1981 Application in agriculture Forestry and Environmental Science Neutron moisture meter theory Instrument design Accuracy bias and precision Calibration Field installation and maintenance Site selection and representivity Field practice data acquisition and processing Safety aspects *Radiation Safety in Well Logging* IAEA,2020-08-18 This Safety Guide provides recommendations on the use of radioactive sources and radiation generators in well logging including in the manufacture calibration and maintenance of well logging tools It provides recommendations on radiation protection and safety for the storage use and transport of such radiation sources The guidance in this publication is aimed primarily at operating organizations that are authorized to undertake well logging with radiation sources as well as their employees and radiation protection officers The guidance will also be of interest to regulatory bodies and to designers manufacturers suppliers and maintenance and servicing organizations of well logging equipment that contains radiation sources International Atomic Energy Agency Publications: Catalogue International Atomic Energy Agency,1986 **International Atomic Energy Agency Publications** International Atomic Energy Agency,1985 **Technical Reports Series** ,1988 *Laser-plasma Acceleration : Proceedings of the International School of Physics "Enrico Fermi", Varenna on Lake Como, Villa Monastero, 20-25 June 2011* Fernando Ferroni,Leonida Antonio Gizzi,Riccardo Faccini,2012 Impressive progress has been made in the field of laser plasma acceleration in the last decade with outstanding achievements from both experimental and theoretical viewpoints Closely exploiting the development of ultra intense ultrashort pulse lasers laser plasma acceleration has developed rapidly achieving accelerating gradients of the order of tens of GeV m and making the prospect of miniature accelerators a more realistic possibility This book presents the lectures delivered at the Enrico Fermi International School of Physics and summer school Laser Plasma Acceleration held in Varenna Italy in June 2011 *Radiation Safety in the Use of Nuclear Gauges* IAEA,2020-12-23 There are several hundred thousand nuclear gauges incorporating a radioactive source or a radiation generator in use all over the world They have been used in a wide range of industries to improve the quality of

products optimize processes and save energy and materials The economic benefits have been amply demonstrated and there is clear evidence that nuclear gauge technology can be used safely and will continue to play an important role Although generic guidance for source handling is available there have been no targeted recommendations for radiation safety in the use of nuclear gauges To fill this gap the current publication provides practical guidance for implementing the safety requirements specified in IAEA Safety Standards Series No GSR Part 3 Radiation Protection and Safety of Radiation Sources International Basic Safety Standards related to the use of nuclear gauges
