Black Lung Alan Derickson,2014-04-11 In the definitive history of a twentieth century public health disaster Alan Derickson recounts how for decades after methods of prevention were known hundreds of thousands of American miners suffered and died from black lung a respiratory illness caused by the inhalation of coal mine dust The combined failure of government medicine and industry to halt the spread of this disease and even to acknowledge its existence resulted in a national tragedy the effects of which are still being felt The book begins in the late nineteenth century when the disorders brought on by exposure to coal mine dust were first identified as components of a debilitating and distinctive illness For several decades thereafter coal miners dust disease was accepted in both lay and professional circles as a major industrial disease Derickson describes how after the turn of the century medical professionals and industry representatives worked to discredit and supplant knowledge about black lung with such success that this disease ceased to be recognized Many authorities maintained that breathing coal mine dust was actually beneficial to health Derickson shows that activists ultimately forced society to overcome its complacency about this deadly and preventable disease He chronicles the growth of an unprecedented movement from the turn of the century miners union to the social medicine activists in the mid twentieth century and the black lung insurgents of the late sixties which eventually won landmark protections and compensation with the enactment of the Federal Coal Mine Health and Safety Act in 1969 An extraordinary work of scholarship Black Lung exposes the enormous human cost of producing the energy source responsible for making the United States the world s preeminent industrial nation **Illustrated Catalogue of the Slide Archive of Historical Medical Photographs at**

detachment and divergence and competition between practitioners of Christianity Islam and African religious traditions Across Africa Muslims Christians and practitioners of African religious traditions live in shared settings demarcating themselves in opposition to one another and at times engaging in violent conflicts but also being entangled in complex ways and showing unexpected similarities and mutual cross overs However while encounters and entanglements of African religious traditions with either Islam or Christianity have long been a central research issue the configuration as a whole has barely been taken into account even though Muslims Christians and practitioners of African religious traditions have long co existed and still co exist more or less peacefully in many settings in Africa Building on recent interventions to move beyond the compartmentalization of the study of religion in Africa this edited volume will spotlight why and how an integrated approach to Islam Christianity and African religious traditions is important Bringing together stimulating case studies from Kenya Nigeria Zanzibar Ghana and Mozambique that offer new directions for ethnographic and historical research the volume will not only shed light on an important phenomenon out there in the world the long overlooked ways in which Muslims Christians and practitioners of African religious traditions interact with one another in various majority minority configurations but will also engage with a critical rethinking of the study of religion in Africa and beyond
