Rail Mail:

Mail by Rail Peter Johnson, 2022-12-01 The story of the traveling post offices and the trains that have served as an essential part of Britain's mail delivery system for almost two centuries. Railways have been used for the carriage of mail in Britain since soon after the Liverpool Manchester Railway opened in 1830, the development of the first traveling post offices following, enabling the Post Office to achieve maximum efficiencies in mail transportation. As the rail network grew, the mail network grew with it, reaching a peak with the dedicated mail trains that ran between London and Aberdeen. The Post Office also turned to railways when it sought a solution to the London traffic that hindered its operations in the Capital, obtaining powers to build its own narrow gauge automatic underground railway under the streets to connect railway stations and sorting offices. Although construction and completion were delayed by the First World War, the Post Office London Railway was eventually brought into use and was an essential part of Post Office operations for many years. Changing circumstances brought an end to both the traveling post offices and the underground railway, but mail is still carried in bulk by train, and a part of the railway has found a new life as the Mail Rail tourist attraction. Author Peter Johnson has delved into the archives and old newspapers to uncover the inside story of the Post Office and its use of railways to carry the mail for nearly 200 years. Includes photos and illustrations.

Royal Mail Martin J. Daunt, 2015-11-19 The history of the post office involves many of the most significant themes in the social, economic, and political history of Britain. Daunt traces the development of the post office as an institution and as a business in the 19th and 20th centuries and places the debates surrounding its history, performances, and failings in a longer historical perspective and in the broader context of British national history.
