An Environmental History of Australian Rainforests until 1939 Warwick Frost, 2020-06-10 This book provides a comprehensive environmental history of how Australia s rainforests developed the influence of Aborigines and pioneers farmers and loggers and of efforts to protect rainforests to help us better understand current issues and debates surrounding their conservation and use While interest in rainforests and the movement for their conservation are often mistakenly portrayed as features of the last few decades the debate over human usage of rainforests stretches well back into the nineteenth century In the modern world rainforests are generally considered the most attractive of the ecosystems being seen as lush vibrant immense mysterious spiritual and romantic Rainforests hold a special place both providing a direct link to Gondwanaland and the dinosaurs and today being the home of endangered species and highly rich in biodiversity They are also a critical part of Australia s heritage Indeed large areas of Australian rainforests are now covered by World Heritage Listing However they also represent a dissonant heritage What exactly constitutes rainforest how it should be managed and used and how much should be protected are all issues which remain hotly contested Debates around rainforests are particularly dominated by the contradiction of competing views and uses seeing rainforests either as untapped resources for agriculture and forestry versus valuing and preserving them as attractive and sublime natural wonders Australia fits into this global story as a prime example but is also of interest for its aspects that are exceptional including the intensity of clearing at certain periods and for its place in the early development of national parks This book will be of great interest to students and scholars of Environmental History

**Indians, Markets, and Rainforests** Ricardo Godoy, 2001-08-01 This book addresses two important and related questions does participation in a market economy help or hurt indigenous peoples and how does it affect the conservation of tropical rainforest flora and fauna Oddly there have been few quantitative studies that have addressed these issues Ricardo Godoy s research takes an important step toward rectifying this oversight by investigating five different lowland Amerindian societies of tropical Latin America all of which are experiencing deep changes as they modernize Godoy examines the effect of markets on a broad range of areas including health conservation of flora and fauna leisure folk knowledge reciprocity and private time preference He concludes that contrary to considerable anthropological theory the effect of markets on the quality of life and the rainforest are often unclear or benign Godoy uses multivariate techniques to examine the changes modernization has had on many indicators of the quality of life and the environment and concludes that the seeds of socioeconomic differentiation may already lie dormant in simple economies The impact of modernization on lowland Amerindians is a topic of great concern to anthropologists researchers and policymakers in developing nations and this book

is a significant contribution to the debate about the likely future of indigenous people      **Poisoned Forests** Honor Head, 2018-12-15 Forests are the lungs of our planet and it is essential that we keep the plant life healthy for Earth's well being Yet it is no secret that our forests are in great danger This book explores the science and politics behind exactly what is happening to the forests and why along with the current and potential ramifications we may face in the future The reader is confronted with staggering case studies and is challenged to think critically about the problems with how we are using this important resource This book captures readers attention with colorful pictures and edgy fact boxes while raising awareness levels about this matter of ever growing importance      **Gliders of Australia** David Lindenmayer, 2002 This book deals with all six species of Australian gliders which range in size from the tiny 12 gram Feathertail Glider to the 1.3 kg Greater Glider It relates the story of this extraordinary group of animals which possess a fascinating array of adaptations to their nocturnal and gliding existence      Forestry Activities and Deforestation Problems in Developing Countries PASA Study Team, 1980

tourism resource have generated significant income for local communities. However, not all use of rainforests as a tourism resource has been sustainable. This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem must be built upon. It provides a multi-disciplinary perspective incorporating rainforest science, management and tourism issues. The book is organized into four sections commencing with Rainforest Ecology and Management followed by People and Rainforests, Opportunities for Rainforest Tourism Development and finally Threats to Rainforests. Each major rainforest region is covered including the Amazon, Central America, Africa, Australia and south east Asia in the context of a specific issue. For example, rainforests in Papua New Guinea are examined in the context of community based ecotourism development while the rainforests in Borneo are discussed in an examination of wildlife issues. Other issues covered in this manner include governance, empowerment issues for rainforest peoples and climate change.

**Take the Lead** Sasha DiGiulian, 2023-09-26 World champion climber Sasha DiGiulian tells her story from coming of age under the scrutiny of social media, navigating a male dominated sport and tackling her most heart stopping climbs and shares the power of perseverance and positivity. At age six, Sasha DiGiulian stepped into a climbing gym for the first time and was competing within a year. Decked out in all pink gear and with her blonde hair tied into pigtails, Sasha knew from an early age what it was like to be a girl in a traditionally male dominated sport, vowing to never sacrifice her femininity to fit in. With a fierce love for the climb and incredible natural talent, Sasha soon won her first National Sport Climbing Championship at only seventeen and a year later took the title of World Champion. To her fans, it looked like Sasha was on top of the world. But under the accolades, she was just another young woman learning how to handle the intense scrutiny of social media and dealing with body dysmorphia, all while quietly facing a potentially career ending injury. In a relatable and inspiring voice, *Take the Lead* reflects on the highs and lows of Sasha's illustrious life and career for the first time, bringing readers on her remarkable journey from novice climber to Columbia University graduate, adventurer, environmentalist and entrepreneur and one of the most recognizable faces in climbing. For readers of Cheryl Strayed's *Wild* and Megan Rapinoe's *One Life*, *Take the Lead* ultimately emphasizes the power of perseverance, fearlessness and positivity in tackling some of the most daunting and fearsome climbs on and off the wall.
