Realizing Rawls:

Realizing Rawls Thomas Pogge, 1989 **Radicalizing Rawls** G. Chartier, 2014-02-05 This book is a critical examination of John Rawls's account of the normative grounds of international law arguing that Rawls unjustifiably treats groups rather than particular persons as foundational to his model of international justice **The Legacy of John Rawls** Thom Brooks, Fabian Freyenhagen, 2005-09-08 John Rawls was unquestionably the most important moral and political philosopher of the last one hundred years His A Theory of Justice published in 1971 is already a classic text and his political philosophy is more widely studied than that of any other theorist Interest in Rawls's work has increased still further since his recent death and the publication of his complete works but until now there has been no single volume that explores the legacy of his work This book fills the void making a substantial contribution not only to work on Rawls's thought but to contemporary debates in ethics and justice as well The book will be of great interest to academics and students in philosophy politics and law departments alike **Embedded Cosmopolitanism** Toni Erskine, 2008-07-31 Dr Erskine's embedded cosmopolitanism embraces the perspective of local loyalties communities and cultures in the theory of why we have duties to strangers and enemies in world politics Taking examples from the war on terror she examines duties to enemies through norms of non-combatant immunity and the prohibition against torture **Rawls's Egalitarianism** Alexander Kaufman, 2018-06-14 This is a new interpretation and analysis of John Rawls's leading theory of distributive justice which also considers the responding egalitarian theories of scholars such as Richard Arneson G A Cohen Ronald Dworkin Martha Nussbaum John Roemer and Amartya Sen Rawls's theory Kaufman argues sets out a normative ideal of justice that incorporates an account of the structure and character of relations that are appropriate for members of society viewed as free and equal moral beings Forging an approach distinct amongst contemporary theories of equality Rawls offers an alternative to egalitarian justice methodologies that aim primarily to compensate victims for undeserved bad luck For Rawls the values that ground the most plausible account of egalitarianism are real equality of economic opportunity combined with the guarantee of a fair distribution of social goods Kaufman's analysis will be of interest to scholars and advanced students of political theory and political philosophy particularly those working on justice and on the work of John Rawls **Deprivation and Freedom** Richard Hull, 2013-01-11 Deprivation and Freedom investigates the key issue of social deprivation It looks at how serious that issue is what we should do about it and how we might motivate people to respond to it It covers core areas in moral and political philosophy in new and interesting ways presents the topical example of disability as a form of social deprivation shows that we are not doing nearly enough for certain sections of our communities and encourages that we think differently about how we should best organise our societies in the future The book develops a comprehensive yet refreshingly simple account of human freedom which shows how the ability to realise our freedom is partly definitive of freedom itself That account conclusively illustrates how many deprivations represent remediable inequalities of important and very basic human

freedoms posing the question as to why societies continue to do so little about them In answering that question Hull shows how the idea of social exclusion is misleading and instead tackles the far more pertinent and challenging issue of societies failure to include The moral seriousness of non inclusion the failure to provide for freedom is evaluated via critical discussion of a variety of central themes and distinctions in ethical and political theory The author shows how such themes and distinctions comprise a framework for evaluating a raft of social issues in turn providing a unique resource for students of moral political and applied philosophy The book concludes with an innovative challenging and effective combination of analytic and continental styles so to address the critical question of how we might actually motivate constructive social change In doing so it shows how a variety of approaches can work successfully together to provide an emphatic case for greater social inclusion Deprivation and Freedom shows how even fairly modest claims about social provision illustrate that we should be doing a lot more about social deprivation than we are now It should be of interest to anyone who is concerned with questions about the type of society in which they live what it says about us to continue as we are and how we might motivate realistically achievable social change

Rationing and Resource Allocation in Healthcare

Ezekiel J. Emanuel, 2018 Budgets of governments and private insurances are limited Not all drugs and services that appear beneficial to patients or physicians can be covered Is there a core set of benefits that everyone should be entitled to If so how should this set be determined Are fair decisions just impossible if we know from the outset that not all needs can be met While early work in bioethics has focused on clinical issues and a narrow set of principles in recent years there has been a marked shift towards addressing broader population level issues requiring consideration of more demanding theories in philosophy political science and economics At the heart of bioethics new orientation is the goal of clarity on a complex set of questions in rationing and resource allocation Rationing and Resource Allocation in Healthcare Essential Readings provides key excerpts from seminal and pertinent texts and case studies about these topics contextualized by original introductions The volume is divided into three broad sections Conceptual Distinctions and Ethical Theory Rationing and Resource Allocation Containing the most important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources this collection aims to assist and inform those who wish to be a part of bioethics 21st century shift including practitioners and policy makers and students and scholars in the health sciences philosophy law and medical ethics

World Poverty and Human Rights Thomas W. Pogge, 2023-02-10 Some 2.5 billion human beings live in severe poverty deprived of such essentials as adequate nutrition safe drinking water basic sanitation adequate shelter literacy and basic health care One third of all human deaths are from poverty related causes 18 million annually including over 10 million children under five However huge in human terms the world poverty problem is tiny economically Just 1 percent of the national incomes of the high income countries would suffice to end severe poverty worldwide Yet these countries unwilling to bear an opportunity cost of this magnitude continue to impose a grievously unjust global institutional order that foreseeably and avoidably perpetuates the catastrophe Most citizens of affluent countries believe that we are doing nothing wrong Thomas Pogge seeks to explain how this belief is sustained He analyses how our moral and economic theorizing and our global economic order have adapted to make us appear disconnected from massive poverty abroad Dispelling the illusion he also offers a modest widely sharable standard of global economic justice and makes detailed realistic proposals toward fulfilling it Thoroughly updated the second edition of this classic book incorporates responses to critics and a new chapter introducing Pogge's current work on pharmaceutical patent reform

An Analysis of John Rawls's A Theory of Justice Filippo Dionigi, Jeremy Kleidosty, 2017-07-05 John Rawls's A Theory of Justice is one of the most influential works of legal and political theory published since the Second World War It provides a memorably well constructed and sustained argument in favour of a new social contract version of the meaning of social justice In setting out this argument Rawls aims to construct a viable systematic doctrine designed to ensure that the process of maximizing good is both conscious and coherent and the result is a work that foregrounds the critical thinking skill of reasoning Rawls's focus falls equally on discussions of the failings of existing systems not least among them Marxism and Utilitarianism and on

explanation of his own new theory of justice By illustrating how he arrived at his conclusions and by clearly explaining and justifying his own liberal pluralist values Rawls is able to produce a well structured argument that is fully focused on the need to persuade Rawls explicitly explains his goals He discusses other ways of conceptualizing a just society and deals with counter arguments by explaining his objections to them Then carefully and methodically he defines a number of concepts and tools thought experiments that help the reader to follow his reasoning and test his ideas Rawls s hypothesis is that his ideas about justice can be universally applied they can be accepted as rational in any society at any time

Legitimacy, Justice and Public International Law Lukas H. Meyer,2009-11-12 Do states or individuals stand under duties of international justice to people who live elsewhere and to other states How are we to assess the legitimacy of international institutions such as the International Monetary Fund and the United Nations Security Council Should we support reforms of international institutions and how should we go about assessing alternative proposals of such reforms The book brings together leading scholars of public international law jurisprudence and international relations political philosophers and political theorists to explore the central notions of international legitimacy and global justice The essays examine how these notions are related and how understanding the relationships will help us comparatively assess the validity of proposals for the reform of international institutions and public international law

NGOs and Global Trade Erin Hannah,2016-01-29 In a deeply iniquitous world where the gains from trade are distributed unevenly and where trade rules often militate against progressive social values human health and sustainable development NGOs are widely touted as our best hope for redressing these conditions As a critical voice of the poor and marginalized many are engaged in a global struggle for democratic norms and social justice Yet the potential for NGOs to bring about meaningful change is limited This book examines whether improvements in participatory opportunities for progressive NGOs results in substantive and normative policy change in one of the major trading powers the European Union Hannah advances a constructivist account of the role of NGOs in the EU s trade policymaking process She argues that NGOs have been instrumental in providing education raising awareness and giving a voice to broader societal concerns about proposed trade deals both when they take advantage of formal participatory opportunities and when they protest from the streets and in the media However the book also highlights how NGO inputs are mediated by the social structure of global trade governance Epistemes the background knowledge ideological and normative beliefs and shared assumptions about how the world works determine who has a voice in global trade governance Showing how NGOs succeed only when their advocacy conforms broadly to the dominant episteme this book will be of value to scholars and students with an interest in NGOs and international trade negotiations It will also be of interest to policymakers national trade negotiators government departments and the trade policy community

Globalisation and Equality Keith Horton,Haig Patapan,2004-07-31 Is globalisation creating a more unequal world Is it creating new forms of inequality Does it make certain pre existing forms of inequality more morally or politically significant than they would otherwise have been

Globalisation and Equality examines these and related questions exploring the way increasing globalisation is challenging our conceptions of equality. The contributors explore these themes from both theoretical and empirical perspectives. Some adopt a more abstract approach exploring foundational questions concerning the meaning of equality, its social and political dimensions and more specifically its moral implications in a global context. Others engage the general themes of globalisation and equality by focusing on specific topics such as welfare, citizenship, gender, culture and the environment. Original in the questions it poses and interdisciplinary in its approach, this collection of essays will appeal to all those with an interest in globalisation and equality.

The Right to Justification Rainer Forst, 2012. Contemporary philosophical pluralism recognizes the inevitability and legitimacy of multiple ethical perspectives and values, making it difficult to isolate the higher order principles on which to base a theory of justice. Rising up to meet this challenge, Rainer Forst, a leading member of the Frankfurt School's newest generation of philosophers, conceives of an autonomous construction of justice founded on what he calls the basic moral right to justification. Forst begins by identifying this right from the perspective of moral philosophy. Then, through an innovative, detailed critical analysis, he ties together the central components of social and political justice: freedom, democracy, equality and toleration, and joins them to the right to justification. The resulting theory treats justificatory power as the central question of justice, and by adopting this approach, Forst argues we can discursively work out or construct principles of justice, especially with respect to transnational justice and human rights issues. As he builds his theory, Forst engages with the work of Anglo-American philosophers such as John Rawls, Ronald Dworkin and Amartya Sen, and critical theorists such as Jürgen Habermas, Nancy Fraser and Axel Honneth. Straddling multiple subjects from politics and law to social protest and philosophical conceptions of practical reason, Forst brilliantly gathers contesting claims around a single, elastic theory of justice.

Sanctions, Accountability and Governance in a Globalised World Jeremy Farrall, Kim Rubenstein, 2009-11-05. This book is the first in a series examining how public law and international law intersect in five thematic areas of global significance: sanctions, global health, environment, movement of people and security. Until recently, international and public law have mainly overlapped in discussions on how international law is implemented domestically. This series explores the complex interactions that occur when legal regimes intersect, merge or collide. **Sanctions, Accountability and Governance in a Globalised World** discusses legal principles which cross the international law/domestic public law divide. What tensions emerge from efforts to apply and enforce law across diverse jurisdictions? Can we ultimately only fill in or fall between the cracks, or is there some greater potential for law in the engagement? This book provides insights into international constitutional and administrative law, indicating the way these intersect, creating a valuable resource for students, academics and practitioners in the field.
