Rural Life In Argentina:

Rural Life in Argentina Carl Cleveland Taylor, 1948 **The Book of Rural Life: Farm records. Health service**
Edward Mowbray Tuttle, 1925 **The Crisis of Argentine Capitalism** Paul H. Lewis, 2000-11-09 At the end of World War II Argentina was the most industrialized nation in Latin America with a highly urbanized literate and pluralistic society But over the past four decades the country has suffered political and economic crises of increasing intensity that have stalled industrial growth sharpened class conflict and led to long periods of military rule In this book Paul Lewis attempts to explain how that happened Lewis begins by describing the early development of Argentine industry from just before the turn of the century to the eve of Juan Peron s rise to power after World War II He discusses the emergence of the new industrialists and urban workers and delineates the relationships between those classes and the traditional agrarian elites who controlled the state Under Peron the country shifted from an essentially liberal strategy of development to a more corporatist approach Whereas most writers view Peron as a pragmatist if not opportunist Lewis treats him as an ideologue whose views remained consistent throughout his career and he holds Peron along with his military colleagues chiefly responsible for ending the evolution of Argentina s economy toward dynamic capitalism Lewis describes the political stalemate between Peronists and anti Peronists from 1955 to 1987 and shows how the failure of post Peron governments to incorporate the trade union movement into the political and economic mainstream resulted in political polarization economic stagnation and a growing level of violence He then recounts Peron s triumphal return to power and the subsequent inability of his government to restore order and economic vigor through a return to corporatist measures Finally Lewis examines the equally disappointing failures of the succeeding military regime under General Videla and the restoration of democracy under President Raul Alfonsin to revive the free market By focusing on the organization development and political activities of pressure groups rather than on parties or governmental institutions Lewis gets to the root causes of Argentina s instability and decline what he calls the politics of political stagnation At the same time he provides important information about Argentina s entrepreneurial classes and their relation to labor government the military and foreign capital The book is unique in the wealth of its detail and the depth of its analysis *Survey of Research on Latin America by United States Scientists and Institutions* National Research Council (U.S.). Committee on Latin American Anthropology, Alexander Lesser, 1946 The Landowners of the Argentine Pampas Roy Hora, 2001-01-04 This is a social and political history of the Argentine landowners for many decades Latin America s most affluent propertied class Roy Hora develops a historically based view of how socio economic and political change affected the landowners and was in turn affected by them between the 1860s and 1940s He questions the excessively static picture of the landowners of the pampas which unquestioningly accepts the image of power lineage and permanence given by both panegyrists and critics of the estancieros Dr Hora challenges the view of a powerful reactionary landed class dominating the country s history from colonial times to the rise of Peronism in the 1940s But he also

challenges revisionist interpretations which seek to de-emphasize the central role played by the landowning class in the evolution of modern Argentina **The Book of Rural Life** Edward Mowbray Tuttle, 1925 *Encyclopedia of Modern Jewish Culture* Glenda Abramson, 2004-03-01 The Encyclopedia of Modern Jewish Culture is an extensively updated revision of the very successful Companion to Jewish Culture published in 1989 and has now been updated throughout Experts from all over the world contribute entries ranging from 200 to 1000 words broadly covering the humanities arts social sciences sport and popular culture and 5000 word essays contextualize the shorter entries and provide overviews to aspects of culture in the Jewish world Ideal for student and general readers the articles and biographies have been written by scholars and academics musicians artists and writers and the book now contains up to date bibliographies suggestions for further reading comprehensive cross referencing and a full index This is a resource no student of Jewish history will want to go without

Bibliography of Agriculture, 1966 Eugenics in the Garden Fabiola López-Durán, 2018-03-01 Winner Robert Motherwell Book Award Outstanding Book on Modernism in the Arts The Dedalus Foundation 2019 As Latin American elites strove to modernize their cities at the turn of the twentieth century they eagerly adopted the eugenic theory that improvements to the physical environment would lead to improvements in the human race Based on Jean Baptiste Lamarck's theory of the inheritance of acquired characteristics this strain of eugenics empowered a utopian project that made race gender class and the built environment the critical instruments of modernity and progress Through a transnational and interdisciplinary lens Eugenics in the Garden reveals how eugenics fueled by a fear of social degeneration in France spread from the realms of medical science to architecture and urban planning becoming a critical instrument in the crafting of modernity in the new Latin world Journeying back and forth between France Brazil and Argentina Fabiola L pez Dur n uncovers the complicity of physicians and architects on both sides of the Atlantic who participated in a global strategy of social engineering legitimized by the authority of science In doing so she reveals the ideological trajectory of one of the most celebrated architects of the twentieth century Le Corbusier who deployed architecture in what he saw as the perfecting and whitening of man The first in depth interrogation of eugenics influence on the construction of the modern built environment Eugenics in the Garden convincingly demonstrates that race was the main tool in the geopolitics of space and that racism was and remains an ideology of progress Supplementary Catalogue of the Public Library of New South Wales, Sydney for the Years 1888-[1910] ...
