**Soviet Power: The Continuing Challenge** James Sherr,1991-06-18 Representing the culmination of an RUSI main theme study Soviet Power and Prospects this volume is based on the Institute s proposition that military power exerts a profound influence on the course of world politics and that such power cannot be divorced from its social and political context

*Chemical Weaponry* Edward M. Spiers,1989-05-05 Chemical weapons are still a viable military option This book assesses their appeal by examining how the agents munitions and protective equipment of chemical warfare have evolved since 1915 how technological innovations and refinements in weaponry have altered tactical assumptions and how these weapons have been employed in conflicts from the First World War to the Gulf War The author argues that the weapon technology has proved inherently dynamic that a new generation of biochemical agents may soon be available and that arms control may not be able to curb these developments

*New Trends in Turkish Foreign Affairs* Salomon Ruysdael,2002 With the present book we intend to give an account of Turkish foreign policy written by Turkish scientists and decision makers Up to now countless treatises on the foreign policy of the Republic of Turkey have been published within the Anglo American language area The specialized literature is particularly extensive in the domain of Turkish European policy as well as on the Europeans foreign policy towards Turkey and on security and defense policy We are primarily interested in the self perception of Turkish decision makers and advisors who as the scientific and bureaucratic elite have a significant influence on the conception of Turkish foreign policy We are interested in the elites priorities in shaping the country s foreign policy We hope that readers will be able to read the ideas hopes and fears between the lines of the contributions in order to form ideas for themselves We also intend to bring the Turkish perspective to sectors outside the university Moreover we intend to draw an outline of scientific literature by means of which readers may immerse themselves in the subject

**United States Military Forces and Installations in Europe** Simon Duke,1989 For many people who live in Europe the presence of substantial US military forces is a matter of concern and

debate which has tended so far to centre around a few highly visible bases such as the cruise missile locations Apart from these few bases relatively little is known about the size and extent of the US military presence in Europe This book aims to fill that gap by providing the raw data on what is where The study also highlights the historical details behind the acquisition of bases in individual countries and summarizes and analyses all of the basing agreements between the US and its host nations which are available to the public The book a timely contribution to the debate as discussions begin for possible post INF cuts in superpower force levels in Europe there is an urgent need for accurate and unbiased information on US forces in Western Europe and on the massive infrastructure that supports those forces

**The Gulf And The Search For Strategic Stability** Anthony H. Cordesman,2019-09-06 This book provides an extensive military and strategic analysis of the Gulf and the Arabian Peninsula assessing the regional military balance the internal security and stability of each Gulf nation the evolution of each nation s forces from 1969 into 1983 and the impact of defense spending and Western and Soviet bloc arms sales in the region Comprehensive statistics are provided on arms transfers to each country since 1969 and on the forces each nation is capable of deploying in the Gulf

**Architects of Continental Seapower** Jeremy Stocker,2020-10-01 This book describes and analyses two iconic figures in twentieth century naval history the German Admiral Alfred von Tirpitz and the Russian Admiral Sergei Gorshkov It examines the men what they thought and wrote about seapower the fleets they created and the strategic consequences of what they did More broadly it draws on the respective histories of the post 1897 Imperial German Navy and the post 1956 Soviet Navy to examine the continental bid for large scale seapower The work argues that both individuals built navies that did not and could not fulfil the objectives for which they were created Drawing on the legacies of both men the book also develops some wider ideas about the creation of large navies by continental states with cautionary lessons for today s emerging powers India and China Both admirals have received book length biographies but this is the first attempt at a comparative study and the first to draw broader strategic lessons from their respective attempts as continental navalists to challenge maritime states This book will be of much interest to students of naval history strategic studies and International Relations

*ANZUS in Crisis* Jacob Bercovitch,1988-06-18 The issues involved in this book are complex and go to the heart of how alliances the basic units of the current structure of international security should function

*Interpreting China's Military Power* Ka Po Ng,2005-08-09 Although inter state tensions have generally been easing after the Cold War military power remains a dominant factor in Asian regional politics As China operating the world s largest army grows stronger there are ongoing debates over the implications for Asia s regional security This book argues that it is imperative to look beyond the empirical observations and conventional materialist reading of Chinese military development to understand its dynamics and directions in doctrinal terms and put it in a readiness context for evaluation Military doctrine has long been under studied and is often treated as a subject separate from force development But as this study contends this factor is necessary for interpreting the making and purposes of China s military power because it forms

the intellectual foundation of military structural and hardware development. When loaded with political rhetoric it also communicates to us the intended uses of the military power. The role of doctrine is reinforced in the context of military readiness which defines what for and how the army is getting ready. Force development is evaluated in structural, operational and directional terms. The importance of this analytical framework based on military doctrine and readiness is demonstrated in a survey of the evolution of Chinese military doctrine and force development. As the Chinese People's Liberation Army has continued to adjust its military structure and operation to follow the doctrinal lead, its switches between the doctrines of local war and total war have seen corresponding changes to the emphasis between operational and structural readiness.

*Guerrilla Veterans in Post-war Zimbabwe* Norma J. Kriger, 2003-05-29 Zimbabwe's guerrilla veterans have burst into the international media as the storm troopers in Mugabe's new war of economic liberation. In this book Norma Kriger gives the unfolding contemporary drama a historical background and shows continuities between the present and past. Between 1980 and 1987 guerrilla veterans and the ruling party colluded with and manipulated each other to build power and privilege in the army, police, bureaucracy and among workers. Both relied chiefly on violence and appeals to their participation in the anti-colonial liberation war as they sought to vanquish their then political opponents. Today violence and a liberation war discourse continue to be salient as Mugabe's party and its guerrilla veterans struggle to maintain power through land invasions and purges of a new political opposition. This study gives a critical review of guerrilla programs and the war to peace transitions literatures thus changing the way we view post-conflict societies.
