Rowe,2010-07-01 Russia holds more Arctic territory than any other state yet unlike other Arctic states it does not have a  
unified strategy identifying economic and political aims for the North Russia's policies on the North are dispersed across a  
variety of fields from domestic migration politics to oil and gas development This volume engages the disparate elements of  
Russian northern policy and illustrates how the centralized relatively economically strong and politically assertive Russia of  
today defines and addresses northern spaces opportunities and challenges As energy markets continue looking northward  
and climate change renders the Arctic increasingly accessible the geopolitical interests of Arctic states will be brought more  
frequently to the forefront These circumstances will make the disputed borders and overlapping sovereignty claims of the  
North an important topic in international politics Given its geographic size and political influence Russia is and will continue  
to be a key regional and global actor in the international politics of the North *Russian Executive Government*

**Governance** José J. contributed to a weakening of the sector In this context the book shows how governmental policies toward SSF vary considerably from country to country in a way that is not entirely consistent with European policies
