[Framing Russian Art](#) Oleg Tarasov, 2012-01-01. The notion of the frame in art can refer not only to a material frame bordering an image but also to a conceptual frame. Both meanings are essential to how the work is perceived. In *Framing Russian Art*, art historian Oleg Tarasov investigates the role of the frame in its literal function of demarcating a work of art and in its conceptual function affecting the understanding of what is seen. The first part of the book is dedicated to the framework of the Russian icon. Here Tarasov explores the historical and cultural meanings of the icon's setting and of the iconostasis. Tarasov's study then moves through Russian and European art from ancient times to the twentieth century, including abstract art and Suprematism. Along the way, Tarasov pays special attention to the Russian baroque period and the famous nineteenth-century Russian battle painter Vasily Vereshchagin. This enlightening account of the cultural phenomenon of the frame and its ever-changing functions will appeal to students and scholars of Russian art history.

[Russian Fortresses 1480-1682](#) Konstantin Nossov, 2012-06-20. In 1462, the throne of the Principality of Moscow passed to Ivan III, 1462-1505, who succeeded in throwing off the Tatar yoke. For the next 200 years, this new state struggled to maintain her borders against a series of attacks from the Lithuanians, Swedes, and Poles to the west, as well as the Tatars to the south. They achieved this through the development of a network of fortified sites and a series of linear defensive systems. This book examines how these fortifications were developed to respond to ever-changing situations under the command of such charismatic rulers as Ivan the Terrible, right through to the military reforms of Peter the Great.

Medieval Russian Fortresses AD 862-1480 Konstantin S. Nossov, 2012-06-20. According to Russian legend, in the year AD 862, the Slav tribes of what is now European Russia invited a number of Scandinavian princes to rule over them. However, on the death of these princes, Prince Oleg seized Kiev and united the Northern and Southern Russian territories, building extensive fortifications to protect its borders. The rise of feudalism in the 11th century led to the development of individual fortified sites, and the extended border defenses fell into disrepair. Consequently, Mongol hordes poured over the border, introducing the siege warfare techniques of the East, heavily influencing the fortification styles thereafter. Using a wealth of archaeological evidence and first-hand sources, Konstantin Nossov charts the history of the medieval Russian fortress from its early beginnings until the 14th century, paying special attention to the development of one of the most iconic fortifications in the world, the Kremlin.
