Russian Armour in the Second World War Michael Green, 2013-09-19 This WWII pictorial history of Russia's tanks and armored fighting vehicles provides a vivid look at the Eastern Front through rare wartime photographs. When Hitler's armies advanced into Russia it was Stalin's tanks and armored fighting vehicles that finally pushed them back from the outskirts of Moscow. At the Battle of Kursk in the summer of 1943 the Soviet tanks and AFVs proved their effectiveness by defeating the cream of the Panzertruppen. From that point on the tanks and armored fighting vehicles of the Red Army continued their offensive operations until they victoriously entered Berlin in April and May of 1945. In this fascinating pictorial history military expert Michael Green provides historical images of the full range of Russian armor as well as exterior and interior color photos of preserved and restored tanks and AFVs from the period. This latest book in the Images of War series brings to life the Red Army's efforts to repel Hitler's Panzer Armies.

**Designed to Kill: The Case Against Weapons Research** John Forge, 2012-12-24 The pilotless drones, smart bombs and other high-tech weapons on display in recent conflicts are all the outcome of weapons research. However, the kind of scientific and technological endeavour has been around for a long time producing not only the armaments of Nazi Germany and the atomic bombs dropped on Japan but the catapults used in ancient Greece and Rome and the assault rifles used by child soldiers in Africa. In this book John Forge examines such weapons research and asks whether it is morally acceptable to undertake such an activity. He argues that it is in fact morally wrong to take part in weapons research as its primary purpose is to produce the means to harm others and moreover he argues that all attempts to then justify participation in weapons research do not stand up to scrutiny. This book has wide appeal in fields of philosophy and related areas as well to a more general audience who are puzzled about the rate at which new weapons are accumulated.

*Soviet Armoured Cars 1936-45* Jamie Prenatt, 2020-10-29 The armoured car has an important place in the early history of Soviet armoured fighting vehicles. AFVs they were the most important AFV during the Russian Civil War and figured prominently in the mechanization of the Red Army that began in late 1929. The 1930s saw the development and production of a wide variety of armoured cars which were used extensively in Soviet conflicts from then on. They saw service in the Spanish Civil War, in the 1939 Manchurian conflict with Japan and in the occupation of the Baltic states and the invasion of Poland and Finland. Although many of its armoured cars were lost in the early months following the German invasion in June 1941, Russia continued with its armoured car development program and the final model, the BA-64, was accepted for service in 1942 with over 9,000 built before production ended in 1946. This detailed book provides a survey of Russian armoured cars from 1936 to 1945, focusing on the history, design and specifications of the wheeled armoured cars that entered series production, including the rail variants and tracked BA-30. Packed with photographs, cross-sections and stunning battleplates, this is a comprehensive guide to some of the Red Army's fastest AFVs.

*Grossdeutschland Division*

1937-45 Michael Manning,2013-01-12 Grossdeutschland Division the premier German WW2 formation fought on the Eastern Front from 1941 45 with campaigns against the Red Army at Moscow Rzhev Dnieper Kursk Belgorod East Prussia Memel and Pillau where the Division was decimated      *Warships of the Soviet Fleets 1939-1945* Przemyslaw Budzbon,Jan Radziemski,Marek Twardowski,2022-10-30 Seventy five years after the end of the Second World War the details of Soviet ships their activities and fates remain an enigma to the West In wartime such information was classified and after a brief period of glasnost openness the Russian state has again restricted access to historical archives Therefore the value and originality of this work is difficult to exaggerate It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy listing over 6200 vessels from battleships to river gunboats and mercantile conversions as well as purpose built warships Divided into three volumes this first covers major surface warships down to MTBs and armored gunboats as well as submarines For every class there is a design history analyzing strategic tactical and technical considerations and individual ship detail includes construction yard key building dates commissioning fleet designations relocations and ultimate fate Once a closely guarded secret the wartime loss of every ship and boat over 1000 is described Furthermore the confusion caused by frequent name changes is clarified by indexes that run to 16 000 items By following the ships through both their wartime and earlier history the book reveals many aspects of Russian history that remain highly sensitive clandestine co operation with Weimar Germany and fascist Italy the NKVD enforced closure of Soviet borders the Gulag Fleet the faked Metallist sinking that excused the military occupation of Estonia and the ill conceived pact with Nazi Germany Restrictions recently imposed on historical publications in Russia mean this book could certainly not have been published there as proven by the fact that most of the authors Russian collaborators preferred not to disclose their identities This is undoubtedly one of the most important naval reference works of recent years and will be welcomed by anyone with an interest in warships the Soviet Navy or wider maritime aspects of the Second World War      **Armor** ,1993 The magazine of mobile warfare      *Soviet Lend-Lease Tanks of World War II* Steven J. Zaloga,2017-06-29 The Red Army suffered such catastrophic losses of armour in the summer of 1941 that they begged Britain and the United States to send tanks The first batches arrived in late 1941 just in time to take part in the defence of Moscow The supplies of British tanks encompassed a very wide range of types including the Matilda Churchill and Valentine and even a few Tetrarch airborne tanks American tanks included the M3 Stuart light tank and M3 Lee medium tank and the M4 Sherman tank which became so common in 1944 45 that entire Soviet tank corps were equipped with the type With these Western tanks the Soviets were finally able to beat back the German tide in the East This study examines the different types of tanks shipped to the Soviet Union during the war Soviet assessments of their merits and problems and combat accounts of their use in Soviet service using full colour artwork contemporary photographs and detailed cut away illustrations      **SOVIET ARMoured FORCE** ,      *Soviet Aviation And Air Power* Robin Higham,Jacob W Kipp,2019-08-20 This book is the story of Russian aviation and Soviet Russia s

progress in preparing its strength as an air power It discusses the Russia Germany connect post 1919 how Russians gained expertise from German know how and post World War II progress from Stalin to Strategic Arms Limitation Talks **"The Great Patriotic War"** Peter Tsouras,1992 Professional Journal of the United States Army ,1967 Armoured Warfare Alaric Searle,2017-02-09 This book charts the history of armoured warfare from the first use of the tank in 1916 right through to the 21st century adopting military political and global perspectives Alaric Searle explores the origins of the tank the part it played in the First World War and its contribution to the outcome of the war He considers its role as a tool of propaganda the military controversies of the interwar period and the employment of armoured forces in all the major theatres in the Second World War Since the First World War major and medium sized powers have invested heavily in armoured forces Searle looks at the conduct of mechanised warfare in Korea Indo China and Vietnam and during conflicts such as the Arab Israeli Wars and the Gulf Wars Armoured Warfare adopts a global perspective providing the most comprehensive survey of the history of the subject currently available With a detailed bibliography of both primary and secondary sources it is an ideal companion for those studying armoured warfare modern military history and war studies

**Ju 87D/G STUKA versus T-34** Robert Forsyth,2023-09-28 An examination of two of the most high profile air and land weapons to be deployed on the Eastern Front in World War II In late 1942 as part of its attempts to strike back at ever increasing numbers of Soviet tanks the German air ministry authorised the development of an adaptation and enhancement of the longspan Junkers Ju 87D 5 Stuka dive bomber The aircraft was duly fitted with two underwing pods containing 37 mm BK cannon an anti-aircraft cannon with its origins dating back to 1933 The solid slow Ju 87 airframe offered the Luftwaffe an ideal platform for specialist low level tank killing operations Despite the wealth of experience possessed by some of the Luftwaffe's ground attack and dive bomber aces knocking out T 34 tanks from the air was a demanding and difficult process Nevertheless some Luftwaffe pilots notched up impressive tank scores and the Ju 87 is credited with the destruction of more than 100 tanks across the central and southern sectors of the Eastern Front including during the Battle of Kursk Including personal accounts from Stuka pilots and biographies of the anti tank aces together with detailed photographs of the cannon installation into the Ju 87G and details of the construction of the T 34 illustrated using specially commissioned artwork this book covers the epic clash of two legendary machines of World War II *The British Library General Catalogue of Printed Books 1976 to 1982* British Library,1983 *Stopped at Stalingrad* Joel S. A. Hayward,1998 By the time Hitler declared war on the Soviet Union in 1941 he knew that his military machine was running out of fuel In response he launched Operation Blau a campaign designed to protect Nazi oilfields in Romania while securing new ones in the Caucasus All that stood in the way was Stalingrad British Armoured Divisions and Their Commanders, 1939-1945 Richard Doherty,2013-07-16 A total of eleven British armoured divisions were formed during the 1939 1945 war but as this highly informative book reveals just eight saw action In 1940 only 1st Armoured Division faced the German blitzkrieg and it was in the North African desert that

armoured divisions came into their own The terrain was ideal and six such divisions of Eighth Army fought Rommel's Panzers into submission Three were disbanded prior to the invasion of Sicily and Italy The campaign from D Day onwards saw the Guards Armoured 7th Armoured the Desert Rats 11th and Percy Hobart's 79th Armoured Division in the thick of the action Of particular interest are the men who commanded these elite formations and the way their characters contributed to the outcome of operations While some such as Dick McCreery went onto greater heights others did not make the grade the stakes were high A number such as Pip Roberts were just perfectly suited in the role Written by a leading military historian this book describes many fascinating aspects of armoured warfare from its uncertain beginnings through the development of tactics and the evolving tank design Due to British deficiencies reliance had to be placed on US Grants and Shermans with the Comet coming late and the Centurion too late The combination of gripping historical narrative and well researched fact make this an invaluable and highly readable work on the contribution of British Armoured Divisions to victory in the Second World War

**First Polish Armoured Division 1938-47** Evan McGilvray, Janusz Jarzembowski, 2022-07-20 If the Polish armed forces are of interest to you this title covering their distinguished service during World War II should appeal to many Armorama The First Polish Armored Division was formed in Scotland in February 1942 from Polish exiles who had escaped first Poland and then France Its commander Stanislaw Maczek and many of its men had previously served in Polish 10th Motorized Cavalry Brigade 10 BKS which had taken part in the Polish invasion of Czechoslovakia in 1938 and given a good account of itself in the defense of Poland against German and Soviet invasion of 1939 Under Maczek's leadership the division was trained and equipped along British lines in preparation for the invasion of France Attached to 1st Canadian Army the division was sent to Normandy in late July 1944 It suffered heavily during Operation Totalize but went on to play a crucial role in preventing an orderly German withdrawal from the Falaise Pocket by its stand at Hill 262 They then played their part in the advance across Western Europe and into Germany This detailed history supported by dozens of archive photos concludes by looking at the often poor treatment of Maczek and his men after the war A Polish armoured division comprising volunteers from Polish refugees it reads like a story from the Boys Own Paper Astonishing Books Monthly
