Russian Church Singing:

Russian Church Singing: History from the origins to the mid-seventeenth century Johann von Gardner, 1980 The history of church singing in Russia constitutes an essential aspect of that nation's culture and musical history For the first 650 years from the Christianization of Rus in the year 988 liturgical chant was the only documentable art music in that vast territory that eventually became the modern nations of Russia Ukraine and Belarus Indeed in Russia before the revolution of 1917 liturgical musicology was a bona fide scholarly discipline taught in conservatories universities and theological seminaries All activity in the field came to a halt however during the 75 year Soviet era when the study and practice of sacred music was severely repressed for ideological reasons with a resulting lack of published research and secondary material Consequently Russian and Western music historians church musicians and liturgical scholars as well as ordinary churchgoers whose interest in Orthodox Christianity and its art has been increasing of late have been deprived of reference works that would impart even a general knowledge of the history and development of liturgical singing in the Russian Orthodox Church The present Volume Russian Church Singing Volume 2 is the second installment of Professor Johann von Gardner's monumental work to appear in English translation The 396 page volume translated and edited by Dr Vladimir Morosan considers the development and practice of liturgical chant in the Russian lands from a variety of aspects its origins and the various cultural influences upon its formation extant manuscripts the evolution of the notation and the problematics of deciphering it into modern day notes the forces involved in its performance its stylistic evolution from exclusively monodic forms to improvised and eventually notated polyphony its earliest known composers and performing ensembles its aesthetics in relation to liturgy the language and the various problems that arose over the centuries resulting in the adoption of Westernized stylistic models around the year 1650 which marks the approximate end of the time period covered in this volume Much of this information is made accessible for the first time to the English reader and will be of interest both to the specialist and to the general reader generating a healthy demand for further research and exploration into this fascinating and hitherto unknown field Book jacket *Russian Church Singing: Orthodox worship and hymnography* Johann von Gardner, 1980 This comprehensive study is intended to serve not only as a standard reference work but also as the cornerstone and inspiration for future research into the music of the Russian Orthodox Church As its author emphasizes the music of the Orthodox Church cannot be understood in purely aesthetic categories apart from the liturgical context which determines both its content and its function Accordingly this first volume examines not only the early history of Russian chant but also the structure of Orthodox worship and the poetical forms of its hymnography Dr Johann von Gardner the eminent Russian born musicologist holds the Chair of Russian Liturgical Music at the University of Munich Over the past fifty years he has written over 300 articles on liturgical music as well as several major scholarly books This book represents the culmination of his scholarly labors St Vladimir's Seminary Press publishes a wide selection of books on Orthodox theology
