*God, Tsar, and People* Daniel B. Rowland, 2020-11-15 *God Tsar and People* brings together in one volume essays written over a period of fifty years using a wide variety of evidence texts icons architecture and ritual to reveal how early modern Russians 1450 1700 imagined their rapidly changing political world This volume presents a more nuanced picture of Russian political thought during the two centuries before Peter the Great came to power than is typically available The state was expanding at a dizzying rate and atop Russia s traditional political structure sat a ruler who supposedly reflected God s will The problem facing Russians was that actual rulers seldom or never exhibited the required perfection Daniel Rowland argues that this contradictory set of ideas was far less autocratic in both theory and practice than modern stereotypes would have us believe In comparing and contrasting Russian history with that of Western European states Rowland is also questioning the notion that Russia has always been and always viewed itself as an authoritarian country *God Tsar and People* explores how the Russian state in this

period kept its vast lands and diverse subjects united in a common view of a Christian polity defending its long frontier against powerful enemies from the East and from the West

Camfield, 2025-04-24T00:00:00Z Increasingly people are responding to the contemporary crises underwritten by capitalism by exploring the politics of communism Some have taken a sympathetic even nostalgic view of actually existing socialist AES societies past and present including the USSR China and Cuba and the Marxist Leninist political tradition associated with them They see these states as a powerful alternative to capitalism governed by parties genuinely committed to socialism and staunchly resisting Western imperialism But were these societies really in transition towards a classless stateless society of freedom the original communist goal Is Marxism Leninism the political approach that should orient people on the left now Red Flags traces the path from the 1917 Russian Revolution to the construction of the world's first AES society the USSR It also looks at the post revolution societies created along the same lines in China and Cuba Using the intellectual tools of historical materialism Red Flags argues that they were not in fact moving towards communism because the social relations remained fixed in class exploitation The workers were never liberated At a time of burgeoning anti communism from both conservatives and liberals this book is an accessible vibrant synthesis of the history of communism that draws on the latest research to develop a rigorous analysis of the contradictions and uneasy truths the left needs to confront if it is to build a genuinely liberatory alternative to capitalism
