The Institutions of Education William K. Cummings,2003-01-01 At many times in educational history including the past decade there are reports of crisis and cries for reform The successes of foreign competitors are pointed to new moneys are sought and laws passed Occasionally these reform efforts make a difference Just as often they end up as mere rhetoric and the educational indicators continue to slide Education is a dynamic sector with its ups and downs To understand these ups and downs and to gain a clearer grasp of the essentials of reform we need to look deeply into the origins and development of successful and failed reforms This book seeks to answer that need To do so it stresses two important themes First the essence of educational practice lies in the institutionalised ideals and norms of an educational system not in how much is spent on education or how many people are involved in education Second while many contemporary observers of education tend to think that sound educational practice is pretty much the same around the world this book argues that these are at least six distinctive educational InstitutionS currently in place in the modern world each with its unique strengths and weaknesses Each also has its own cycle of reform and renewal So the landscape of educational reform is much broader than most observers acknowledge The book is unique in highlighting the principle characteristics of Japanese education alongside those of Soviet Russia and the core educational systems of Western Europe and North America While the account focuses on national differences the analysis actually begins from the ground up looking at particular schools that emerged early in the six modernising experiences These early schools are described here as representative schools for the practices they initiated have had a profound influence on the direction of subsequent reforms in their respective national settings Social Justice and Third World Education Timothy J. Scrase,2021-12-12 First Published in 1997 In much of the comparative education literature questions of educational inequality and lack of educational opportunity in the developing world stand as perplexing complex and difficult problems Yet while inequality in education remains one of the most researched and written about topics in the discipline the question of social justice and its relationship to education remains implicit This volume aims to reverse this trend to make the issue of social justice both in theory and practice central and explicit **Politics, Identity and Education in Central Asia** Pinar Akçalı,Cennet Engin-Demir,2013 Focusing on the areas of politics identity and education this book looks at some of the most pressing and challenging issues that Kyrgyzstan faces in the post Soviet era It argues that Kyrgyzstan is challenged with oscillations between the old and the new on the one hand and domestic and international on the other The book analyses the process of post Soviet transition in today s Kyrgyzstan by focusing on the political elites some of the major identity problems and educational issues It discusses how Kyrgyzstan s first president in the post Soviet

era had already been an exceptional leader even prior to the collapse of the Soviet Union in terms of his democratic and liberal tendencies The book goes on to look at how identity is a major factor in the country shaped to a large extent by genealogical factors and patron client mechanisms on the one hand and religious considerations on the other Finally it highlights how education has been perceived as a very influential agent of socialization that develops not only literacy and other skills but also common attitudes and values that are considered essential to any society By evaluating these three areas the book argues that Kyrgyzstan cannot isolate itself from the demands priorities and pressures of international actors which sometimes are in conflict with the country s domestic conditions It is of interest to students and scholars of Asian Studies Politics and International Relations      Development Education in Japan Yuri Ishii,2003-05-09 This book aims to provide an explanation for the slow introduction of Development Education in Japan      **Women, Education, and Development in Asia** Grace C.L. Mak,2013-11-26 This volume of twelve original essays examines the interplay between women s education and development and if and how it has changed women s status in selected nations in Asia Educational expansion in recent decades have benefitted women in Asia at least in quantitative terms Industrialization has also created room for increased waged employment for them However the relative openness of these systems has not been paralleled at the cultural level Women in Asia which remains largely patriarchal are thus caught in contradictions This volume examines how women use and compromise with opportunities and limits in education the role of education in their economic participation and the enhancement and tension brought to their family roles The volume is edited from a cross national perspective The chapters each covering a nation rest on a common framework Each begins with a brief historical account of education for women It then investigates the extent women have been able to take advantage of them What follows is an analysis of how women use their education in the labor market and in the family Society s definition of women s roles in the family often acts to reduce the effect of schooling on women s economic participation This interplay is further complicated by such factors as social class and or caste religion and ethnicity      Gender, Equality and Education from International and Comparative Perspectives David Baker,Alexander W. Wiseman,2009-04-03 Investigates the often controversial relationship between gender equality and education from international and comparative perspectives This volume also investigates whether gender equality in education is really being achieved in schools around the world or not
