Cooper, Jennifer Carr, 1998-07 Despite economic woes and murky data global investors are pouring in Is the bubble set to burst was the question posed by Business Week in March 1997 Not according to current data which sees an ever growing river of foreign cash flowing into Moscow But how long can it last Since the collapse of the Soviet Union Russia and the CIS have become a hunting ground for business and management adventurers Management consultants business people educators and economists have rushed to do business in the New Russia taking advantage of the huge sums of money poured

into Russia by global investors But dealing with a fragile volatile and unpredictable economy is only part of the difficulty facing those wishing to take advantage of a bargain priced if risky marketplace Westerners are often faced with serious and sometimes intractable communication problems The differences in economic and political systems infrastructures national and business cultures and managerial attitudes and habits present difficulties not previously encountered elsewhere To achieve long term success in this part of the world it is essential perhaps more than anywhere to build relationships This means genuinely understanding the past as well as the present To understand Russia today it is crucial to understand where it has come from Only then can you have a stake in its future In order to have any hope of meeting long term business objectives in this most restless of countries it is essential to build intense interpersonal relationships Knowing how to do this requires an informed understanding of Russia's past as well as an appreciation of the complexities of the present transition to market economy conditions and insights into the Russian business mentality Without such knowledge all forms of management cooperation with Russia are placed under severe stress Dealing with the New Russia helps to demystify the boundaries which must be crossed by focusing on Russian and their assumptions about and attitudes to the West the new style Russian manager business executive the skills needed to initiate and develop a business relationship with Russians the Russian approach to business negotiation Extensively researched this practical accessible and informative book which includes a glossary of Russian management expressions will be invaluable for all those contemplating or embarking on major involvement with their Russian partners

Endogenous Time Preferences in Social Networks Marianna A. Klochko, Peter C. Ordeshook, 2005-01-01 Peter Ordeshook is an outstanding scholar and is addressing a very important question As he points out on the first page of Chapter 1 social norms do exist and are adhered to constitutions survive people cooperate with others in some settings but not in others The topic of this book is very exciting and important this is a real winner Elinor Ostrom Indiana University US Marianna Klochko and Peter Ordeshook address an under studied issue from rational choice theory the common assumption that individual time preferences are exogenous and fixed They then present empirical evidence to suggest that this is not the case exploring a computer simulation model that allows for the evolutionary change of time preferences This is done moreover in the context of social networks that are themselves endogenously determined

Russian Life, 1998 *Economies of Recycling* Catherine Alexander, Joshua Reno, 2012-08-09 For some recycling is a big business for others a moralised way of engaging with the world But for many this is a dangerous way of earning a living With scrap now being the largest export category from the US to China the sheer scale of this global trade has not yet been clearly identified or analysed Combining fine grained ethnographic analysis with overviews of international material flows *Economies of Recycling* radically changes the way we understand global and local economies as well as the new social relations and identities created by recycling processes Following global material chains this groundbreaking book reveals astonishing connections between persons households cities and global regions as objects are reworked taken to pieces and

hitherto neglected genre of popular printed text It examines the evolution of advice literature from the Enlightenment to the post Soviet era from translations of F nelon and Madame de Lambert in the 1760s and of Samuel Smiles in the late nineteenth and early twentieth centuries to tracts by Gogol and Tolstoi Soviet pamphlets on how to be cultured and post Soviet guides to window treatments It draws on a huge range of sources memoirs novelised conduct books such as Anna Karenina parody advice literature letters and reviews to examine the broader significance of how to books and their relationship with daily life byt as construct and as lived reality The result is a book that not only makes a major contribution to the study of popular culture but also throws an unexpected and revealing light on Russian history more broadly

Tattered Banners Walter Connor, 2018-05-04 In post Soviet Russia s transition to new political and economic systems few issues are as important as labor Although the worker s paradise may have been largely imaginary the loss of job security and benefits that has accompanied marketization could well become a catalyst for yet another political upheaval In this timely book Walter Connor explores how the Yeltsin government attempted to avoid this pitfall of system change Connor examines Russia s emergent labor politics in the critical first years of the post Soviet period focusing on the problems Yeltsin encountered in attempting to adopt a corporatist solution to the conflicts of interest that have arisen between labor employers and the state With many employers still heavily dependent on the state while others are already beyond state control the corporatist effort has been sabotaged Connor contends by the lack of distinct interest groups found in more mature market economies He concludes with an analysis of what these recent developments may portend for Russian politics and government in the future
