Patent and Trademark Office,2002      **Idoru** William Gibson,2003-01-07 The best novel William Gibson has ever written about the world we re entering daily Neuromancer made Gibson famous Idoru cements that fame The Washington Post Book World 21st century Tokyo after the millennial quake Neon rain Light everywhere blowing under any door you might try to close Where the New Buildings the largest in the world erect themselves unaided their slow rippling movements like the contractions of a sea creature Colin Laney is here looking for work He is an intuitive fisher for patterns of information the signature an individual creates simply by going about the business of living But Laney knows how to sift for the dangerous bits Which makes him useful to certain people Chia McKenzie is here on a rescue mission She s fourteen Her idol is the singer Rez of the band Lo Rez When the Seattle chapter of the Lo Rez fan club decided that he might be in trouble in Tokyo they sent Chia to check it out Rei Toei is the idoru the beautiful entirely virtual media star adored by all Japan Rez has declared that he will marry her This is the rumor that has brought Chia to Tokyo True or not the idoru and the powerful interests surrounding her are enough to put all their lives in danger      **Annual Meeting** Kōbunshi Gakkai (Japan),1992      **Disordered Attention** Claire Bishop,2024-06-11 How technology and the politics of attention changed the way we look at art The ways we encounter contemporary art and performance has changed How are we expected to engage with today s diverse practice Is the old model of close looking still the ideal or has it given way to browsing skimming and sampling Across four provocative and insightful essays art historian and critic Claire Bishop identifies trends in contemporary practice Charting a critical path through the last three decades Bishop pinpoints how spectatorship and visual literacy are evolving under the pressures of digital technology She explores how researched based exhibitions have proliferated turning the artist into an investigator or archivist with mixed results Spatial performance can now involve the artist dancers or even the audience as participants often framed with Instagram in mind The political event is not longer activated without an understanding of the media that will record and distribute it The proliferation of works that use modernist architecture is noticeable but has this become a shorthand for something else Disordered Attention is a vital survey of 21st century art from one of the leading art thinkers of our times      **Capture Japan** Marco Bohr,2022-12-01 Capture Japan investigates the formation of visual tropes and how these have contributed to perceptions of Japan in the global imagination The book proposes that images are not incidental in the formation of such perceptions but central to notions about identity history and memory From a tentative western ally in 1952 to a soft power superpower with a huge global influence in the 21st century the book locates questions about Japan in the global imagination to the country s transforming geopolitical position By adopting an interdisciplinary approach with a multiplicity of perspectives from around the world Capture Japan goes beyond binarisms to uncover how images can also

produce discourses that challenge subvert or even contradict each other The word capture in the title of the book recognises both the deeply problematic role that images have played in relation to colonialism as well as the potential dominance that visual spectacles can wield in a contemporary context Diverse essays from a wide range of perspectives investigate the institutional framework that has allowed certain types of images of Japan to be promoted while others have been suppressed In doing so the book points to a vast network of images that have shaped the perception of Japan both from within and from outside revealing how these images are inextricably linked to wider ideological political cultural or economic agendas

**Do Metaphors Dream of Literal Sleep?** Seo-Young Chu, 2011-01-15 In culture and scholarship science fictional worlds are perceived as unrealistic and altogether imaginary Seo Young Chu offers a bold challenge to this perception of the genre arguing instead that science fiction is a form of high intensity realism capable of representing non imaginary objects that elude more traditional realist modes of representation Powered by lyric forces that allow it to transcend the dichotomy between the literal and the figurative science fiction has the capacity to accommodate objects of representation that are themselves neither entirely figurative nor entirely literal in nature Chu explores the globalized world cyberspace war trauma the Korean concept of han and the rights of robots all as referents for which she locates science fictional representations in poems novels music films visual pieces and other works ranging within and without previous demarcations of the science fiction genre In showing the divide between realism and science fiction to be illusory *Do Metaphors Dream of Literal Sleep* sheds new light on the value of science fiction as an aesthetic and philosophical resource one that matters more and more as our everyday realities grow increasingly resistant to straightforward representation

A Critical History of Contemporary Architecture Asst Prof David Rifkind, Dr Elie G Haddad, 2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects      Asian Art News , 2003
