**Climate Change and Environmental Impacts: Past, Present and Future Perspective** Binita Phartiyal, Rahul Mohan, Supriyo Chakraborty, Venkatesh Dutta, Anil Kumar Gupta, 2023-01-17 Earth's climate varies even without human influence but the acceleration in the changing pattern with cause and effect by the civilisation is a matter of concern to scientists. These patterns are lessons to understand future trends and ways and means for mitigation. The extreme weather events in almost every region of the globe involving excessive loss of human life and property are causing anxiety in society and posing challenges before scientists and planners. Cyclical variations in the Earth's climate occur at multiple time scales from years to decades, centuries and millennia. Cycles at each scale are caused by a variety of physical mechanisms. In the last 65 Ma only there have been several cycles of glacial advances and retreat with the abrupt end of the last ice age about 11 700 years ago marking the beginning of the modern climate era and human civilization. A multidisciplinary approach in studying the Earth's changing climate will provide a holistic view and guide us in future planning and programming. Past Times Kwok B. Chan, Chee Kiong Tong, 2003 This book aims to bring us to the deeper human level of Singapore's history thus also its future. With over 150 photographs from Singapore's National Heritage Board and hitherto unpublished private collections Singapore's social history goes under the lens of eleven ethnographers unfolding hidden and forgotten facets of the nation's early years. *Planning Singapore* Stephen Hamnett, Belinda Yuen, 2019-05-08 Two hundred years ago Sir Stamford Raffles established the modern settlement of Singapore with the intent of seeing it become a great commercial emporium and fulcrum. But by the time independence was achieved in 1965 the city faced daunting problems of housing shortage, slums and high unemployment. Since then Singapore has become one of the richest countries on earth providing in Sir Peter Hall's words perhaps the most extraordinary case of economic development in the history of the world. The story of Singapore's remarkable achievements in the first half century after its independence is now widely known. In *Planning Singapore: The Experimental City* Stephen Hamnett and Belinda Yuen have brought together a set of chapters on Singapore's planning achievements, aspirations and challenges which are united in their focus on what might happen next in the planning of the island state. Chapters range over Singapore's planning system, innovation and future economy, housing, biodiversity, water and waste, climate change, transport and the potential transferability of Singapore's planning knowledge. A key question is whether the planning approaches which have served Singapore so well until now will suffice to meet the emerging challenges of a changing global economy, demographic shifts, new technologies and the existential threat of climate change. Singapore as a global city is becoming more unequal and more diverse. This has the potential to weaken the social compact which has largely existed since independence and to undermine the social resilience undoubtedly needed to cope with the shocks and disruptions of the twenty-first century. The book concludes however that Singapore is better placed than most to respond to the challenges which it will certainly face thanks to its outstanding systems of planning and implementation. a

proven capacity to experiment and a highly developed ability to adapt quickly purposefully and pragmatically to changing circumstances

[The Human Rights Covenants at 50](#) Daniel Moeckli, Helen Keller, Corina Heri, 2018-06-07 Half a century ago on 16 December 1966 the UN General Assembly adopted the International Covenant on Civil and Political Rights ICCPR and the International Covenant on Economic Social and Cultural Rights ICESCR While the adoption of the two UN human rights covenants was celebrated all over the world their 50th anniversary has received very little attention from the international community The present book marks this anniversary by taking stock of the first half century of the existence of what are probably the world s two most important human rights treaties It does so by reflecting on what the covenants have achieved or failed to achieve in the years that have passed by determining and comparing their current influence in the various regions of the world and by assessing their potential roles in the future The book contains papers that were presented during a symposium held in Zurich in 2016 which brought together experts and stakeholders from a range of disciplines and world regions Some fundamental issues that are addressed by the contributors are as old as

the two covenants themselves They concern for example the division of human rights into first and second generation rights and the question of whether there should be one central monitoring body possibly a world court or more than just one However the contributors go beyond such questions that have been explored before they develop new answers to old questions and point to new challenges
