A History of Modern Tourism Eric Zuelow, 2015-10-26 Tourism is one of the largest industries in the world yet leisure travel is more than just economically important. It plays a vital role in defining who we are by helping to place us in space and time. In so doing it has aesthetic, medical, political, cultural, and social implications. However, it hasn't always been so. Tourism as we know it is a surprisingly modern thing, both a product of modernity and a force helping to shape it. *A History of Modern Tourism* is the first book to track the origins and evolution of this pursuit from earliest times to the present. From a new understanding of aesthetics to scientific change from the invention of steam power to the creation of aircraft, from an elite form of education to family car trips to see national shrines, this book offers a sweeping and engaging overview of a fascinating story not yet widely known.

Conflicted American Landscapes David E. Nye, 2021-04-27 How conflicting ideas of nature threaten to fracture America's identity. Amber waves of grain, purple mountain majesties. American invest much of their national identity in sites of natural beauty. And yet American lands today are torn by conflicts over science, religion, identity, and politics. Creationists believe that the Biblical flood carved landscapes less than 10,000 years ago; environmentalists protest pipelines; Western states argue that the federal government's land policies throttle free enterprise; Native Americans demand protection for sacred sites. In this book, David Nye looks at Americans' irreconcilably conflicting ideas about nature. A landscape is conflicted when different groups have different uses for the same location: for example, when some want to open mining sites that others want to preserve, or when suburban development impinges on agriculture. Some landscapes are so degraded from careless use that they become toxic anti-landscapes. Nye traces these conflicts to clashing conceptions of nature ranging from pastoral to Native American to military industrial that cannot be averaged into a compromise. Nye argues that today's environmental crisis is rooted in these conflicting ideas about land. Depending on your politics, global warming is either an inconvenient truth or fake news. America's contradictory conceptions of nature are at the heart of a broken national consensus.

Religion and Tourism Michael Stausberg, 2012-11-12 This book explores the dynamic interaction between religion and tourism in the modern world. It considers questions such as: do travellers leave their religion at home when they are touring, and what happens if not? What are the relationships between tourism and pilgrimage? What happens to religious performances, places, and festivals that function as tourism attractions? Other chapters examine religious theme parks, wellness and spa tourism, the roles played by tourist guides, guidebooks, and religious souvenirs, and the role of tourism as a major arena of religious encounters in the contemporary world. Surveying the growing body of work in the field, Michael Stausberg argues that tourism should be a major focus of research within religious studies.

Visiting Mackinac Frank Boles, 2025-12-01 The Straits of Mackinac have been a tourist destination for more than 150 years. The story of how tourism developed on Mackinac Island and in the adjacent communities of St Ignace and Mackinaw City is brought to life in this fascinating book with stories from the people who helped shape it. This complex work explores

the factors that shaped this region into the tourist destination that it is today It includes historical context of how conflicting ideas developed a seasonal tourist industry and examines how tourism at the Straits of Mackinac developed within regional and national contexts as the tourist industry boomed in the late nineteenth and twentieth centuries This volume also shows how the people at the Straits responded to various national trends such as when the automobile transformed the tourist experience and when independently published travel literature painted a less than rosy picture of the region

Vacationland William Philpott, 2013-08-30 Winner of the Western Writers of America 2014 Spur Award for Best Western Nonfiction Contemporary Mention the Colorado high country today and vacation imagery springs immediately to mind mountain scenery camping hiking skiing and world renowned resorts like Aspen and Vail But not so long ago the high country was isolated and little visited Vacationland tells the story of the region's dramatic transformation in the decades after World War II when a loose coalition of tourist boosters fashioned alluring images of nature in the high country and a multitude of local state and federal actors built the infrastructure for high volume tourism ski mountains stocked trout streams motels resort villages and highway improvements that culminated in an entirely new corridor through the Rockies Interstate 70 Vacationland is more than just the tale of one tourist region It is a case study of how the consumerism of the postwar years rearranged landscapes and revolutionized American environmental attitudes Postwar tourists pioneered new ways of relating to nature forging surprisingly strong personal connections to their landscapes of leisure and in many cases reinventing their lifestyles and identities to make vacationland their permanent home They sparked not just a population boom in popular tourist destinations like Colorado but also a new kind of environmental politics as they demanded protection for the aesthetic and recreational qualities of place that promoters had sold them Those demands energized the American environmental movement but also gave it blind spots that still plague it today Peopled with colorful characters richly evocative of the Rocky Mountain landscape Vacationland forces us to consider how profoundly tourism changed Colorado and America and to grapple with both the potential and the problems of our familiar ways of relating to environment nature and place
