evolutionary legacy has shaped the development of religion and continues to profoundly influence its expression The book focuses on the image of God as the dominant male in Judaism Christianity and Islam This traditional God concept is seen as a reflection of the dominant ape paradigm so evident in the hierarchical social structures of primates with whom we have a strong genetic connection The author describes the main features of male dominated primate social hierarchies specifically the role of the alpha male as the protector of the group his sexual dominance and use of violence and oppression to attain food females and territory in group altruism vs out group hostility us vs them and displays of dominance and submission to establish roles within the social hierarchy The parallels between these features of primate society and human religious rituals and concepts make it clear that religion especially its oppressive and violent tendencies is rooted in the deep evolutionary past This incisive analysis goes a long way toward explaining the historic and ongoing violence committed in the name of religion

organizing principle this book illustrates how Heschel's thought presents a balance between the rational and mystical poles of the Jewish tradition. A careful content analysis of his thinking reveals that Heschel is an authentic Jewish voice who presents an accurate Jewish theology. The first chapter is devoted to the Hasidic influence on Heschel which Kasimow feels is most important for understanding Heschel's thought. The final chapter focuses on Heschel's unique attitude toward Asian religious traditions which are becoming critical for authentic religious dialogue today. Hernández, 2010-01-01. In recent decades, Chicana/o literary and cultural productions have dramatically shifted from a nationalist movement that emphasized unity to one that openly celebrates diverse experiences. Charting this transformation, *Postnationalism in Chicana/o Literature and Culture* looks to the late 1970s during a resurgence of global culture as a crucial turning point whose reverberations in twenty-first-century late capitalism have been profound. Arguing for a postnationalism that documents the radical politics and aesthetic processes of the past while embracing contemporary cultural and sociopolitical expressions among Chicana/o peoples, Hernández links the multiple forces at play in these interactions.

Reconfiguring text based analysis she looks at the comparative development of movements within women's rights and LGBTQI activist circles Incorporating economic influences this unique trajectory leads to a new conception of border studies as well rethinking the effects of a restructured masculinity as a symbol of national cultural transformation Ultimately positing that globalization has enhanced the emergence of new Chicana/o identities Hernandez cultivates important new understandings of borderlands identities and postnationalism itself *Encyclopedia of Nineteenth-century Thought* Gregory Claeys, 2005 Covering the period from 1789 to 1914 this work primarily deals with key figures and ideas in social and political thinking but entries also include science religion law art concepts of modernity the body and health thereby covering comprehensively the intellectual history of the period [Black Elk Speaks](#) John G.
