Introduction to Development Economics Subrata Ghatak, 2003 Charged with analysing and criticising the way economies develop and grow development economists play a vital role in attempting to reduce inequality across the world The fourth edition of this classic textbook introduces students to this vital field All of the popular aspects of earlier editions are retained with new additions such as the introduction of endogenous growth theory The book also includes the very latest World Bank development data With vastly improved and updated pedagogical features such as new topical case studies and questions for discussion Subrata Ghatak introduces what can be a difficult topic with a welcome clarity

Economics, Natural-Resource Scarcity and Development (Routledge Revivals) Edward B Barbier, 2013-06-26 Global warming is an increasing problem tropical forests are being wiped out and major upper watersheds are being degraded Using insights provided by environmentalism ecology and thermo dynamics this book first published in 1989 outlines an economic approach to the use of natural resources and particularly to the problem of environmental degradation Edward Barbier reviews and critiques the long past of environmental and resource economics and then goes on to elaborate an economics which allows us to develop alternative strategies for dealing with the problems faced With examples drawn from Latin America and Indonesia he not only develops a major theoretical advance but shows how it can be applied Barbier s work is an important and relevant contribution to the discussion surrounding the economics of environmental sustainability

Economics of Land Degradation and Improvement - A Global Assessment for Sustainable Development Ephraim Nkonya, Alisher Mirzabaev, Joachim von Braun, 2015-11-11 This volume deals with land degradation which is

occurring in almost all terrestrial biomes and agro ecologies in both low and high income countries and is stretching to about 30% of the total global land area About three billion people reside in these degraded lands However the impact of land degradation is especially severe on livelihoods of the poor who heavily depend on natural resources The annual global cost of land degradation due to land use and cover change LUCC and lower cropland and rangeland productivity is estimated to be about 300 billion USD Sub Saharan Africa SSA accounts for the largest share 22% of the total global cost of land degradation Only about 38% of the cost of land degradation due to LUCC which accounts for 78% of the US 300 billion loss is borne by land users and the remaining share 62% is borne by consumers of ecosystem services off the farm The results in this volume indicate that reversing land degradation trends makes both economic sense and has multiple social and environmental benefits On average one US dollar investment into restoration of degraded land returns five US dollars The findings of the country case studies call for increased investments into the rehabilitation and restoration of degraded lands including through such institutional and policy measures as strengthening community participation for sustainable land management enhancing government effectiveness and rule of law improving access to markets and rural services and securing land tenure The assessment in this volume has been conducted at a time when there is an elevated interest in private land investments and when global efforts to achieve sustainable development objectives have intensified In this regard the results of this volume can contribute significantly to the ongoing policy debate and efforts to design strategies for achieving sustainable development goals and related efforts to address land degradation and halt biodiversity loss
