European Drawings 2 George R. Goldner, Lee Hendrix, Kelly Pask, 1992-10-08 The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century As in the first volume devoted to the collection published in 1988 in English and Italian editions the text is here organized first by national school then alphabetically by artist with individual works arranged chronologically For each drawing the authors provide a discussion of the work's style dating iconography and relationship to other works as well as provenance and a complete bibliography The Idol in the Age of Art Rebecca Zorach, 2017-07-05 After 1500 as Catholic Europe fragmented into warring sects evidence of a pagan past came newly into view and travelers to distant places encountered deeply unfamiliar visual cultures it became ever more pressing to distinguish between the sacred image and its opposite the idol Historians and philosophers have long attended to Reformation charges of idolatry the premise for image breaking but only very recently have scholars begun to consider the ways that the idol occasioned the making no less than the destruction The present book focuses on how idols and ideas about them matter for the history of early modern objects produced around the globe especially those created in the context of an exchange or confrontation between an us and a them Ranging widely within the early modern period the volume contributes to the project of globalizing the study of European art bringing the continent's commercial colonial antiquarian and religious histories into dialogue Its studies of crosses statues on columns wax ex votos ivories prints maps manuscripts fountains banners and New World gold all frame Western art simultaneously as an idea and as a collection of real things arguing that it was through the idol that object makers and writers came to terms with what it was that art should be and do The Religious Paintings of Hendrick ter Brugghen Natasha T. Seaman, 2017-07-05 The first in depth study of the Utrecht artist to address questions beyond connoisseurship and attribution this book makes a significant contribution to Ter Brugghen and Northern Caravaggist studies Focusing on the Dutch master's simultaneous use of Northern archaisms with Caravaggio's motifs and style Natasha Seaman nuances our understanding of Ter Brugghen's appropriations from the Italian painter Her analysis centers on four paintings all depicting New Testament subjects They include Ter Brugghen's largest and first known signed work *Crowning with Thorns* his most archaizing the Crucifixion and the two paintings most directly related to the works of Caravaggio the *Doubting Thomas* and the *Calling of Matthew* By examining the ways in which Ter Brugghen's paintings deliberately diverge from Caravaggio's Seaman sheds new light on the Utrecht artist and his work For example she demonstrates that where Caravaggio's paintings are boldly illusionistic and mimetic thus de-emphasizing their materiality Ter Brugghen's works examined here create the opposite effect connecting their content to their made form This study not

only illuminates the complex meanings of the paintings addressed here but also offers insights into the image debates and the status of devotional art in Italy and Utrecht in the seventeenth century by examining one artist's response to them

The Ashgate Research Companion to Dutch Art of the Seventeenth Century Wayne Franits, 2017-07-05 Despite the tremendous number of studies produced annually in the field of Dutch art over the last 30 years or so and the strong contemporary market for works by Dutch masters of the period as well as the public's ongoing fascination with some of its most beloved painters until now there has been no comprehensive study assessing the state of research in the field As the first study of its kind this book is a useful resource for scholars and advanced students of seventeenth century Dutch art and also serves as a springboard for further research Its 19 chapters divided into three sections and written by a team of internationally renowned art historians address a wide variety of topics ranging from those that might be considered traditional to others that have only drawn scholarly attention comparatively recently

The Rise of the Joyful Economy Michael Hutter, 2015-03-24 This

book argues for the increasing importance of the arts as a major resource in fuelling growth through the experiential dimension of today's economy. As we move from the knowledge economy to a new stage called the joyful economy, consumers shift their spending from physical objects and technical know-how to experiences of joy and disappointment. This book investigates how artistic ideas are translated into successful commercial production and how economic growth impacts artistic invention. It examines cases of successful innovation in the creative industries ranging from the Italian Renaissance to the present. The book suggests a framework where social players move in diverse worlds of value which leads to a stream of controversies and manias that result in the establishment of new joy products. Studies include the effect of linear perspective as pioneered by Filippo Brunelleschi, the discovery of taste as an argument for consumption, the serial production of Pop Art and the self-commercialization of contemporary works by artists like Takashi Murakami. This theoretical and empirical study brings together the fields of cultural economics, economic sociology, management studies and cultural history. In doing so, it offers a fascinating study of how creativity has shaped and fuelled commerce. **Holland** Esther Singleton, 1908
