Julia Moses, Julia Woesthoff, 2021-05-16 This collection investigates intermarriage and related relationships around the world since the eighteenth century The contributors explore how intimate relationships challenged boundary crossings of various kinds social geographic religious ethnic To this end the volume considers a range of related issues Who participated in these unions How common were they and in which circumstances were they practised or banned Taking a global view the book also questions some of the categories behind these relationships For example how did geographical boundaries across national lines distinctions between colonies and metropolises or metaphors of the East and the West shape the treatment of intermarriage What role have social and symbolic boundaries such as presumed racial religious or socio economic divides played To what extent and how were those boundaries blurred in the eyes of contemporaries Not least how have bureaucracies and law contributed to the creation of boundaries preventing romantic unions Intimate relationships the contributors suggest brought into sharp relief assumptions not only about community and culture but also about the sanctity of the sphere of love and family The chapters in this book were originally published as a special issue of *The History of the Family*

*Population Policy and Reproduction in Singapore* Shirley Hsiao-Li Sun, 2012-07-26 This book examines the relationship between population policies and individual reproductive decisions in low fertility contexts Using the case study of Singapore it demonstrates that the effectiveness of population policy is a function of competing notions of citizenship and the gap between seemingly neutral policy incentives and the perceived and experienced disparate effects Drawing on a substantial number of personal interviews and focus groups the book analyzes the developmental welfare state's overarching emphasis of citizen responsibility and examines population policies that reinforce social inequalities and ignore cultural diversity These factors combine to undermine elaborate state policy efforts in encouraging citizens biological reproduction The book goes on to argue that in order to facilitate positive fertility decisions the state needs to modify the economic production at all cost approach and pay much more attention to the importance of social rights This suggests that the Singapore government might profitably approach the phenomenon of very low fertility with major initiatives similar to those
