**Marriage Dissolution in Singapore** Paulin Straughan,2009-01-31 The meanings of marriage and divorce have shifted significantly in the past few decades particularly in economies in Asia where rapid economic growth has transformed the social fabric This book arises from possibly the most comprehensive study of divorce done in Singapore The study highlights the root causes of divorce and focuses on the impact of changing ideologies on marital stability Themes that surfaced in the appreciation of why some marriages fail include women s changing expectations and their roles in the family courtship expectations and the role of romantic love parenthood demands and work stressors The discussions are drawn from data collected from a large scale representative survey of a study group comprising dissolved marriages as well as a control group of intact marriages Scholars investigating marriage and family in Asia will find the rich data content useful The sociological insight makes the book a relevant read for all interested in family dynamics

Research Handbook on Family Property and the Law Margaret Briggs,Andy Hayward,2024-06-05 This pivotal Research Handbook analyses the interconnectedness of family property and the law through historical contemporary comparative and jurisdiction specific lenses Authors analyse some of the most well known contested and politicised legal developments in the field of family property law

Neoliberal Morality in Singapore Youyenn Teo,2013-11-11 Using the case study of Singapore this book examines the production of a set of institutionalized relationships and ethical meanings that link citizens to each other and the state It looks at how questions of culture and morality are resolved and how state society relations are established that render paradoxes and inequalities acceptable and form the basis of a national political culture The Singapore government has put in place a number of policies to encourage marriage and boost fertility that has attracted much attention and are often taken as evidence that the Singapore state is a social engineer The book argues that these policies have largely failed to reverse demographic trends and reveals that the effects of the policies are far more interesting and significant As

Singaporeans negotiate various rules and regulations they form a set of ties to each other and to the state These institutionalized relationships and shared meanings referred to as neoliberal morality render particular ideals about family natural Based on extensive field work the book is a useful contribution to studies on Asian Culture and Society Globalisation as well as Development Studies *Family and Population Changes in Singapore* Wei-Jun Jean Yeung, Shu Hu, 2018-04-17 This book depicts the evolution of Singapore's family and population landscape in the last half a century the related public policies and future challenges Since the country gained independence in 1965 family and population policies have been integral to her nation building strategies The chapters discuss the changes in population compositions family structures relations and values among major ethnic groups They also discuss policies for vulnerable populations such as female headed households cross cultural families same sex partnering the elderly and low income families Singapore Souchow Yao, 2007-02-12 Taking ideas and frameworks from philosophy psychology political science cultural studies and anthropology this book tells the larger truth about the Singapore state This book argues that this strong hegemonic state achieves effective rule not just from repressive policies but also through a combination of efficient government good standard of living tough official measures and popular compliance Souchow Yao looks at the reasons behind the hegemonic ruling examining key events such as the caning of American teenager Michael Fay the judicial ruling on fellatio and unnatural sex and Singapore's war on terror to show the ways in which the State manages these events to ensure the continuance of its power and ideological ethos Lively and well written this book discusses key subject areas such as leftist radicalism and communist insurgency nation building as trauma Western yellow culture and Asian Values judicial caning and the meaning of pain the law and oral sex food and the art of lying cinema as catharsis Singapore after September 11 *The Contemporary Family in Singapore* Eddie C. Y. Kuo, Aline K. Wong, 1979 Twelve essays on the sociology of the family in Singapore in the modern period **New Directions and Trends in Parenting Research** Nicolette Vanessa Roman, Yosi Yaffe, Dorit Alt, 2024-08-28 For many decades parenting has been at the center of interest for practitioners and researchers interested in child social and psychological development The body of research on children's socialization has primarily focused on traditional parenting styles and their related practices in the spirit of Baumrind's and others conceptualization of parental control and power assertion e.g authoritative authoritarian and permissive This research has revealed many domains of children's and adolescents adjustment and wellbeing that are affected by and affecting parenting quality but intriguing new parental approaches and types have recently emerged in research literature such as digital parenting transcendent parenting parental alienation overparenting helicopter parenting tiger parenting and several others about which more is yet to be learned Likewise in recent years our understanding of the role played by factors such as culture ethnicity environmental and familial background in the relationship between parenting styles and children's psychological wellbeing and mental health has greatly improved However the question of whether or not there is a global uniform optimal parenting remains controversial

as more studies are required to better understand the varying impacts of parenting on the child's well-being within different demographic and familial contexts. This is especially true for families with special needs children, i.e. children and adolescents with developmental and psychological disabilities where research on parenting styles in particular is understudied. Additionally, in the present digital era, there is growing interest in relatively new behavioral outcomes in children and adolescents such as sedentary behaviors including eating and nutrition habits, online behaviors, and digital activity vs. physical activity. These and other important contemporary aspects in children's functioning and behaviors contribute to developmental mental health, and further establishing our knowledge regarding the parental role in these contexts is essential.
