Shame Confessionas Of The Father Of The Neutron Bomb:

Under the Cap of Invisibility Lucie Genay, 2025-05-13 Pantex was built during World War II near the town of Amarillo Texas The site was converted early in the Cold War to assemble nuclear weapons and produce high explosives For nearly fifty years Pantex has been the sole assembly and disassembly plant for nuclear weapons in the United States Today most of the activities of the plant consist of the manufacture of high explosive components and the dismantlement or life extension of weapons including retrofitting aging warheads in the United States s arsenal Unlike the much more famous nuclear weapons production sites at Los Alamos Oak Ridge Hanford and Rocky Flats the Pantex plant has drawn little attention hidden under a metaphoric cap of invisibility Lucie Genay now lifts that invisibility cap to give the world its first in depth look at Pantex and the people who have spent their lives as neighbors and employees of this secretive industry The book investigates how Pantex has impacted local identity by molding elements of the past into the guaranty of its future and its concealment It further examines the multiple facets of Pantexism the reasons for embracing nuclear weapons production as a solution to economic woes the resulting dependence on this industry and the unconditional support for the facility through the voices of native and adoptive Panhandlers

The Ruin of J. Robert Oppenheimer Priscilla J. McMillan, 2018-03-18 This groundbreaking Cold War history reveals the government conspiracy to bring down America s most famous scientist On April 12 1954 the nation was astonished to learn that J Robert Oppenheimer was facing charges of violating national security Could the man who led the effort to build the atom bomb really be a traitor In this riveting book Priscilla J McMillan draws on newly declassified U S government documents and materials from Russia as well as in depth interviews to expose the conspiracy that destroyed the director of the Manhattan Project This meticulous narrative recreates the fraught years from 1949 to 1955 when Oppenheimer and a group of liberal scientists tried to head off the cabal of air force officials anti Communist politicians and rival scientists who were trying to seize control of U S policy and build ever more deadly nuclear weapons Retelling the story of Oppenheimer s trial which took place in utmost secrecy she describes how the government made up its own rules and violated many protections of the rule of law McMilliam also argues that the effort to discredit Oppenheimer occurring at the height of the McCarthy era and sanctioned by a misinformed President Eisenhower was a watershed in the Cold War poisoning American politics for decades and creating dangers that haunt us today

Will Terrorists Go Nuclear? Brian Michael Jenkins, 2009-12-02 For more than 30 years Jenkins has been advising the military government and prestigious think tanks on the dangers of nuclear proliferation Now he goes beyond what the experts know to examine how terrorists themselves think about such weapons

Latin American Political Yearbook Jr. Breene, 2018-01-16 In the sixth volume of this annual series Robert G Breene provides a comprehensive overview analysis and summary of the political and economic trends and events in Central America MERCOSUR the Andean and Caribbean nations and Mexico Analyzing these developments within the individual nations their respective regions and the world at large this yearbook

offers a timely look at the relevant background and information necessary to understand the changing nature of politics in Latin America today. A significant development has been the growing nexus of Marxist Leninist and Muslim terrorism. Before the turn of the new century, portents of this development were discernable in the long terrorist war conducted against the democratic West by those followers of Lenin, Stalin, and their successors. This has now been transformed into a crusade against non-Muslim societies. The materials included here attest to the fact that the hemispheric left and Cuba were involved in terror long before it suddenly materialized in the United States. As this volume records, Castro was in Teheran in May 2001 where he pledged that the peoples and governments of Iran and Cuba can bring the U.S. to its knees. Four months later, terrorists of the Al Qaeda network destroyed the World Trade Center and struck the Pentagon. In replying to this outrage, the Bush administration identified an Axis of Evil which did not include either the Cuban or Chinese Communist regimes, two original seats of international terror. As this volume demonstrates, however, whether neatly includable in the axis or otherwise, Castro and his political allies, including Hugo Rafael Chávez Frías of Venezuela, Lula da Silva of Brazil, and others, are closely associated with at least one avowed member state of the Axis. In addition to its analysis of these and other new developments, the Yearbook continues its invaluable coverage of election results throughout Latin America. Brimming with information not readily available through the American media, this series is essential reading for political scientists, journalists, Latin America area specialists, and historians. Robert G. Breene Jr. has been a fighter pilot, a newspaper correspondent in Central America, a professor of physics, and the owner and operator of a 600-head cattle ranch in Nevada. He is currently head of the Latin American News Syndicate in San Antonio, Texas.

Emerging Technologies and International Stability Todd S. Sechser, Neil Narang, Caitlin Talmadge, 2021-11-28. Technology has always played a central role in international politics; it shapes the ways states fight during wartime and compete during peacetime. Today, rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era. Emerging technologies have inspired much speculative commentary, but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics. This book aims to contribute to the debate by exploring the role of technology, both military and non-military, in shaping international security. Specifically, the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability, test them with sound empirical methods, and derive their implications for the coming technological age. This book is very novel in its approach. It covers a wide range of technologies, both old and new, rather than emphasizing a single technology. Furthermore, this volume looks at how new technologies might affect the broader dynamics of the international system, rather than limiting the focus to a stability. The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process. The chapters begin with competition in peacetime, move to deterrence and coercion, and then explore the dynamics of crises, the outbreak of conflict, and war escalation in an environment of emerging technologies. The chapters in this book, except for the

The Obits: New York Times Annual 2012 William McDonald, 2011-11-11 The obits It s the first section many of us turn to when we open the paper not to see who died but rather to find out about who lived to discover the interesting lives of people who ve made a mark A new annual that collects nearly 300 of the best of The New York Times obituaries from the previous year The Obits Annual 2012 is a compelling addictive as salted peanuts who s who of some of the most fascinating people of the twentieth century Written by top journalists each entry is a jewel a miniature nuanced biography filled with the facts we love to read with the surprise and serendipity of life There s David L Wolper the producer of Roots and the story of how he got his start purchasing film footage from Sputnik The jazz singer Abbey Lincoln and her change from glamorous performer she owned a dress of Marilyn Monroe s to civil rights activist she burned the Monroe dress Owsley Stanley the quirky perfecter of LSD who blamed a heart attack on the fact that his mother made him eat broccoli as a child Patricia Neal known by most as a movie star but her real life filled with tragedy adversity and incredible professional ups and downs is almost a surreal play of triumph and tragedy Arranged chronologically like the obits themselves it s a deliciously random walk through the recent past meeting the philosophers newsmen spies publishers moguls soul singers baseball managers Nobel Prize winners models and others who ve shaped the world
