Shaping Technology Building Society Studies In Sociotechnical Change Inside Technology:

Shaping Technology / Building Society Wiebe E. Bijker, John Law, 1994-09-29 Building on the influential book *The Social Construction of Technological Systems* this volume carries forward the project of creating a theory of technological development and implementation that is strongly grounded in both sociology and history Technology is everywhere yet a theory of technology and its social dimension remains to be fully developed Building on the influential book *The Social Construction of Technological Systems* this volume carries forward the project of creating a theory of technological development and implementation that is strongly grounded in both sociology and history The 12 essays address the central question of how technologies become stabilized how they attain a final form and use that is generally accepted The essays are tied together by a general introduction part introductions and a theoretical conclusion The first part of the book examines and criticizes the idea that technologies have common life cycles three case studies cover the history of a successful but never produced British jet fighter the manipulation of patents by a French Renault two studies argue for a strong sociotechnology in which artifact and social context are viewed as a single seamless web while the third looks at the ways in which a social program is a technology

Inside the Politics of Technology Hans Harbers, 2005 Though the old saying claims that man is the measure of all things the authors of *Inside the Politics of Technology* argue that the distinction implied between autonomous humans and neutral instruments of technology is an illusion On the contrary the technologies humans create simultaneously shape humans themselves By means of case studies of technologies as diverse as video cameras electric cars pregnancy tests and genetic screenings this volume considers the implications of this co production of technology and society for our philosophical and political ideas Are only humans endowed with social political and moral agency or does our technology share those qualities And if so how should we understand or practice a politics of technology

Keeping Autonomous Driving Alive Göde Both, 2020-04-20 Eine radikal neue Alternative zum Studium von Visionen Aufbauend auf Literatur aus den Bereichen Science Technology Studies Wissenschaftskommunikation und Gender Studies untersucht der Autor die Ambivalenz und Fragilität von technologischen Visionen Videodemonstrationen und Straßenerfahrungen in den Händen von Forschenden die sich mit selbstfahrenden Autos beschäftigen Das Buch ist für Soziologinnen und Anthropologinnen mit Fokus auf Technik Geschlecht und Mobilität von interessant die sich mit der Unsicherheit in der technologischen Forschung und mit den widersprüchlichen Anforderungen bei der Vermittlung von Wissenschaft beschäftigen Gleichzeitig bietet die Studie Wissenschaftlerinnen in den Bereichen Robotik künstliche Intelligenz und Automobiltechnik eine Möglichkeit ihrer Beteiligung am selbstfahrenden Auto nachzudenken

Political Theory and Community Building in Post-Soviet Russia Oleg Kharkhordin, Risto Alapuro, 2011-03-07 This book revisits many aspects of current social science theories such as actor network theory and the French school of science and technology studies to test how the theories apply in a specific situation in this case after 1991 in the city of Cherepovets in Russia home of Russia's second biggest steel

producer Severstal Using political philosophy to analyse the down to earth details of the real techno scientific problems facing the world the book examines the role of things and urban infrastructure in particular in political change It considers how the city s infrastructure including housing ICT networks the provision of public utilities of all kinds has been transformed in recent years examines the roles of different actors including the municipal authorities and explores citizens differing and sometimes contradictory images of their city It includes a great deal of new thinking on how communities are built how common action is initiated to provide public goods and how the goods themselves physical things are a crucial driver of community action and community building arguably more so than more abstract social and human forces

Banks as Security Actors Esmé Bosma, 2025-04-22 This book analyses how banks implement counter terrorist financing measures and experiment with technologies to assess risks and make security decisions Banks have become private security actors As gatekeepers of the financial system they are legally obliged to conduct customer research and monitor bank accounts for unusual or suspicious transactions Given the sheer volume of financial transactions that banks process daily detection of financial crime heavily relies on digital security technologies that help analysts categorise and identify risky customers and financial transactions Drawing from theories at the intersection of International Relations and Science and Technology Studies the book advances the concept of de scription to offer a framework for analysing experimentation with security and digital technologies in practice The research is based on fieldwork conducted in the financial crime sector in the Netherlands and the United Kingdom It explores how political and ethical choices materialise at the human technology interface and analyses the production of customer risk profiles the design and use of transaction monitoring systems and the emergence of public private partnerships to counter terrorist financing This book will be of interest to students and researchers in International Relations Science and Technology Studies and Critical Security Studies

Ownership of Knowledge Dagmar Schafer, Annapurna Mamidipudi, Marius Buning, 2023-07-18 A framework for knowledge ownership that challenges the mechanisms of inequality in modern society Scholars of science technology medicine and law have all tended to emphasize knowledge as the sum of human understanding and its ownership as possession by law Breaking with traditional discourse on knowledge property as something that concerns mainly words and intellectual history or science and law Dagmar Sch fer Annapurna Mamidipudi and Marius Buning propose technology as a central heuristic for studying the many implications of knowledge ownership Toward this end they focus on the notions of knowledge and ownership in courtrooms workshops policy and research practices while also shedding light on scholarship itself as a powerful tool for making explicit the politics inherent in knowledge practices and social order The book presents case studies showing how diverse knowledge economies are created and how inequalities arise from them Unlike scholars who have fragmented this discourse across the disciplines of

anthropology sociology and history the editors highlight recent developments in the emerging field of the global history of knowledge as science as economy and as culture The case studies reveal how notions of knowing and owning emerge because they reciprocally produce and determine each other's limits and possibilities that is how we know inevitably affects how we can own what we know and how we own always impacts how and what we are able to know Contributors Dagmar Sch fer Annapurna Mamidipudi Cynthia Brokaw Marius Buning Viren Murthy Marjolijn Bol Amy E Slaton James Leach Myles W Jackson Lissant Bolton Vivek S Oak J rn Oeder

Imperial Technoscience Amit Prasad, 2014-03-14 A study of science and technology practices that shows how even emergent aspects of research and development remain entangled with established hierarchies In the last four decades during which magnetic resonance imaging MRI has emerged as a cutting edge medical technology and a cultural icon technoscientific imaginaries and practices have undergone a profound change across the globe Shifting transnational geography of technoscientific innovations is making commonly deployed Euro West centric divides such as west versus non west or innovating north versus non innovating south increasingly untenable the world is indeed becoming flatter Nevertheless such dualist divides which are intimately tied to other dualist categories that have been used to describe scientific knowledge and practice continue to undergird analyses and imaginaries of transnational technoscience Imperial Technoscience puts into broad relief the ambivalent and contradictory folding of Euro west centrism with emergent features of technoscience It argues Euro West centric historicism and resulting over determinations not only hide the vibrant albeit hierarchical transnational histories of technoscience but also tell us little about shifting geography of technoscientific innovations The book utilizes a deconstructive empirical approach to explore entangled histories of MRI across disciplines physics chemistry medicine etc institutions university hospitals industry etc and nations United States Britain and India Entangled histories of MRI it shows better explain emergence and consolidation of particular technoscientific trajectories and shifts in transnational geography of science and technology e g centers and peripheries

Producing Power Sonja D. Schmid, 2015-02-06 An examination of how the technical choices social hierarchies economic structures and political dynamics shaped the Soviet nuclear industry leading up to Chernobyl The Chernobyl disaster has been variously ascribed to human error reactor design flaws and industry mismanagement Six former Chernobyl employees were convicted of criminal negligence they defended themselves by pointing to reactor design issues Other observers blamed the Soviet style of ideologically driven economic and industrial management In Producing Power Sonja Schmid draws on interviews with veterans of the Soviet nuclear industry and extensive research in Russian archives as she examines these alternate accounts Rather than pursue one definitive explanation she investigates how each of these narratives makes sense in its own way and demonstrates that each implies adherence to a particular set of ideas about high risk technologies human machine interactions organizational methods for ensuring safety and productivity and even about the legitimacy of the Soviet state She also shows how these attitudes shaped and were shaped by the Soviet nuclear industry

from its very beginnings Schmid explains that Soviet experts established nuclear power as a driving force of social not just technical progress She examines the Soviet nuclear industry s dual origins in weapons and electrification programs and she traces the emergence of nuclear power experts as a professional community Schmid also fundamentally reassesses the design choices for nuclear power reactors in the shadow of the Cold War s arms race Schmid s account helps us understand how and why a complex sociotechnical system broke down Chernobyl while unique and specific to the Soviet experience can also provide valuable lessons for contemporary nuclear projects

The Radiance of France, new edition Gabrielle Hecht, 2009-07-31 How it happened that technological prowess and national glory or radiance which also means radiation in French became synonymous in France as nowhere else In the aftermath of World War II as France sought a distinctive role for itself in the modern postcolonial world the nation and its leaders enthusiastically embraced large technological projects in general and nuclear power in particular The Radiance of France asks how it happened that technological prowess and national glory or radiance which also means radiation in French became synonymous in France as nowhere else To answer this question Gabrielle Hecht has forged an innovative combination of technology studies and cultural and political history in a book that as Michel Callon writes in the new foreword to this edition not only sheds new light on the role of technology in the construction of national identities but is also a seminal contribution to the history of contemporary France Proposing the concept of technopolitical regime as a way to analyze the social political cultural and technological dynamics among engineering elites unionized workers and rural communities Hecht shows how the history of France s first generation of nuclear reactors is also a history of the multiple meanings of nationalism from the postwar period and France s desire for post Vichy redemption to 1969 and the adoption of a Frenchified American design This paperback edition of Hecht s groundbreaking book includes both Callon s foreword and an afterword by the author in which she brings the story up to date and reflects on such recent developments as the 2007 French presidential election the promotion of nuclear power as the solution to climate change and France s aggressive exporting of nuclear technology
