House Sharing and Young Adults Vicky Clark, Keith Tuffin, 2022-12-27 House Sharing and Young Adults offers unique insight into the dynamics of successful house sharing among young adults and questions some of the myths fostered by the negative stereotyping of housemates. Illustrated with research from interviews with young adults, it explores co-residence, interpersonal relationships, and young people's development. Beginning with an overview of the concept and history of house sharing among young adults, Clark and Tuffin's volume also examines the reasons for the lack of research into the area up until recently. It explores key questions including how young adults choose housemates, what makes a desirable housemate, avoiding complications, the psychological advantages of house sharing, how conflict arises, and the impact of house sharing on adult development. The authors challenge the stigma of shared domesticity, demonstrating the potential of house sharing to enhance well-being through companionship while acknowledging the potential pitfalls caused by tension in intimate settings. House Sharing and Young Adults will be essential reading for both undergraduate and postgraduate students of social psychology, developmental psychology, sociology, and anthropology, as well as those interested in group dynamics, housing, demographics, and discrimination.

Shared Houses, Shared Lives Eric Raimy, 1979 This book describes the origins of the communal household, explores the significance of this growing phenomenon, and offers the reader a comprehensive guide to joining or setting up a shared household.

Regulatory Impediments to the Development and Placement of Affordable Housing United States Congress. House. Committee on Banking, Finance, and Urban Affairs. Subcommittee on Policy Research and Insurance, 1990

A History of Collective Living Susanne Schmid, 2019-10-21 The book tells the story of communal living from about 1850 until today. Three motives of sharing—the economic, political, and social—intention divide the residential objects, which are investigated in a historical analysis and allocated to nine development phases. The author investigates and compares different forms of housing and the way they developed from their origins until today; she illustrates how everyday shared living and the degrees of privacy in housing are practiced in Europe. Owing to its comprehensive documentation, the analysis of typologies, layout plans, and user and expert interviews, the book can also be considered to be a lexicon or handbook on communal living. A detailed overview that is unique in this form.
