## Sharing The Worlds Resources:

Sharing the World's Resources Oscar Schachter, 1977 No area of the world has been viewed by Americans with greater moral disapproval and yet less attention than southern Africa writes Anthony Lake in the introduction to *The Tar Baby Option* Feeling that there is much to be learned from an examination of the American response to the Rhodesian problem he offers a detailed account of America's Southern Rhodesia policy since the Smith government's unilateral declaration of independence from Great Britain in 1965 The book provides information essential to an understanding of the American approach to the current crisis in the region The author's use of previously undisclosed materials and interviews with U S foreign policymakers gives the reader an inside look not only at the Rhodesian question but also at the politics of American foreign policy

Sharing the World Michael Carley, Phillipe Spapens, 2017-09-25 This work proposes a framework based on the concept of a fair distribution of environmental space to include the diverse needs of North and South Drawing on research in 38 countries it aims to give an equitable basis for global development in order to achieve sustainable consumption by the year 2050 The environmental space approach seeks to explain the limitations of the global market economy as a tool of development and to give us the means to alter it in order to achieve a genuine quality of life rather than simple economic growth In addition this book seeks to urge all countries and peoples to consider and evaluate the environmental space approach and to join in a movement towards sustainable production and consumption for the 21st century

Dimensions of Need Food and Agriculture Organization of the United Nations, 1995-01-01 Food and people Protect and produce Building the global community Food and agriculture the future

Completing Humanity Umut Özsu, 2023-12-21 Examines the history of the rise and fall of the twentieth century's last major attempt to decolonize international law

**The Third Report on The State of the World's Plant Genetic Resources for Food and Agriculture** Food and Agriculture Organization of the United Nations, 2025-03-24 Plant genetic resources for food and agriculture PGRFA are the essence of sustainable agrifood systems They encompass the genetic diversity in both improved and farmers varieties as well as in crop wild relatives wild food plants and breeding materials The third report on the State of the World's Plant Genetic Resources for Food and Agriculture presents a comprehensive assessment of the conservation and sustainable use of PGRFA as well as the human and institutional capacities to support these efforts Based on information from 128 countries and four regional and 13 international research centres and the contribution from over 1 600 experts it presents an overview of progress since 2012 as well as current needs and challenges in the future management of PGRFA The report provides a sound basis for recalibrating relevant policies and strategies including the rolling Global Plan of Action for Plant Genetic Resources for Food and Agriculture

The Second Report on the State of the World's Plant Genetic Resources for Food and Agriculture Food and Agriculture Organization of the United Nations, 2010-01-01 Plant genetic resources provide a basis for food security livelihood support and economic development as a major component of biodiversity The Second Report on the State of the

World's Plant Genetic Resources for Food and Agriculture demonstrates the central role plant genetic diversity continues to play in shaping agriculture growth in the face of climate change and other environmental challenges. It is based on information gathered from Country Reports, regional syntheses, thematic studies, and scientific literature documenting the major achievements made in this sector during the past decade and identifying the critical gaps and needs that should urgently be addressed. The Report provides the decision makers with a technical basis for updating the Global Plan of Action on Conservation and Sustainable Use of Plant Genetic Resources for Food and Agriculture. It also aims to attract the attention of the global community to set priorities for the effective management of plant genetic resources for the future. Purchase a print copy.

**THE SECOND REPORT ON THE STATE OF THE WORLD'S ANIMAL GENETIC RESOURCES FOR FOOD AND AGRICULTURE** Food and Agriculture Organization of the United Nations, 2018-06-06. Animal genetic resource diversity underpins the supply of livestock products and services across a wide range of production environments. It promotes resilience and serves as a basis for adapting livestock management to changing conditions. It is vital to the livelihoods of many of the world's poor people. It can contribute to the delivery of ecosystem services such as landscape management and the maintenance of wildlife habitats. However, it is often undervalued, underused, and under threat. This report updates the global assessment provided in the first report on The State of the World's Animal Genetic Resources for Food and Agriculture published in 2007. It focuses particularly on changes that have occurred during the period since the first report was published. It serves as a basis for a review and potential update of the Global Plan of Action for Animal Genetic Resources, which since 2007 has provided an agreed international framework for the management of livestock biodiversity. Drawing on 129 country reports, it presents an analysis of the state of livestock diversity, the influence of livestock sector trends on the management of animal genetic resources, the state of capacity to manage animal genetic resources, including legal and policy frameworks, and the state of the art in tools and methods for characterization, valuation, use, development, and conservation.

*Foreign Assistance Authorization, Examination of U.S. Foreign Aid Programs and Policies*. United States Congress. Senate. Committee on Foreign Relations.
