Sharks Updated Edition:

Biology of Sharks and Their Relatives, Second Edition Jeffrey C. Carrier, John A. Musick, Michael R.

Heithaus, 2012-04-09 Virtually every area of research associated with sharks and their relatives has been strongly impacted by the revolutionary growth in technology. The questions we can now ask are very different than those reported even two decades ago. Modern immunological and genetic techniques, satellite telemetry and archival tagging, modern phylogenetic analysis, GIS and bomb dating are just a few of the techniques and procedures that have become a part of our investigative lexicon. A modern synthesis of the biology of Chondrichthyans. **Biology of Sharks and Their Relatives, Second Edition** discusses significant advances in the development and application of new molecular techniques to the understanding of the phylogenetic relationships among and between these groups. The book considers the effect of global changes on the status of sharks and their relatives and how advances in technology and analytical techniques have changed not only how we approach problem solving and scientific investigations but how we formulate questions. The book also introduces applications of new and novel laboratory devices, techniques and field instruments. This second edition of the award winning and groundbreaking original exploration of the fundamental elements of the taxonomy, systematics, physiology and ecology of sharks, skates, rays and chimaera presents cohesive and integrated coverage of key topics and discusses technological advances used in modern shark research. Offering a well rounded picture for students and researchers and far above competitors in scope and research, this new volume holds a wealth of data on the current status of Chondrichthyan research and provides the basis and springboard for original research. Compagno, Food and Agriculture Organization of the United Nations, 2001-01-01 An extensively rewritten, revised and updated version of the original FAO Catalogue of Sharks of the World. This volume reviews all 15 families, 25 genera and 57 species of living bullhead mackerel and carpet sharks, including certain well established but currently undescribed species, mainly from Australia. **The NEW Shark Troller's Bible**, **Sharks** Lynn Gibbons, Chris Coode, 2006-12-15 Introduces the physical characteristics of sharks, focusing on such unique features as camouflage, teeth and senses. **Sharks of the World** David A. Ebert, Marc Dando, Sarah Fowler, 2021-07-20 The most comprehensive reference guide to the world's sharks, now fully revised and updated. **Sharks of the World** is the essential illustrated guide for anyone interested in these magnificent creatures. Now fully revised and updated, it covers 536 of the world's shark species and is packed with colour illustrations, colour photos and informative diagrams. This comprehensive, easy-to-use reference guide incorporates the latest taxonomic revisions of many shark families, featuring many species that were only described in recent years. It also includes a completely revised and expanded introduction and updated line drawings throughout. Covers 536 shark species from around the world. Features updated species accounts, illustrations and maps. Gives an illustrated overview of shark biology, ecology and conservation. Includes fin identification guides. Provides a colour distribution map for every species. **Sharks of Hawaii**

Leighton R. Taylor,1993-01-01 This book offers a fascinating look at the species inhabiting waters around the Hawaiian archipelago By combining modern knowledge of shark biology with details culled from oral tradition legends and artifacts Dr Taylor provides a scientific account of individual species and sheds light on their role and significance in Hawaiian culture
