Looking To Learn Visual Pedagogy At The University Of Chicago:

Looking to Learn Linda Seidel, Katherine Fischer Taylor, 1998 Looking to Learn an exhibition at the Smart Museum of Art at the University of Chicago challenges the decontextualized approach to images and learning by setting ritual functional and intentionally aesthetic objects side by side together with inventories technical viewing devices photographs of ceremonial practices deploying the objects printed materials representing them and records and fragments of some of the environments to which they have belonged The resulting installations probed the ways in which objects artifacts and images have been collected deployed and exhibited in teaching research and self representation from the earliest days at the University

Looking and Learning: Visual Literacy across the Disciplines Deandra Little, Peter Felten, Chad Berry, 2015-03-13 In this volume the authors focus on the importance of inclusive teaching and the role faculty can play in helping students achieve though not necessarily in the same way To teach with a focus on inclusion means to believe that every person has the ability to learn It means that most individuals want to learn to improve their ability to better understand the world in which they live and to be able to navigate their pathways of life This volume includes the following topics best practices for teaching students with social economic gender or ethnic differences adjustments to the teaching and learning process to focus on inclusion strategies for teaching that help learners connect what they know with the information presented environments that maximize learners academic and social growth The premise of inclusive teaching works to demonstrate that all people can and do learn Educators and administrators can incorporate the techniques of inclusive learning and help learners retain more information This is the 141st volume of the quarterly Jossey Bass higher education series New Directions for Teaching and Learning It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers

The Practice of Persuasion Keith Moxey, 2018-08-06 This sequel to *The Practice of Theory* stresses the continued need for self reflective awareness in art historical writing Offering a series of meditations on the discipline of art history in the context of contemporary critical theory Moxey addresses such central issues as the status of the canon the nature of aesthetic value and the character of historical knowledge The chapters are linked by a common interest in even fascination with the paradoxical power of narrative and the identity of the authorial voice Moxey maintains that art history is a rhetoric of persuasion rather than a discourse of truth Each chapter in *The Practice of Persuasion* attempts to demonstrate the paradoxes inherent in a genre that while committed to representing the past must inevitably bear the imprint of the present In Moxey's view art history as a discipline is often unable to recognize its status as a regime of truth that produces historically determined meanings and so continues to act as if based on a universal aesthetic foundation His new book should enable art historians to engage with the past in a manner less determined by tradition and more responsive to contemporary values and aspirations

that pervades section three of *Medieval Art and Modernism*. An essay on medieval art in Midwestern university art museums and another one that considers the impact of works from medieval collections in special exhibitions serve as a remarkable coda to the rest of the volume. Two appendices follow this one that provides an overview of medieval art collections in Midwestern university museums and another which provides a biographical sketch of prominent dealers of medieval art from 1900-1950. Visual Processes in Reading and Reading Disabilities Dale M. Willows, Richard Kruk, Evelyne

Corcos, 2012-12-06 Over the last 25 years reading processes have been the focus of an enormous amount of research in experimental psychology as well as in other disciplines. The theories and models emerging from this research have greatly advanced understanding of both normal acquisition and of reading disabilities. Although great progress has been made there are certain aspects that have been relatively neglected in the current understanding. Specifically the role of visual factors has received less attention than that of other component processes. This is particularly surprising since reading and writing are distinct from the other language processes of speaking and listening in large part by virtue of the fact that a visual dimension is involved. Relevant research is broadly scattered both geographically and in terms of disciplines and there have been no major reviews or books concerned with the visual dimension of reading and reading disabilities. The purpose of this book is to bring together a broad range of evidence that concerns the role of visual information in reading and reading disabilities. Because reading processes are of central interest to cognitive scientists, neuropsychologists, psycholinguists, clinicians and educators, this book should draw a very broad readership. *Researching Risk and Uncertainty* Anna Olofsson, Jens O.

Zinn, 2018-09-27 Understanding and managing risk and uncertainty is a central task in contemporary societies characterised by rapid social, technological and environmental change. This book presents research approaches used by scholars who all share a passion to gain new insights in how individuals, organisations and societies approach uncertain futures and their potential dangers. The contributions illustrate the usefulness of particular methods and methodologies for researching risk in order to advance the understanding and management of social, technological and environmental challenges. With research strategies and approaches from sociology, psychology, history, linguistics, anthropology and gender studies, *Researching Risk and Uncertainty* provides guidance and inspiration to students and scholars across a range of disciplines interested in risk, disaster and social crisis.
