Reforming the Health Care Market David F. Drake, 1994-09-19 Examining the health care market in a historical framework Drake analyzes the forces and events that have shaped American health care in the twentieth century and sheds new light on why and how our health care system has dampened competitive market forces and failed to provide sound value for much of our health care expenditures He examines the roles that physicians hospitals insurance companies businesses individual consumers and government legislation have played in creating a provider dominated market in which the cost of care has been concealed from consumers Comparing U S health care expenditures with those of other developed countries he concludes that a significant part of our health care problem is the style of medicine practiced in the United States which is much more specialized and high tech than in other developed nations Drake develops proposals for health care financing reform that consider the political and economic difficulties involved He first examines the Clinton health care reform plan and makes specific recommendations for revisions that would improve its likelihood of controlling costs He then offers an alternative proposal that would both maintain the principle of universal noncancelable coverage and eliminate the flaws in the market for health care services by giving consumers a financial stake in cost containment This timely argument combining economic and historical analysis with thoughtful consideration of the motivating humanitarian and political concerns will be of interest to everyone seeking to understand and to reform our ailing health care system
