Bruner, 2013 Which measurement scales have been used the most in consumer insight research Dr Bruner author of the classic Marketing Scales Handbook series set out to answer that question After reviewing several thousand multi item measures used in scholarly research of consumer issues it was clear that some scales had been used much more than others Twenty of those are the focus of the book Not only do these top 20 indicate what is popular with marketing scholars but it provides details about how to precisely measure some of the most important psychological constructs that shape consumer behavior This book is meant for researcher in a variety of fields who are interested in reliable measures for use in surveys and experiments Instead of using simplistic measures of dubious quality or at the other extreme having to build and refine measures from scratch researchers can use the book to learn from the experts who have already crafted quality measures By using better scales accuracy is increased which thereby improves the results of analyses and the decisions based upon them Back cover *Marketing Scales Handbook* Paul J.
