sold throughout Europe as part of a commercial enterprise designed to support Francke's charitable goals Halle's reputation for consistent product quality and safety soon spread to North America where men and women became actively engaged in providing medical care to Lutheran and Reformed congregations along the east coast mainly the backcountry of Pennsylvania New Jersey Maryland and Virginia The story continues to about 1810 when Halle's North American clergy had become independent from the motherhouse and American medical practice and education began to follow its own course Wilson draws upon a large array of correspondence trading ledgers and daybooks in European and American archives Through these records she enables us to see firsthand the experience of men and women as both patients and practitioners The result is a rare glimpse into the world of German medicine and the pharmaceutical trade in eighteenth century North America

individual consumers in making healthcare decisions Effective health care services and high performing health care providers are incentivized to provide quality outcomes and to control cost Value based purchasing drives quality metrics which are publicly reported and serve as important levers for changes in healthcare delivery Geriatric patients consume a disproportionate share of healthcare resources so CMS directs Medicare and drives geriatric healthcare models All other insurers generally model CMS Medicare guidelines Innovative geriatric care models which demonstrate improved outcomes and cost moderation are scaled and lessons learned used to create new healthcare models The best data for broader value driven healthcare comes from the geriatric models which currently have the best data available This book traces the origins of value based purchasing and current geriatric care models and synthesizes their implications for today s changing health system It also discusses healthcare accountability and risk sharing The audience includes geriatric healthcare professionals but also a wider audience interested in broader healthcare models and value driven healthcare from a policy economic and ethical perspective These include primary care physicians specialists who work with aging patients hospital administrators healthcare educators healthcare organizations and all medical professionals working with aging patients and patients affected by healthcare reform
