Marriage In Australia Age At First Marriage And Proportions Marrying 1860 1971:

A Cultural History of Marriage in the Age of Empires Paul Puschmann, 2021-11-18 During the age of empires 1800 1900 marriage was a key transition in the life course worldwide a rite of passage everywhere with major cultural significance This volume presents an overview of the period with essays on Courtship and Ritual Religion State and Law Kinship and Social Networks the Family Economy Love and Sex the Breaking of Vows and Representations of Marriage Using this framework this volume explores global trends in marriage In nineteenth century Western Europe marriage was increasingly regarded as the only way to reach happiness and self fulfilment In the United States former slaves obtained the right to marry leading to a convergence in marriage patterns between the black and white populations In Latin America marriage remained less common but marriage rates were nevertheless on the rise In African and Asian societies European colonial powers tried to change indigenous marriage customs like polygamy and arranged marriages but had limited success Across the globe in a time of turbulent political and economic change marriage and the family remained crucial institutions the linchpins of society that they had been for centuries *The Making and Breaking of the Australian Family* Michael Gilding, 2020-07-31 Once everyone knew what the family was It was something natural and without a history mum dad and the kids Divorce women in the workforce de facto relationships and the sexual liberation movements have fractured the old certainties Nowadays there is more talk about the family than ever even if no one is quite sure what it is anymore The making and breaking of the Australian family looks at the family in history It traces the shift from the household economy of the late nineteenth century to the child centred nuclear family of the mid twentieth century to the recent proliferation of households The book argues that the so called traditional family was a quite recent creation and that its fragmentation is obscured by new redefinitions of the family The making and breaking of the Australian family addresses the changing experiences of childhood parenting home neighbourhood work birth and sexuality It examines the expansion of the market and the state patterns of class mobilisation the reconstruction of masculinity and femininity and the creative strategies of ordinary people in everyday life This is a lively and accessible book which will prove a valuable reference for students of history sociology women s studies and Australian studies and will generate wide discussion amongst people concerned with family policy welfare and contemporary social issues Year Book Australia, 1988, No. 71 ,1988 **Year Book Australia, 1991 No. 74** ,2008 **Year Book Australia No. 65, 1981** ,1981 The Cambridge Handbook of Social Sciences in Australia Ian McAllister, Steve Dowrick, Riaz Hassan, 2003-08-07 First published in 2003 The Cambridge Handbook of Social Sciences in Australia is a high quality reference on significant research in Australian social sciences The book is divided into three main sections covering the central areas of the social sciences economics political science and sociology Each section examines the significant research in the field placing it within the context of broader debates about the nature of the social sciences and the ways in which institutional changes have shaped how they are defined taught and researched **Year**

Book Australia, 1990 No. 73 Australian Bureau of Statistics, *The Transformation of Australia's Population* Siew-An Khoo, Peter Francis McDonald, Siew-Ean Khoo, 2003 Transformation of Australia's population 1970-2030 Australia's Fertility Transition Helen Moyle, 2020-02-03 In the late 19th and early 20th centuries most countries in Europe and English speaking countries outside Europe experienced a fertility transition where fertility fell from high levels to relatively low levels. England and the other English speaking countries experienced this from the 1870s while fertility in Australia began to fall in the 1880s. This book investigates the fertility transition in Tasmania, the second settled colony of Australia, using both statistical evidence and historical sources. The book examines detailed evidence from the 1904 New South Wales Royal Commission into the Fall in the Birth Rate which the Commissioners regarded as applying not only to NSW but to every state in Australia. Many theories have been proposed as to why fertility declined at this time: theories of economic and social development, economic theories, diffusion theories, the spread of secularisation, increased availability of artificial methods of contraception, and changes in the rates of infant and child mortality. The role of women in the fertility transition has generally been ignored. The investigation concludes that fertility declined in Tasmania in the late 19th century in a period of remarkable social and economic transformation with industrialisation, urbanisation, improvements in transport and communication, increasing levels of education, and opportunities for social mobility. One of the major social changes was in the status and role of women who became the driving force behind the fertility decline. Knowing Women Marjorie R. Theobald, 1996 A comprehensive study of female education in nineteenth century Australia, rich in narrative detail.
