Marriage and Family Development Evelyn Millis Duvall, Brent C. Miller, 1985 **Family Development** Evelyn Millis Duvall, 1957 Marriage and Family Development Evelyn Millis Duvall, Brent C. Miller, 1985 **Sourcebook of Family Theories and Methods** Pauline Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 1993-03-31

Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production

Introduction to Family Development Chalandra Bryant, 2016-12-30 More than a broad and general overview Introduction to Family Development provides an excellent introduction to numerous distinct relationship topics The text incorporates thought provoking reading selections that address demographic transitions marriage remarriage and cohabitation It also addresses culture social processes in the construction of gender stepfamilies love family communication child abuse intimate partner violence health and stress Two readings are devoted exclusively to theory and theoretical perspectives but many of the readings clearly specify the theoretical framework guiding the ideas This gives students the opportunity to learn how a given theory can be applied to more than one topic Introducing students to primary research literature promotes discussions about how data are gathered and how findings tables and figures are interpreted This textbook is appropriate for introductory and midlevel courses It can also be used as a supplement to more traditional textbooks Comprehensive in scope but manageable for first year students Introduction to Family Development addresses family family development and family functioning from the perspectives of scholars in the fields of sociology psychology and family studies The book serves as a foundational text that prepares students for later more content specific courses on family issues

Handbook of Social Development Vincent B. Van Hasselt, Michel Hersen, 2013-11-11 Social development over one s lifetime is a complex area that has received considerable attention in the psychological social psychological and sociological literature over the years Surprisingly however since 1969 when Rand McNally published Goslin s Handbook of Socialization no comprehensive statement of the field has appeared in book form

Given the impressive data in this area that have been adduced over the last two decades we trust that our handbook will serve to fill that gap In this volume we have followed a lifespan perspective starting with the social interactions that transpire in the earliest development stages and progressing through childhood adolescence adulthood and finally one's senior years In so doing we cover a variety of issues in depth The book contains 21 chapters and is divided into five parts I Theoretical Perspectives II Infants and Toddlers III Children and Adolescents IV Adults and V The Elderly Each of the parts begins with introductory material that reviews the overall issues to be considered Many individuals have contributed to the final production of this handbook Foremost are our eminent contributors who graciously agreed to share with us their expertise We also thank our administrative and technical staff for their assistance in carrying out the day to day tasks necessary to complete such a project Finally we thank Eliot Werner Executive Editor at Plenum for his willingness to publish and for his tolerance for the delays inevitable in the development of a large handbook

Handbook of Family Development and Intervention William C. Nichols, 2000-02-25 Like all complex living systems a family during its life course proceeds through predictable stages of development Yet every family is different its uniqueness defined and continually redefined by an open ended array of structural biological and sociocultural variables And as with all living things a family's continued well being depends upon its ability to adapt to changes arising from both within the family system and without First postulated in the 1940s these basic ideas constitute the conceptual core of modern family development theory From them has blossomed an impressive body of knowledge about family health and illness without which much of the progress occurring in family therapy over the past half century would not have been possible This book does much to promote continued progress in the practical application of family development theory by affording family therapists an unparalleled opportunity to acquaint themselves with the most important trends in family development theory to emerge over the past decade In it you will find contributions from leading theorists researchers and clinicians arranged so as to provide a systematic treatment of the latest thinking on family development seen from both the systemic viewpoint and that of individual members of the system Comprehensive in scope this book explores the patterns processes and dynamics inherent in traditional families as well as in important structural variants such as single parent and gay and lesbian families and families with special needs and problems including divorce physical abuse and disabilities Since progress in the social sciences is as much about formulating viable new ways of seeing as it is about determining quantifiable facts the editors offer equal time to an array of influential and sometimes radically conflicting schools of thought including sociobiology social psychology constructionism multiculturalism postmodernism and feminism Mainstream family therapists will find much in this handbook that they will consider controversial In some cases readers may even be outraged by the views expressed Yet thanks to the high caliber of scholarship intellect and professionalism evidenced throughout none of the ideas advanced in Handbook of Family Development and Intervention can be easily dismissed and all have something of value to offer the thoughtful dedicated

family therapist Handbook of Family Development and Intervention is a valuable professional resource for all couples and family therapists It is also must reading for graduate students in family psychology family therapy social work and counseling In this magnificent volume the editors make a major contribution that integrates individual and family development concepts and therapeutic applications by bringing together scholarly yet fresh contributions The inclusion of various family forms and of families with special needs makes this volume especially relevant to the treatment of contemporary families as we enter the new millennium This superb Handbook should be mandatory reading and an excellent reference for teachers researchers and therapists at all levels of development Celia J Falicov PhD President 1999 2001 American Family Therapy Academy

Treating People in Families William C. Nichols, 1996-01-01 The second section focuses on evaluation and treatment In depth chapters demonstrate how to apply the approach during the various stages of the family s developmental life cycle covering everything from planning therapy and defining goals to performing effective diagnosis and assessment and giving feedback to clients The book also provides a wealth of useful advice for treating problems that arise with divorce and remarriage Throughout special attention is given to ethical considerations in therapy the responsibilities of both the therapist and clients and issues of gender and ethnicity **Marriage and the Family** Stephen R. Jorgensen, 1986
