Marriage Family And Kinship Comparative Studies Of Social Organization:

Marriage, Family, and Kinship Melvin Ember, Carol R. Ember, 1983-01-01 The Household Robert C. Ellickson, 2010-08-02 Some people dwell alone many in family based households and an adventuresome few in communes The Household is the first book to systematically lay bare the internal dynamics of these and other home arrangements Legal underpinnings social considerations and economic constraints all influence how household participants select their homemates and govern their interactions around the hearth Robert Ellickson applies transaction cost economics sociological theory and legal analysis to explore issues such as the sharing of household output the control of domestic misconduct and the ownership of dwelling units Drawing on a broad range of historical and statistical sources Ellickson contrasts family based households with the more complex arrangements in medieval English castles Israeli kibbutzim and contemporary cohousing communities He shows that most individuals when structuring their home relationships pursue a strategy of consorting with intimates This he asserts facilitates informal coordination and tends ultimately to enhance the quality of domestic interactions He challenges utopian critics who seek to enlarge the scale of the household and legal advocates who urge household members to rely more on written contracts and lawsuits Ellickson argues that these commentators fail to appreciate the great advantages in the home setting of informally associating with a handful of trusted intimates The Household is a must read for sociologists economists lawyers and anyone interested in the fundamentals of domestic life

Buikstra, 2018-10-26 Bioarchaeologists who study human remains in ancient historic and contemporary settings are securely anchored within anthropology as anthropologists yet they have not taken on the pundits the way other subdisciplines within anthropology have Popular science authors frequently and selectively use bioarchaeological data on demography disease violence migration and diet to buttress their poorly formed arguments about general trends in human behavior and health beginning with our earliest ancestors While bioarchaeologists are experts on these subjects bioarchaeology and bioarchaeological approaches have largely remained invisible to the public eye Current issues such as climate change droughts warfare violence famine and the effects of disease are media mainstays and are subjects familiar to bioarchaeologists many of whom have empirical data and informed viewpoints both for topical exploration and also for predictions based on human behavior in deep time The contributions in this volume will explore the how and where the data has been misused present new ways of using evidence in the service of making new discoveries and demonstrate ways that our long term interdisciplinarity lends itself to transdisciplinary wisdom We also consider possible reasons for bioarchaeological invisibility and offer advice concerning the absolute necessity of bioarchaeologists speaking out through social media **Handbook of Neurosociology** Will Kalkhoff, Joseph Dippong, Rengin B.
