Mars The Mystery Unfolds:

Mars Peter John Cattermole, 2001 In the wake of a flood of new data and images from several exploratory missions fascination with Mars has become even more intense than it was when Percival Lowell believed he had observed canals constructed by live Martians While we know that these never existed we do have evidence that Mars once had rivers shallow lakes glaciers huge active volcanoes and intense flooding In this book Peter Cattermole a geologist who has been studying the planet for many years captures the sense of continuing excitement about Mars and its history He builds his story on the foundations of his earlier book Mars The Story of the Red Planet Chapman Hall 1992 An immense amount of visual geochemical and physical data concerning the rocks landscape and weather is now available The new book draws on this wealth of new information providing a clear account of current scientific understanding of the Red Planet From publisher s description

Encyclopedia of the Solar System Lucy-Ann McFadden, Torrence Johnson, Paul Weissman, 2006-12-18 Long before Galileo published his discoveries about Jupiter lunar craters and the Milky Way in the Starry Messenger in 1610 people were fascinated with the planets and stars around them That interest continues today and scientists are making new discoveries at an astounding rate Ancient lake beds on Mars robotic spacecraft missions and new definitions of planets now dominate the news How can you take it all in Start with the new Encyclopedia of the Solar System Second Edition This self contained reference follows the trail blazed by the bestselling first edition It provides a framework for understanding the origin and evolution of the solar system historical discoveries and details about planetary bodies and how they interact and has jumped light years ahead in terms of new information and visual impact Offering more than 50% new material the Encyclopedia includes the latest explorations and observations hundreds of new color digital images and illustrations and more than 1 000 pages It stands alone as the definitive work in this field and will serve as a modern messenger of scientific discovery and provide a look into the future of our solar system Forty seven chapters from 75 eminent authors review fundamental topics as well as new models theories and discussions Each entry is detailed and scientifically rigorous yet accessible to undergraduate students and amateur astronomers More than 700 full color digital images and diagrams from current space missions and observatories amplify the chapters Thematic chapters provide up to date coverage including a discussion on the new International Astronomical Union IAU vote on the definition of a planet Information is easily accessible with numerous cross references and a full glossary and index

Magnificent Mars Ken Croswell, 2003-10-21 Mars has long offered the prospect of another living world near Earth Although NASA s first spacecraft dashed visions of little green men tending canals recent voyages have painted a picture of an intriguing planet that may have once resembled Earth with warmth water and possibly life Mars may answer the great question Are we alone for if Mars like Earth gave rise to life then trillions of other worlds throughout the universe have surely done the same Harvard trained astronomer Ken Croswell set the standard for elegance and eloquence with his stunning photographic triumph Magnificent Universe Now with insightful

prose and astonishing images he presents the red planet's full glory in *Magnificent Mars* showing volcanoes taller than Mount Everest spiral shaped polar caps of ice and a canyon system that could stretch from Ohio to California Here is a concise synthesis of the latest research on Mars accompanied with the very best full color images expertly reprocessed to look even better than NASA's own versions from the Hubble Space Telescope Viking Pathfinder Mars Global Surveyor Mars Odyssey and other spacecraft Highlights include a foldout panorama of the Martian surface a never before published rainbow colored topographic map and a sequence showing a full rotation of Mars courtesy of the Hubble Space Telescope Many of these images have never appeared in a book before Few have ever looked so good In lyrical prose Dr Croswell weaves these stupendous images into a virtual tour of Mars by organizing them around the four elements Earth Air Fire and Water From the northern plains of Vastitas Borealis to the towering Olympus Mons and other volcanoes of the Tharsis bulge we explore the red planet's geology topography and surface From the frigid climate to the massive dust storms that can engulf the entire globe we examine the thin Martian atmosphere and the clues it preserves to the planet's wetter past And from the flood channels that spill into Chryse Planitia to the vast potential lakebed of ancient Hellas we see stunning images of ancient rivers and floods triggering speculation that a warm wet Mars may have given rise to life that survives to this day The tour concludes with a voyage to the planet's two potato shaped moons Phobos and Deimos complete with rainbow colored topographic maps Unique color coded tables on Mars its atmosphere its life history its moons and NASA missions to the planets appear in a useful reference section along with a glossary and suggestions for further reading With its large format superb images and compelling text *Magnificent Mars* is the next best thing to standing on the red planet itself In future years NASA will launch numerous missions to Mars and *Magnificent Mars* is the definitive guide to what these spacecraft will see Indeed the first human explorers to Mars may want to take a copy of *Magnificent Mars* aboard their spaceship **Mars**

Allan B. Cobb, 2004-08-15 Presents scientific discoveries about the atmosphere size surface orbit and rotation of the Red Planet **Arid Zone Geomorphology** David S. G. Thomas, 2011-02-08 The new edition of *Arid Zone Geomorphology* aims to encapsulate the advances that have been made in recent years in the investigation and explanation of landforms and geomorphological processes in drylands Building on the success of the previous two editions the Third Edition has been completely revised and updated to reflect the latest developments in the field Whilst this latest edition will remain a comprehensive reference to the subject the book has been restructured to include regional case studies throughout to enhance student understanding and is clearly defined into five distinct sections Firstly the book introduces the reader to Large Scale Controls and Variability in Drylands and then moves on to consider Surface Processes and Characteristics The Work of Water The Work of the Wind The book concludes with a section on Living with Dryland Geomorphology that includes a chapter on geomorphological hazards and the human impact on these environments Once again recognised world experts in the field have been invited to contribute chapters in order to present a comprehensive and up to date overview of current

knowledge about the processes shaping the landscape of deserts and arid regions In order to broaden the appeal of the Third Edition the book has been reduced in extent by 100 pages and the Regional chapters have been omitted in favour of the inclusion of key regional case studies throughout the book The Editor is also considering the inclusion of a supplementary website that could include further images problems and case studies

The Size, Composition, and Surface Features of the Planets Orbiting the Sun Ellen Foxxe, 2006 This anthology provides insight into some of the more recent information that has been gathered by scientists about the planets in our solar system Is there water on Mars Is Pluto really a planet What do surfaces of the planets farthest from the Sun look like The cutting edge collection of articles on these topics is an excellent source of the latest information on this fascinating subject
