Both Marx and Weber articulated theories of social change, and advanced explanations for the origin of capitalism. Who was right? Or can the two be synthesised?

Christine Langhoff, 2003-06-07 Essay from the year 2003 in the subject Sociology General and Theoretical Directions grade 2 1 B Oxford University New College language English abstract The study of capitalism is a predominant theme in both Marx's and Weber's writings In conjunction with Marx's Capital The Protestant Ethic and the Spirit of Capitalism by Weber constitutes one of the two great theories of capitalism However one has to note that both have written a great deal on the theories of capitalism Both writers focus on the historical and causal forces shaping capitalist society but where Marx believed in economic determinism Weber also believed in so called non economic factors of capitalism He based his analysis on a number of interconnections he saw between capitalist development and the influences of various spheres of society such as religion law and political institutions I am going to give an overview of the two different explanations for the origin of capitalism by Marx and Weber Further I am going to investigate who of the two was right or whether the two theories can be synthesised

Karl Marx on Society and Social Change Karl Marx, 1973 This volume presents those writings of Marx that best reveal his contribution to sociology particularly to the theory of society and social change The editor Neil J Smelser

has divided these selections into three topical sections and has also included works by Friedrich Engels. The first section, *The Structure of Society*, contains Marx's writings on the material basis of classes, the basis of the state, and the basis of the family. Among the writings included in this section are Marx's well-known summary from the Preface of *A Contribution to a Critique of Political Economy* and his equally famous observations on the functional significance of religion in relation to politics. The second section is titled *The Sweep of Historical Change*. The first selection here contains Marx's first statement of the main precapitalist forms of production. The second selection focuses on capitalism, its contradictions, and its impending destruction. Two brief final selections treat the nature of communism, particularly its freedom from the kinds of contradictions that have plagued all earlier forms of societies. The last section, *The Mechanisms of Change*, reproduces several parts of Marx's analysis of the mechanisms by which contradictions develop in capitalism and generate group conflicts. Included is an analysis of competition and its effects on the various classes, a discussion of economic crises and their effects on workers, and Marx's presentation of the historical specifics of the class struggle. In his comprehensive Introduction to the selections, Professor Smelser provides a biography of Marx, identifies the various intellectual traditions which formed the background for Marx's writings, and discusses the selections which follow. The editor describes Marx's conception of society as a social system, the differences between functionalism and Marx's theories, and the dynamics of economic and political change as analyzed by Marx.

A Guide to Marx's 'Capital' Vols I-III Kenneth Smith, 2012-11-15 This book provides a comprehensive guide to all three volumes of Karl Marx's *Capital* with advice on further reading and points for further discussion. Recognizing the contemporary relevance of *Capital* in the midst of the current financial crisis, Kenneth Smith has produced an essential guide to Marx's ideas, particularly on the subject of the circulation of money capital. This guide uniquely presents the three volumes of *Capital* in a different order of reading to that in which they were published, placing them instead in the order that Marx himself sometimes recommended as a more user friendly way of reading. Dr. Smith also argues that for most of the twentieth century, the full development of the capitalist mode of production (CMP) has been undermined by the existence of a non-capitalist third world, which has caused the CMP to take on the form of what Marx called a highly developed mercantile system rather than one characterized by an uninterrupted circuit of industrial capital of the kind he expected would develop. While the guide can be read as a book in its own right, it also contains detailed references to Volumes I-III so that students, seminars, and discussion groups can easily make connections between Smith's explanations and the relevant parts of *Capital*.

A Nation of Shopkeepers Dan Evans, 2023-02-14 A Nation of Shopkeepers explores the unstoppable rise of the petite bourgeoisie one of the most powerful but underexplored classes in modern society The petite bourgeoisie the insecure class between the working class and the bourgeoisie is hugely significant within global politics Yet it remains something of a mystery Initially identified as a powerful political force by theorists like Marx and Poulantzas the petit bourgeoisie was expected to decline as small businesses and small property were gradually swallowed up by monopoly capitalism Yet far from disappearing structural changes to the global economy under neoliberalism have instead grown the petite bourgeoisie and the individualist values associated with it have been popularized by a society which fetishizes aspiration home ownership and entrepreneurship So why has this happened A Nation of Shopkeepers sheds a light on this mysterious class exploring the class structure of contemporary Britain and the growth of the petite bourgeoisie following Thatcherism It shows how the rise of home ownership small landlordism and radical changes to the world of work have increasingly inculcated values of petite bourgeois individualism how popular culture has promoted and reproduced values of aspiration and conspicuous consumption that militate against socialist organizing and most importantly what the unstoppable rise of the petit bourgeoisie means for the left
