## **Marx Went Away But Karl Stayed Behind:**

**Marx Went Away--But Karl Stayed Behind**, 2010 When it appeared in 1983 Caroline Humphrey's *Karl Marx Collective* was the first detailed study of the Soviet collective farm system Through careful ethnographic work on two collective farms operated in Buryat communities in Siberia the author presented an absorbing if dispiriting account of the actual functioning of a planned economy at the local level Now this classic work is back in print in a revised edition that adds new material from the author's most recent research in the former Soviet Union In two new chapters she documents what has happened to the two farms in the collapsing Russian economy She finds that collective farms are still the dominant agricultural forms not out of nostalgic sentiment or loyalty to the Soviet ideal but from economic and political necessity Today the collectives are based on households and small groups coming together out of choice There have been important resurgences in traditional thinking about kinship genealogy shamanism and mountain cults and yet all of this is newly formed by its attempt to deal with post Soviet realities *Marx Went Away* will appeal to students and scholars of anthropology political science economics and sociology The book should be on the shelf of every student of Soviet affairs *Times Literary Supplement* Caroline Humphrey is Fellow of King's College and Lecturer in Social Anthropology University of Cambridge

**Marx Went Away--But Karl Stayed Behind** Caroline Humphrey, 1998 Updates a classic work on rural society in Siberia

**New Lithuania in Old Hands** Ida Harboe Knudsen, 2012-05-01 Based on detailed ethnographic material *New Lithuania in Old Hands* analyzes the impact that European Union accession has had upon the country's aging smallscale farmers and describes how the reality of Lithuania's EU membership has been a far cry from the scenarios of wealth and overabundance once promised The text reveals that in many instances membership has resulted in a return to subsistence production increased insecurity and a reinforcement of kinship obligations Thus instead of treating the European Union as an elite project and voicing the support of various other segments of the population this volume shows how broad parts of the rural population have been affected by and engaged in processes of change following Lithuania's accession changes that threaten to have a large impact upon the future of the country's family structures and its farming demographic

*The Telengits of Southern Siberia* Agnieszka Halemba, 2006-04-18 In a new and engaging study Halemba explores the religion and world outlook of the Telengits of Altai The book provides an account of the Altai its peoples clans and political structures focusing particularly on the Telengits whilst also considering the different elements of religious belief exhibited among these native peoples Paradoxically as the demand for national recognition grows among such people and with it the need for more formal state structures built around the nation religion too begins to become formalized and loses its natural all pervasive character With the Telengits whose natural religion includes elements of Buddhism this takes the form of a debate as to whether the state religion of their polity is to be Buddhism or contrary to the character of shamanism a formal structured fixed shamanism This is a comprehensive anthropological account of the contemporary religious life of the Telengits holding important implications for wider debates

in sociology and politics      *Dispersed Dispossession* Alexander Vorbrugg, 2025 This book provides a nuanced analysis of rural change in Russia during the 2010s a crucial and formative phase marked by the consolidation of giant agricultural companies large land deals soaring exports and spectacular failures of investment projects It contextualizes complex and often ambivalent empirical realities within historical and political economic frameworks Through extensive fieldwork Alexander Vorbrugg gives rare insights into the operations of large agricultural companies and reveals how the deterioration of material infrastructures social arrangements government and local supports and collective goods erode the conditions of rural inhabitants well being and agency Vorbrugg introduces dispersed dispossession a concept that helps to relate gradual degradation to appropriation and agency The concept captures losses that have been accumulated across Soviet reform and state capitalist phases and stick to places persons and potentialities These losses are perpetuated and exploited by businesses and politicians and have profound implications for the conditions for resistance shaping the range of conceivable alternatives They are part of a history that is not fully past Provided by publisher      **Ethical Eating in the Postsocialist and Socialist World** Yusef Jung, Jakob A. Klein, Melissa L. Caldwell, 2014-02-21 Current discussions of the ethics around alternative food movements concepts such as local organic and fair trade tend to focus on their growth and significance in advanced capitalist societies In this groundbreaking contribution to critical food studies editors Yusef Jung Jakob A Klein and Melissa L Caldwell explore what constitutes ethical food and ethical eating in socialist and formerly socialist societies With essays by anthropologists sociologists and geographers this politically nuanced volume offers insight into the origins of alternative food movements and their place in today's global economy Collectively the essays cover discourses on food and morality the material and social practices surrounding production trade and consumption and the political and economic power of social movements in Bulgaria China Cuba Lithuania Russia and Vietnam Scholars and students will gain important historical and anthropological perspective on how the dynamics of state market citizen relations continue to shape the ethical and moral frameworks guiding food practices around the world      **Wounded Cities** Jane Schneider, Ida Susser, 2020-06-29 Although the seemingly apocalyptic scale of the World Trade Center disaster continues to haunt people across the globe it is only the most recent example of a city tragically wounded Cities are in fact perpetually caught up in cycles of degeneration and renewal As with the WTC from time to time these cycles are severely ruptured by a sudden unpredictable event In the wake of recent terrorist activities this timely book explores how urban populations are affected by wounds inflicted through violence civil wars overbuilding drug trafficking and the collapse of infrastructures as well as natural disasters such as earthquakes Mexico City New York Beirut Belfast Bangkok and Baghdad are just a few examples of cities riddled with problems that undermine on a daily basis the quality of urban life What does it mean for urban dwellers when the infrastructure of a city collapses transport communication grids heat light roads water and sanitation What are the effects of foreign investment and huge construction projects on urban populations and how does this change the look and character of

a city How does drug trafficking intersect with class race and gender and what impact does it have on vulnerable urban communities How do political corruption and mafia networks distort the built environment Drawing on in depth case studies from across the globe this book answers these intriguing questions through its rigorous consideration of changing global and national contexts social movements and corrosive urban events Adopting a grass roots up approach it places emphasis on peoples experiences of uneven development and inequality their engagement with memory in the face of continual change and the relevance of political activism to bettering their lives It is especially attentive to the historical interaction of particular cities with wider political and economic forces as these interactions have shaped local governance over time

*Russia's Unknown Agriculture* Judith Pallot, Tat'yana Nefedova, 2007-08-23 Basing their findings on four years of research during which they studied rural districts drawn from a variety of contrasting regions of European Russia the authors discuss the place of rural households in Russia's agri food production system They show that far from being solely concerned with survival household plots in contemporary Russia are increasingly used to produce crops and livestock products for the market In the book they describe the rich variety of forms that small and independent farming takes today from highly localised clusters of cucumber or tomato producers to specialization in crop or animal husbandry at a higher spatial scale or associated with particular ethnic groups The authors systematically examine the influence on past and present practices of distance and the environment the state of the large farm sector local customs and ethnicity on what households produce and how they produce it often using case studies of people they have met plot holders farmers local officials to illustrate their point They criticise the tendency of the household production to be treated as the agricultural Other in post Soviet Russia and argue with the right incentives it has the potential for further development

Narrating the Future in Siberia Olga Ulturgasheva, 2012 The wider cultural universe of contemporary Eveny is a specific and revealing subset of post Soviet society From an anthropological perspective the author seeks to reveal not only the Eveny cultural universe but also the universe of the children and adolescents within this universe The first full length ethnographic study among the adolescence of Siberian indigenous peoples it presents the young people's narratives about their own future and shows how they form constructs of time space agency and personhood through the process of growing up and experiencing their social world The study brings a new perspective to the anthropology of childhood and uncovers a quite unexpected dynamic in narrating and foreshadowing the future while relating it to cultural patterns of prediction and fulfillment in nomadic cosmology

The Vanishing Hectare Katherine Verdery, 2018-05-31 In most countries in Eastern Europe and the former Soviet Union the fall of communism opened up the possibility for individuals to acquire land Based on Katherine Verdery's extensive fieldwork between 1990 and 2001 *The Vanishing Hectare* explores the importance of land and land ownership to the people of one Transylvanian community Aurel Vlaicu Verdery traces how collectivized land was transformed into private property how land was valued what the new owners were able to do with it and what it signified to each of the different groups vying for land

rights Verdery tells this story about transforming socialist property forms in a global context showing the fruitfulness of conceptualizing property as a political symbol as a complex of social relations among people and things and as a process of assigning value This book is a window on rural life after socialism but it also provides a framework for assessing the neo liberal economic policies that have prevailed elsewhere such as in Latin America Verdery shows how the trajectory of property after socialism was deeply conditioned by the forms property took in socialism itself this is in contrast to the image of a tabula rasa that governed much thinking about post socialist property reform
