

Malthusian Theory

The Theory

The Concept of Development: He regarded the process of development as a result of consistent efforts rather automatic.

For him the process of eco.dev. Was one of the ups and downs of economic activity rather than smooth.

He was concerned with the progress of wealth of a country means eco. Development.

-Economic Dev. Through increasing the wealth of a country.

-Wealth= Qty. of produce + valuation of the produce.

Population Growth and Economic Dev.

-According to him population growth itself is not sufficient for ece.development.

-Economic Dev. =Population growth +development process.

-Increase in population is the result of proportionate increase in wealth. Because increase in K accumulation demands more labor thus more population. And population growth increases wealth through effective demand.

-Hence mere increase in pop. growth does not increase wealth.

Robinson was one of the most important and influential Black radical scholars of recent times best known for the pathbreaking Black Marxism *The Making of the Black Radical Tradition* In this late major work he turns his attention to European radical traditions and explores a genealogy of emancipatory thought and practice that predates Marxism and capitalism itself and which continues to guide struggles for liberation today Accompanied by a foreword by H L T Quan and a preface by Avery Gordon this invaluable text reimagines the communal ideal from a broader perspective that transcends modernity industrialisation and capitalism *Soviet Population Policy* Helen Desfosses, 2013-10-22 *Soviet Population Policy*

Conflicts and Constraints focuses on the study of population policy in the USSR The text looks at the problems identified with population including migration depopulation of rural areas and rapid urbanization The book starts by outlining the development of Soviet census considering its purposes and methods involved The text then proceeds by giving information on population dynamics in which the issue of population is seen as inseparable from political economic and social concerns One of the issues discussed is how military manpower can be affected by the problem on population Another feature of the book is

the sector of aging citizens in which it is identified that the country has experienced an increase in the number of pensioners In this context a comparison of the retirement systems of the United States and Russia is presented The book also looks at the relationship of fertility and female work status in the country The text goes further by discussing the pro natalist policies of the country in which the reduction in the psychological and material costs of having children is noted A discussion on the four models used by demographers to emphasize the issues affecting the population is also presented The book notes that the country s position on population is rooted in Marxism Readers who are interested in establishing the relationship of population with other social concerns of a country can find this book worth considering **Population and Society** A.
