French Socialists Before Marx Pamela M. Pilbeam, 2000 How to put socialism into practice was as fundamental a concern for nineteenth century socialists as it has been for their successors In French Socialists before Marx Pamela Pilbeam explores the development of and changes in socialist ideas revealing how the Fourierists of the 1830s and 1840s changed Fourier's ideas on the family and sexuality preferring public works programs to model communities She focuses on the practical contributions of early socialists including the efforts of working women to run schools worker associations and newspapers

Marxism and the French Left Tony Judt, 1986 Louis Althusser and the Traditions of French Marxism William Lewis, 2005-10-17 Throughout the course of the twentieth century communism has enjoyed direct competition with all other governmental and economic systems Often communist countries produced their own special brand of party intellectual These figures rightly occupied their place within their own national context and within the context of the International Some communist intellectuals through the high level of erudition exhibited in their writing have received a wider reception despite their direct linkage to party politics e.g. Antonio Gramsci Georg Lukacs and Victor Serge are good examples After 1956 when Khrushchev exposed Stalin's atrocities to the Twentieth Congress of the Communist Party of the Soviet Union and as a result to the entire world Marxist philosophy was widely discredited It had been assumed that Stalin's excesses were somehow encouraged or supported through Marx's thought When in the mid 1960s Louis Althusser first offered his re-readings of Marx's philosophy it and communist political practice were in ruin However Althusser was in a unique cultural and historical position Thinking and writing concomitant with the structuralists and poststructuralists in France and also having access to certain theoretical tools while simultaneously committing himself entirely to Marxist thought Althusser was conceivably the last of his tradition He was a Marxist philosopher who unlike Sartre at the end of his life did not abandon communism to for instance existentialism In Louis Althusser and the Traditions of French Marxism William Lewis gives readers a striking example of intellectual biography and critical theory His approach considering the work and life of Althusser within French Marxism and French intellectual culture fills a void in contemporary scholarship But much more importantly Lewis is able to show how Althusser's thought is the result of and a response to specific French intellectual and political traditions of reading Marx It is through this combination of concerns

Paul Lafargue and the Founding of French Marxism, 1842-1882 Leslie Derfler, 1991 Paul Lafargue disciple and son in law of Karl Marx was among the most important persons giving organized political expression to Marxism in France He helped found both the first French collectivist party and the first French Marxist party He was the first Marxist to sit in the French legislature and for three decades served as the chief theoretician and propagandist for Marxism in France With his wife Laura he translated the Communist Manifesto and other works introducing and applying Marxist thought in France Demonstrating an almost

seamless web between intellectual and family history Leslie Derfler relates ideas and family identity in this account of the first forty years of Paul Lafargue's life Lafargue like his famous father in law called for ideological purity and demanded total hostility to anarchists and reformists He insisted on economic determinism the primacy of the concept of the class struggle and the theory of surplus value But he made his own contributions as well particularly in his insistence on rejecting the domination of bourgeois values Lafargue's most famous pamphlet *The Right To Be Lazy* showed the advantages that labor could derive by rejecting the bourgeois work ethic An intellectual of power he pioneered in the application of Marxist methods of analysis to questions of anthropology aesthetics and literary criticism Born in Cuba of mixed racial descent Lafargue joined in demonstrations as a medical student in Paris in the 1860s and was forced into exile Resuming his studies in London he became a fixture in the Marx household until he married Laura Marx and moved to Paris There he worked to expand the influence of the International Workingmen's Association but fled to Spain following the general repression after the fall of the Paris Commune He continued his efforts on behalf of Marxism in Spain and then for ten years in London before returning to France where he helped to found the new Marxist Parti Ouvrier Français in 1882

Michel Houellebecq and the Literature of Despair Carole Sweeney, 2013-11-21 Widely acknowledged as an important if highly controversial figure in contemporary literature French novelist and poet Michel Houellebecq has elicited diverse critical responses In this book Carole Sweeney examines his novels as a response to the advance of neoliberalism into all areas of affective human life This historicizing study argues

that le monde houellebecquien is an atomised society of banal quotidian alienation populated by quietly resentful men who are the botched subjects of late capitalism Addressing Houellebecq's handling of the failure of the radical thought of 68 Sweeney looks at the ways in which his fiction treats feminism the decline of religion and the family as well as the obsolescence of French theory and the Sartrean notion of engaged literature Reading the world with the disappointed idealism of a contemporary moralist Houellebecq's novels Sweeney argues fluctuate between despair for the world as it is and a limp utopian hope for a post humanity

In Pursuit of Prosperity Charles R Hankla, 2025-07-09 With so many states committed to economic transformation and so many experts ready to provide technical advice on how to achieve it why does progress so often remain elusive In Pursuit of Prosperity examines the process of economic upgrading moving to more valuable activities in production improving technology knowledge and skills and participating in global value chains and develops a new theory to explain the form and success of national policies designed to promote it Using a mixed methods approach Charles R Hankla draws upon archival research and interviews from France and India as well as quantitative models of sixteen countries across six decades He finds that when state and private actors are aligned in their institutional structures which can happen in both corporatist and pluralist systems industrial policy tends to be more effective It is when the state or the private sector independently dominates industrial policy that poor outcomes are most likely As In Pursuit of Prosperity shows rather than being fixed characteristics of countries policymaking styles vary across time and across sectors of the economy reflecting the changing power dynamics and organizational resources of stakeholders The book sheds light on how industrial policy which is experiencing a comeback in the United States and beyond can best be harnessed for upgrading It offers a valuable contribution to our understanding of the complex relationship between state politics and economic performance in the modern globalized world

Native to the Republic Minayo Nasiali, 2016-10-20 In *Native to the Republic* Minayo Nasiali traces the process through which expectations about living standards and decent housing came to be understood as social rights in late twentieth century France These ideas evolved through everyday negotiations between ordinary people municipal authorities central state bureaucrats elected officials and social scientists in postwar Marseille Nasiali shows how these local level interactions fundamentally informed evolving ideas about French citizenship and the built environment namely that the institutionalization of social citizenship also created new spaces for exclusion Although everyone deserved social rights some were supposedly more deserving than others From the 1940s through the early 1990s metropolitan discussions about the potential for town planning to transform everyday life were shaped by colonial and later postcolonial migration within the changing empire As a port and the historical gateway to and from the colonies Marseille's interrelated projects to develop welfare institutions and manage urban space make it a particularly significant site for exploring this uneven process Neighborhood debates about the meaning and goals of modernization contributed to normative understandings about which residents deserved access to expanding social rights Nasiali argues that assumptions about

racial social and spatial differences profoundly structured a differential system of housing in postwar France Native to the Republic highlights the value of new approaches to studying empire membership in the nation and the welfare state by showing how social citizenship was not simply constituted within imagined communities but also through practices involving the contestation of spaces and the enjoyment of rights
